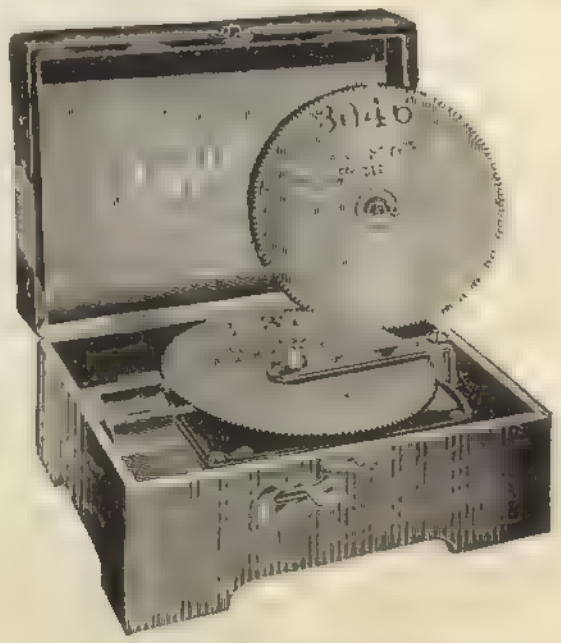
No. 9250	6 Airs, 3¼-inch cylinder	Each $37 60
No. 9254	8 Airs, 4⅛-inch cylinder	Each 42 80
No. 9256	10 Airs, 6½-inch cylinder	Each 50 00
No. 9258	12 Airs, 8 -inch cylinder	Each 62 00

Cases with Rosewood Tops, Variegated Wood Inlaying, Interior Glass Covers, Nickel Plated Spring Lever Movements, Outside Crank Winding. EACH WITH TUNE DIAL AND SAFETY CHECK.

No 9318	12 Airs, 14-inch cylinder, tune skipper and speed regulator, case 11x27 inches	Each $114 20
No. 9319	12 Airs, 13-inch cylinder, with Zither attachment, tune skipper and speed regulator, case 11x27 inches	Each 118 80

A Zither is one of the most charming instruments, and when added to the Musical Box, as in the above number, produces a most delightful effect. The Zither attachment consists of a number of steel bars, which are struck by hammers operated through the medium of the Zither attachment which is an adjustable bar that may be raised at will.



THE ARION MUSIC BOX.

No 9300

The instrument is exceedingly well made, and considering its size, its tone is powerful. As a producer of music, nothing more like it to please can be found. It is the Arion Music Box. It is a self-playing, key-winding instrument. The case is made of mahogany with inlaid, and is handsomely finished and has a chromo top. Size 8x5½x11 inches.

No 9300 Price, including six tune sheets . . Each $17 80

Make the little boy or girl happy just what they want durable, well constructed and of good quality—prices exceptionally low

DID YOU EVER SEE

Wagner's KANT-SUK Calf and Cow Weaner?

IT'S A WONDER

A perfectly humane and effective device that sells the whole year round

The hinge construction of this article allows the calf and cow to graze in the same pasture yet effectually prevents sucking. It is easily applied. Once used always used. KANT-SUK Weaners have no equal.

We make a complete line of Saddlery Hardware, also Hardware Specialties

Loose

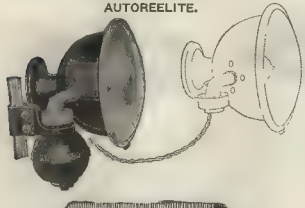
SEARCHLIGHT.
STEWART V-RAY.

The Stewart V-Ray searchlight is correctly balanced below the bracket on a three-point suspension principle. It stays set in the desired position. Without tugging or pulling, but with ease, you can throw the penetrating V-Ray searchlight in any direction, front, down, back or to either side. It has a full six inch curved lens, not plain window glass. A three and one-half inch reducing mirror is located in the center of the back. An important feature is the focusing device which permits replacing the bulb with any bulb on the car, and it takes only a few seconds' time. The reflector is silver plated, not merely polished tin. The Stewart V-Ray searchlight is moisture and dust proof. It comes complete with mirror, electric cord and bracket which fits practically every make of car.

Each

No. 139A—Stewart V-Ray Searchlight; packed one in a carton; weight each 3½ lbs.....**$8.00**

SPOTLIGHTS.
AUTOREELITE.



The Autoreelite provides a lamp of superior construction in combination with the Anderson Cord Reel carrying 12 feet of extension cord, allowing the lamp to be removed for inspection to any part of the car. The adjustable cord reel is located in the ball casing just back of the lamp. To use as a portable, simply unscrew the knurled nut and withdraw the lamp to the desired length. The cord reel operates like an ordinary curtain roller.

Lamp and bracket in beautiful black enamel; fitted with clear lens, backed by a 21 c. p. nitrogen lamp in a silvered parabolic reflector of carefully determined contour to increase and direct the light rays. Switch conveniently located at the back of the lamp. A 3½-inch reducing mirror giving complete view of the road behind. Three pairs of windshield clamps—round, oval and rectangular, included with each lamp, throw away the two not required.

Each

No. 3140—Autoreelite; packed one in a carton; weight each, 5 lbs.....**$13.50**
In lots of 6 or more **12.60**

DASH OR SPEEDOMETER.

The smallest and neatest lamp for the purpose on the market. The shutter protects the bulb when not in use. Made of brass, nickel plated; furnished with Ediswan base.

Each

No. 50T—Length, 4 ins.; diam., 1½ ins. (less bulb).....$1.50

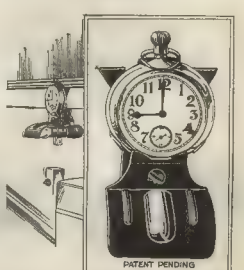
DASH LIGHT.
NEVEROUT.

A dash light which is made especially to fit under cowl board on Ford car. Illuminates entire dash. No drilling necessary as lamp is securely fastened to cowl board with a clamp. Complete with bulb ready for installation.

Each

No. 201—Neverout Ford Dash Lamp.....$2.00

COMBINATION CLOCK AND DASH LIGHT.
NEVEROUT.

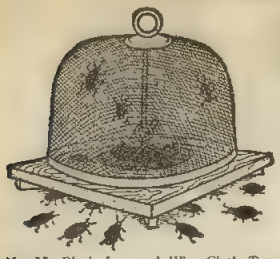


A combination dash light and illuminated clock for Ford cars. Illuminates the clock and entire dash as well as lights the foot pedals, coil box, speedometer, etc. Clock dial is specially designed for easy reading from either front or rear seat. Securely attached by a clamp to angle iron beneath windshield, no drilling. Easy to attach but impossible to remove without a screw driver. Current for this light is furnished from the Ford magneto, therefore at no expense; can be turned on and off at will. Complete including wire, bulb and clock ready to use.

Each

No. 202—Neverout Combination Dash Light and Illuminated Clock.....$5.00

ROACH TRAPS



These are the best Traps ever Invented for Catching Roaches. They are Clean and Sanitary, and Much More Desirable for Ridding a House of these Pests than Insect Powder or Poisons. A little Cheese, Potato, Onion or Banana makes an Excellent Bait and one of these Traps will Catch all the Roaches on the Premises.

Per Dozen

Each Outfit in a Wooden Box

Iron Crossing Signs

Newton's Improved Train Order Signal

The simplest but most efficient of the many devices for signaling orders to trains by day or night.

It is entirely automatic and positive in its working, having no wires, ropes or chains to get misplaced or out of order

The arrangement of the lamp support is such that the lamp can only be put on in one way, thus assuring the proper position of signal lights

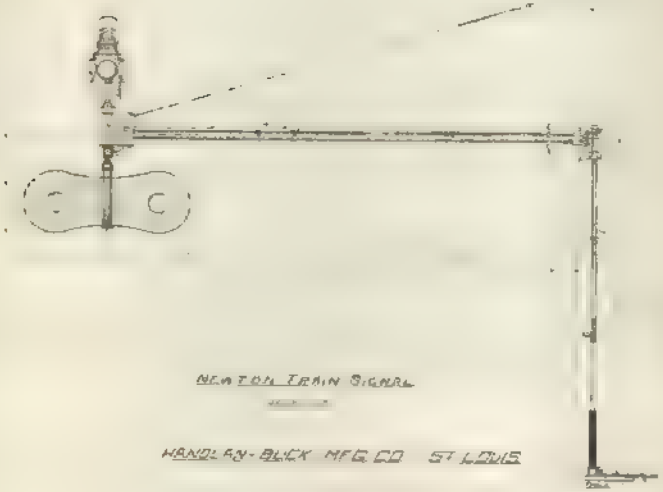
The operator cannot possibly make a mistake. All working parts are carefully and strongly made and fully protected from the action of rain, snow or dust.

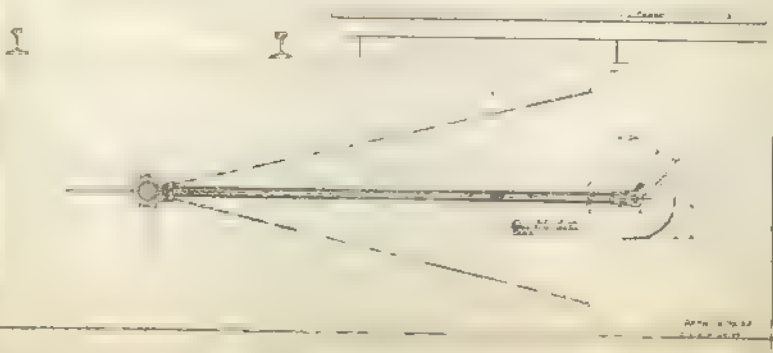
References to roads using the signals and full information furnished upon application.

Special blueprint furnished; see cut next page.

No. 52

Newton's Improved Train Order Signal





Newton Car Replacers

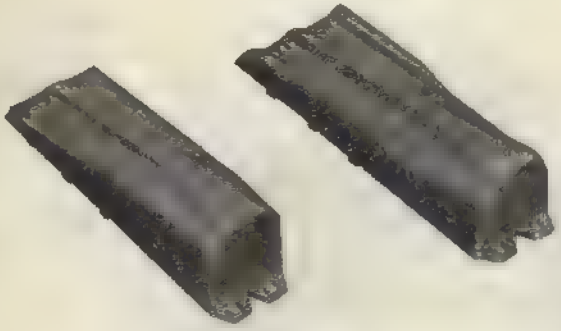


Fig 98
Divided Type

Fig 9
Solid Type

The Newton Car Replacers are made in two types, divided and solid types, therefore protecting the switch point from being bent and the switch thus rendered useless. One of the important features for special attention is the grooved design of the inside replacer, which protects the flange of the wheel by allowing the tread to first engage the replacer while mounting

The undivided type weighs 175 pounds per pair; the divided type weighs 220 pounds per pair

Fewing's Car Replacers

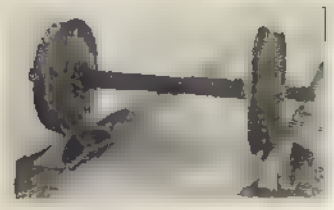

Fig 100

Fewing's frogs are light enough to be handled by one man, they are guaranteed to carry the weight of any locomotive.

60-pound Type, for 60-pound rail and under, weight 125 pounds per pair

A Type, for 85-pound rail and under, weight 186 pounds per pair

B Type, for 100-pound rail and under, weight 225 pounds per pair

High B Type, special for 6-inch rail, weight 234 pounds per pair

Interurban Type, special for 85 pound T rail and under, weight 125 pounds per pair.

The Alexander Car Replacers

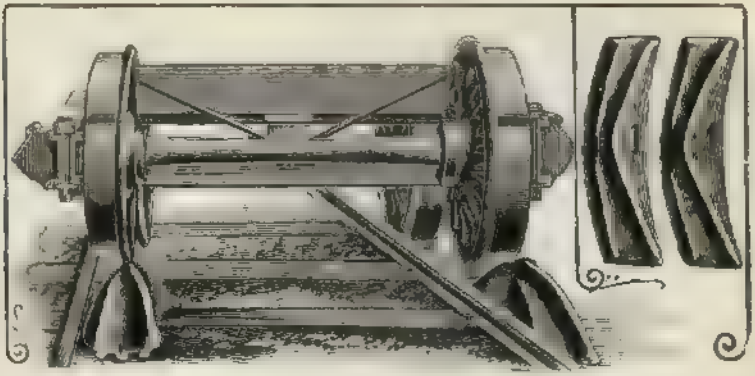

Fig. 101

Fig. 102

No. 1 Replacer, weight 194 pounds per pair, base on rail 5 to 6 inches high ..... per pair $72 00
No. 2 Replacer weight 158 pounds per pair, base on rail 4 to 5 inches high ..... per pair 72 00
No. 3 Replacer made of ¾ inch steel plate for Electric Motors, Mine Engines, Electric Cars and light equipment ..... per pair 56 00
No. 1 Extra Heavy, made of ⅞ inch plate, weight 242 pounds per pair same rail as Standard No. 1 ..... per pair 88 00

DISCOUNT

Snow Car and Locomotive Replacers

Outside Frog

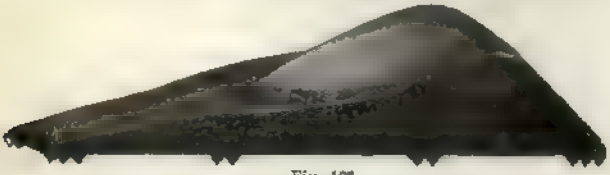

Fig. 103

No. 1A. Made of Basic Open Hearth Steel weight 235 pounds per pair, length 36 inches suitable for wreck cars and 90 to 100 pound rails.

Inside Frog

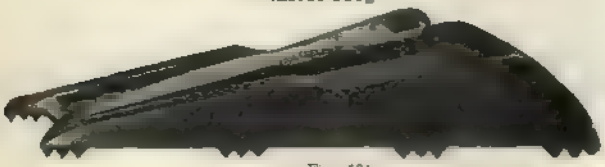

Fig. 104

No. 1. This is our Standard Replacer for general use with heavy engines and cars. Made of Basic Open Hearth Steel; weight 210 pounds per pair; length 36 inches. The Maximum height is at end of replacers, thus reducing the grade by one-half up which wheels must mount in re-railing.

New Haven Clock Co.'s Fine Celebrated Banjo Clocks

Suitable for the tastefully furnished Home, Library or Den. This style of clock has been in demand ever since first brought out by Edward K. Willard over a century ago. Its popularity is not to be wondered at, as the artistic lines of the case and the general scheme of ornamentation leave nothing to be desired by anyone wishing a really beautiful clock. The different patterns especially harmonize with furnishings of the Colonial period and the various sizes permit of their being placed in large or small compartments as may be most appropriate. The finish of the case is in keeping with the high quality of the clocks and the movements used are finely made and are excellent timekeepers.

PRICES EACH

MINATURE BANJO CLOCK

CHIME CLOCKS.

WESTMINSTER CHIMES.

With new three-train movements, chiming each quarter-hour and striking the hours on rods. Fitted with five perfectly tuned rods or the famous Westminster chimes played every fifteen minutes and the hour struck on "Sonora" patented resonated bells. This patented chime mechanism as used in these clocks is the result of much thought and experiment in adopting laws for resonated bells, to limits of space, price and other commercial requirements.

New Style Locomotive Oil Headlight

No. 1531C

18-inch

Satisfactory to those who have adopted it as standard

The style illustrated is designed especially for those who find it necessary to provide a more efficient oil headlight and has been found satisfactory wherever introduced—is a plain pattern with front and side doors, correctly poportioned—made of heavy sheet steel electrically welded and will withstand the shocks and jars incident to modern traffic. Is furnished as in others shown with our standard front glass holder ring, a simple and efficient device enabling quick replacement of broken front glass. The reflector and burner used are features designed especially to produce a sufficient volume of light

New Style Locomotive Oil Headlight

No. 1634

18-inch

Same as shown on opposite page, but equipped with side number frames

To those whose requirements demand a headlight with facilities for displaying engine numbers, and who find themselves interested in selection of suitable pattern to meet the recommendation already set forth, may rely on this style to give perfect satisfaction. Is constructed in the same workmanlike manner—provided with both front and side door, and also embodies the well known angle side number boxes enabling the towerman or others interested to discern the engine number in advance of the time when the locomotive is passing

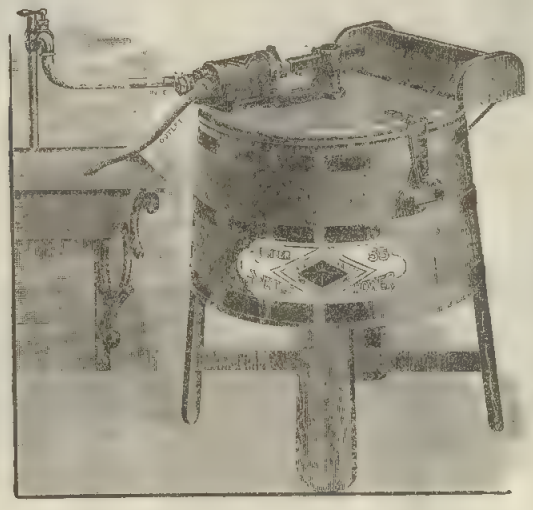
WASHING MACHINES

*NORLEIGH DIAMOND WATER POWER

Runs by Water Power
The Hard Work and Drudgery of Washday are Unknown where this Machine is Used

Connect the Machine to the Faucet; The Water Pressure Does the Work

Do not Forget that there is a Limit to the Quantity of Clothes which Can be Washed at One Time and that, to Secure Perfect Results, the Machine Must Not be Overcrowded.

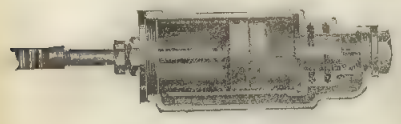


Works to Best Advantage with a Water Pressure of 35 pounds or Over, which Produces 60 Piston Strokes per Minute and 60 Movements of the Agitators; the Machine will Work with 20 pounds Pressure, which will Produce About 50 to 54 Piston Strokes per Minute, this is Sufficient to Wash Shirts or their Equivalent.

Each

No. 55—Inside Dimensions, Diameter at Bottom 22 inches, at Top 20 inches Depth 19¼ inches Height to Top of Tub 29 inches Height Over All 34 inches Length of Wringer Post 44 inches, Tub Frame Has Galvanized Hoops, Hinged Cover, etc., Gold Striped, Motor Finished in Red Enamel; Motor Frame, Black Japanned; Complete with Intake and Discharge Hose, Weight Each 70 Lbs. **$25 00**

One in a Crate



Sectional View of Motor

These Views Give an Idea of the Extreme Simplicity of the Motor; Note the Few Parts and that no Packings, Springs, etc., are Used. Size of Motor 8½x4 inches.

Sectional View of Cylinder

By the Scientific Application of the Pressure, Greater Power is Developed than is Possible with Other Types of Water Motors.

The Motor, which is Very Simple is the Most Powerful Motor for this Purpose; the Motor, Including the Port and All Waterways is a **Solid Bronze Casting** Without Joints and Needs no Packing; Dirty Packing is the Greatest Source of Trouble in other Motors; the Action of the Valve is Automatic; Cylinder Head Screws in Any Desired Tight; the Piston Rod is of Steel Brass, a Double Flange Rubber Cup Entirely Covers the Gears, Preventing Accidents; Extra Heavy Cast Bronze Hose Connections; Broad Cast Iron Motor Base of Unusual Design Gives Added Security to Fastening.

The Tub is Made of Waterproof Long Grained Cypress Wood, Machine Dressed Finish, Varnished, the Inside is Corrugated Around Sides and Bottom Giving a Perfect Rubbing Surface; the Motor being Light in Weight Little Effort is Required to Lift the Cover, the Extension Stave Legs are Strongly Braced and will Never Become Shaky.

WATER MOTORS

Extra Motors for No. 55 Norleigh Diamond Water Power Washing Machine.

Each

No. ND55M Consists of Motor, Shaft, Pin Wheel and Hose; all Ready to Attach to Tub Top **$19 00**

Weight each, 2 lbs.
In bulk.

SKI BINDING.

SPECIAL.

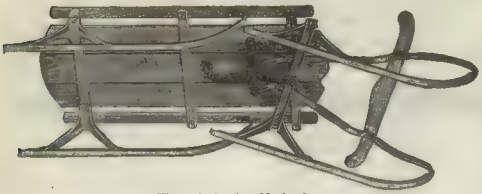
Strongest and most satisfactory. The heavy brass side braces give a rigid and perfect control of the ski at all times. Adjustable to fit any foot from the smallest to the largest.

	Per Pair
No. 2—Ski Binding; complete with straps	$4.00

Weight per pair, 1 lb.

AUTO BOBS.

SHERWOOD.



View of steering Mechanism.

Sherwood Bobs are first to solve the steering problem.

Experience has proven and it has been acknowledged by well known manufacturers that a small sled can not be operated with efficiency or safety. Sherwood Bobs overcome all this difficulty, as the steering device on a small size operates as easily as on the large size.

By adjusting thumb nut to loosen or tighten spring, will allow you to have in one minute a coaster or bobs as desired. Tighten spring for coaster—loosen spring for bobs.

The materials used in the construction of these bobs are the best obtainable. The runners are made of spring steel the knees of pressed steel and the frame and top of straight grained ash.

EXETER DESIGN

ONEIDA COMMUNITY
RELIANCE PLATE

LA ROSE

THE PLATE ON RELIANCE HAS BEEN SUBSTANTIALLY INCREASED

A heavier all over plate plus the thick overlay imparts to Reliance exceptional wearing qualities. It now offers the durability of "triple plate" but at less cost.

Embossed in strong relief, a half circle of roses relieves the plain shield of the La Rose Pattern, and gives a beautiful finish to this design.

LA ROSE DESIGN

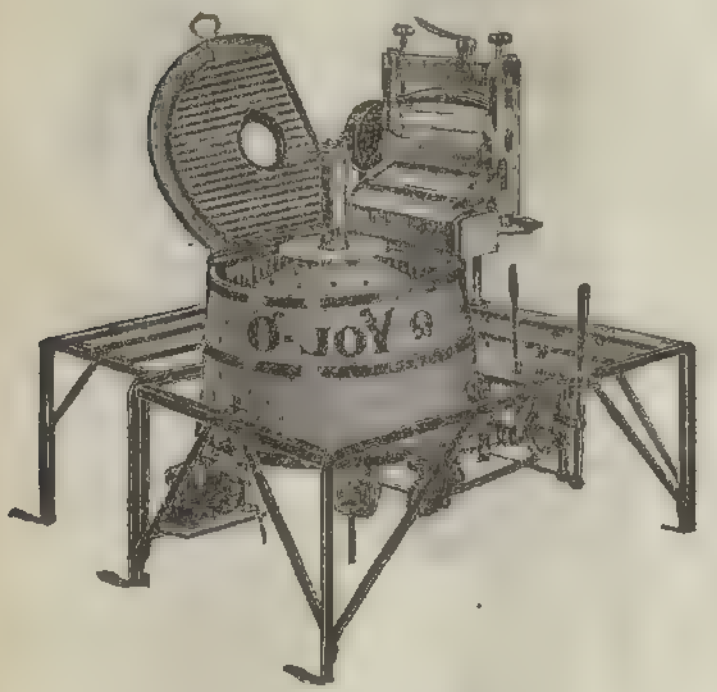
WASHING MACHINES

O-JOY VACUUM

Constructed on the Vacuum principle, having a Vacuum Agitator with an up and down movement which positively will not tear or injure the finest fabrics. It will thoroughly cleanse in less time than the old method. Agitator heavily galvanized metal and indestructible—Easy Running, Fast Washing and is a complete Power Laundry on a small scale.

Platform and Frame—Angle Steel, strongly supported; the left or supplementary half being removable for space saving between wash days. Hardwood Platform strips bolted to Frame. Platform arranged to support wash basket and two wash tubs. Platform and all metal parts Green Enameled.

Washing Tub—Solidly mounted on end of main platform. Select Southern Louisiana Red Cypress; double reinforced corrugated lid and corrugated sides and bottom; bound with three flat, iron hoops; inside dimensions—13¾ inches deep; 20¾ inches in diameter at top; 23 inches in diameter at bottom. Natural Wood Finish and Varnished.



ELECTRIC

Note—When ordering state whether for Direct or Alternating Current; if for Direct current state whether for 110 or 220 Volts. When wanted for Alternating current state the Voltage, Cycle and Phase.

Complete with ¼ H. P. Motor, round belt, 10 ft. brewery cord with switch connection on tub and plug connection for incandescent lamp socket.

	Each
✣No. OJE—Weight Crated 260 lbs.	$95.00

One in a Crate

WASHING MACHINES

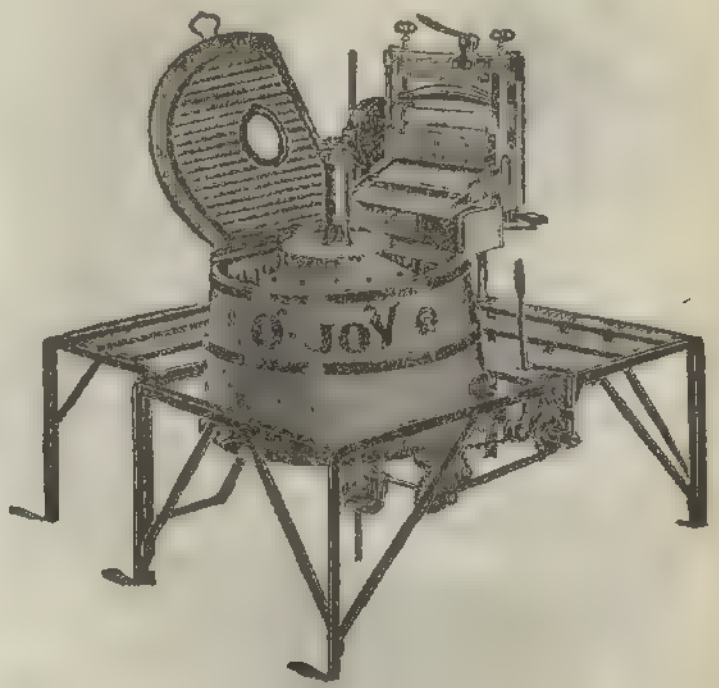
O-JOY VACUUM

Capacity—From eight to ten shirts or the equivalent of from three to four full size sheets.

Wringer—Power driven; reversible at will and can be swung and locked in any desired position; Rollers made of guaranteed high grade rubber 11x1¾ in; enclosed gears; quick lever release affording instant release should anything be caught or clogged between them.

Dimensions—Entire machine set up in working order, length over all 47½ inches; Width 49 inches; Height of Frame 21½ inches. With supplementary platform removed, 47¼x34 inches.

Guarantee—Guaranteed against defective material or faulty construction for one year. This guarantee does not cover carelessness in handling, injury due to lack of lubrication or ordinary wear or tear.



BELT POWER (GASOLINE)

Note—When ordering, state the speed of engine or shaft and give size of driver pulley so we can equip washer with proper size pulley to give it the correct speed of 120 R. P. M.

Complete with all necessary pulleys, etc., but belt is not included.

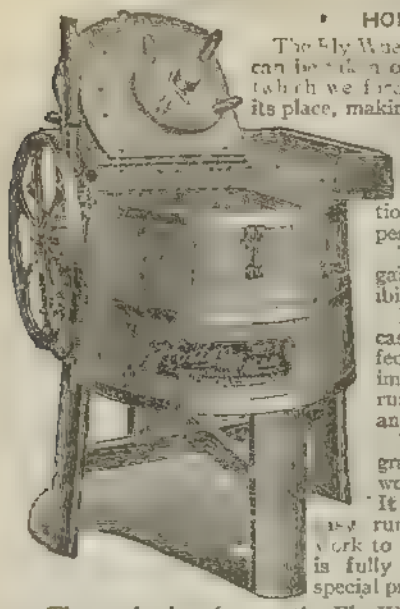
WASHING MACHINES

HORTON MIRACLE



The Fly Wheel on the regular Miracle Washer can be taken off and a Pulley Wheel (which we furnish at small cost) can be put in its place, making a Gasoline Engine Power Machine. And the belt need not be removed each time lid is opened.

The operating lever can be placed in either one or two positions convenient for a short or tall person, adult or child.

The dolly post is guarded by a galvanized cup, eliminating all possibility of tearing clothes.

Driving gears are **cut** instead of cast, causing the teeth to mesh perfectly and reduces friction to a minimum. It also makes the machine run much easier, perfectly noiseless, and it will wear much longer.

The tub is made of the highest grade Louisiana Red Cypress (the wood eternal), thoroughly seasoned. It is made larger on account of the new running mechanism, enabling the work to be done much more quickly. It is fully corrugated on the inside by a special process to avoid splinters.

The mechanism (except the Fly Wheel) is gold bronzed. The Fly Wheel and Hoops are green enameled. The tub has three coats of coach varnish and the name is on a beautiful Decalcomania Transfer. These combinations give the entire machine the appearance of parlor furniture.

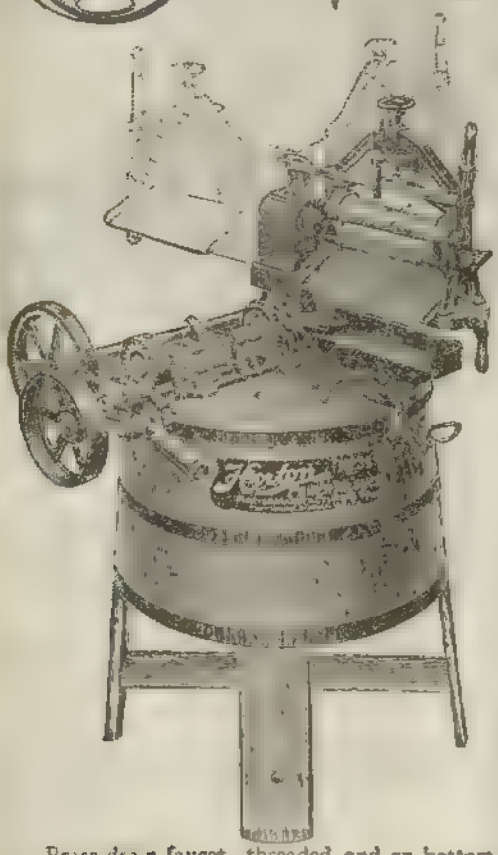
POWER PULLEYS

Each

Extra Power Pulleys for No. HM22 Washing Machines **$2 00**

Loose.



HORTON POWER

A combined washing and wringing machine.

All driving gears are cut instead of just cast, reducing friction to a minimum and making it noiseless in operation. All exposed gears are covered to prevent accident.

No tight or loose pulleys required as the pulley wheel stays in position when lid is opened.

By having a **FLY WHEEL** on hand, which interchanges with the pulley wheel, the machine and wringer can be operated by hand.

Equipped with a special two-roll reversible ball bearing wringer and has a patented device to prevent injury. A simple movement of the hand swings the wringer from one position to another to enable wringing between tubs and basket.

Hardwood Dolly with four extra large pegs and guarded post. Clothes cannot tear.

Brass drain faucet, threaded and on bottom of tub: The tub is made of Louisiana Red Cypress, natural finish; Ball Bearing Wringer; Rolls, 1¾x10 inches, guaranteed five years. Each

No. 31—Power; For any Kind of Belt Power; Weight 175 lbs. **$50.00**

PACKARD TRUCKS

Hauling economy! In building state roads Packard trucks serve and save.

Highway transportation has suddenly assumed vital importance in American business and American war preparations.

To relieve the overburdened railroads and move the vast bulk of war-time freight, federal, state and county governments are co-operating with business men in developing a new and more efficient road hauling.

Where good roads lead, the best motor-trucks can move all but heavy, low-cost materials and products faster and cheaper than the railroads can.

In providing such roads, New York State has pioneered the way. And in building them, the New York Commission of Highways has recognized the economy and dependability of Packard trucks.

Silent, chainless units in seven *right* sizes—all with four-speed transmission. Write Packard Motor Car Co., Detroit. *Ask the man who owns one.*

Packard

PACKARD TRUCKS

Double duty! The more work the larger the economy of Packard trucks

"In spite of constant use for five years—averaging seventy miles a day—our two-ton Packard truck is still in very good condition," says Supt. J. O. Stutsman of the Municipal Farm of Kansas City, Missouri.

"In addition to transporting inmates from the courts to the farm, all its spare time is employed in carrying supplies used on the farm and in delivering the vegetables we raise to the various city institutions. It also carries the farm officers to and from the car lines in the morning and evening.

"Summing up our experience of this advance in economy and municipal service, I believe that it would be impossible to do the same work so advantageously with several teams."

Seven *economical* sizes in silent, chainless trucks—all with four-speed transmission. Phone the dealer in your city or write to Packard Motor Car Co., Detroit. *Ask the man who owns one.*

LAWN MOWERS

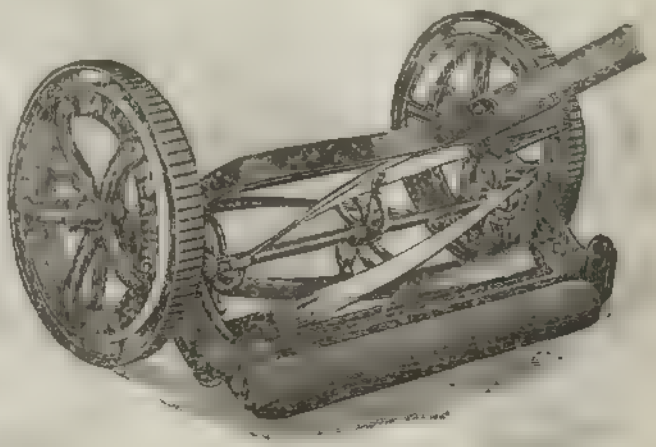
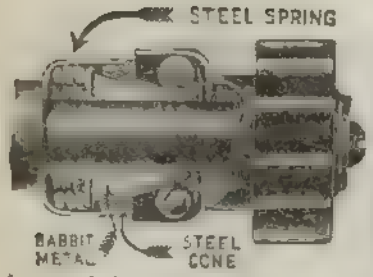
*BLUEBELL—BALL-BEARING

Bed Plate Adjustment





Automatic Ball Bearing Adjustment.

Automatic Ball Bearing Adjustment—This is the Most Important Invention of Recent Years in Lawn Mower Construction. It consists of a Case Hardened Steel Spring Working Against a Collapsible Babbit Sleeve Around the Shaft and Inside Case. At the Instant all Looseness is Taken up the Sleeve Collapses on the Shaft, thus Preventing any Further Pressure than is Required for the Most Delicate Adjustment, so that the Reel will Always Revolve Freely Throughout the Life of the Mower this Adjustment Continues to Accomodate Itself to Conditions Keeping the Bearings Always Needle Adjusted without the Slightest Attention from the Operator. No Mechanism Depending on the Screw or Touch Can by any Possibility be so Nicely Adjusted. In fact, Devices for Hand Adjustment Often Burn the Ruin of Good Mowers by Those who Do Not Understand. While the Patented Device We Use Automatically Adjusts, it is Completely Enclosed so that an Ignorant Operator Can Not Get at it even though He Tries to do so. No Screws to Lose Out. Always Ready for Service.

Bed Plate Adjustment

*MOUND CITY—BALL BEARING

High Wheel; Four Blade Reel

Finish; Gold and Aluminum Bronze, Trimmed in Light Green, Handle and Roller Shellaced and Varnished.

This Mower is Most Graceful in Outline, Very Light and Easy Running. Careful Workmanship Throughout and all Materials are of Best Grade. Refined Cast Iron Wheels, Side Plates, Pinions and Cutter Bar, Strongly Braced and Reinforced. A 9-16 inch Reel Shaft and ⅝ inch Shrub Rod of Machinery Steel Rolled within .001 of an inch True to Size. The Drive Wheels are Accurately Milled to Fit the Shrub Rod which Passes Through the Side Plates, Forming an Axle for the Wheels. This Feature Permits the Wheels to Revolve Quite Freely.

Machined "Bosses" on the Side Plates Fit Tightly into Recesses in the Cutter Bar which Produces a Very Strong Frame Construction at this Point.

Wide, Deep Cut Teeth on the Inside of the Pinions with Double Lipped, Flat and Durable Tempered Pawls Form a Secure and Easy Operating Ratchet.

The Handle is of Straight Grained Hardwood and is Fastened to the Handle Grip by Means of Two Malleable Iron Brackets and a Joint Bolt.

All Ball Bearing Parts are of Good Quality, the Cones Having an Extremely Deep Case Hardening. An Absolutely Perfect Cylinder is Maintained in the Construction and Grinding of the Reel, so that it Turns Freely in its Bearings, thus Requiring Less Exertion to Operate and also Touches Evenly on the Stationary Knife, Insuring a Smooth Cut Lawn.

Four Cutting Knives of Crucible Steel, Oil Tempered, Self Sharpening and Ground Under Running Water.

Drive Wheels 9 inches; Diameter of Reel 5¾ inches; Adjustable to Cut Grass to Lengths of ¾ to 1¾ inches. Cuts Grass Standing 5 to 6 inches High.

Width of Cut, Inches..	12	14	16	18

Weight Boxed, Lbs.....	43	46	49	52
Each.....	$10.50	11.00	11.70	12.00

Drive Wheels, Side Plates and Cutter Bar Castings of the Best Quality Gray Iron. Reel Braces are Malleable Iron Perfectly Fitted and Riveted to Steel Reel Shaft, Making Most Rigid Reel Possible to Build. Roller Bracket is of Malleable Iron Eliminating the Possibility of Breakage.

Cutter Bar Blade and Reel Blades of first Quality Steel—the Best that Money can Buy. All Blades are Oil-Tempered, Self-Sharpening and Ground Under Running Water.

Ball Bearing Parts are of the Highest Quality, the Cones having a Deep Case-Hardening and are Guaranteed never to Show the Slightest Wear.

Our Bluebell Mower is Equipped with our Automatic Ball Bearing Device which is considered the Greatest Improvement in Lawn Mower Construction during the past Ten Years. This Automatic Arrangement Holds the Reel in Perfect Alignment at all times and the Operator Has no Trouble Whatever in Keeping the Mower in Perfect Adjustment.

Handle and Roller are of Straight Grained Hard Wood, Highly Lacquered and Varnished.

Wide Deep tooth pinions work with Tempered Steel pawls making a **Ratchet that is Easy to Operate and Most Durable. Geared on Both Sides.**

All Parts are Carefully Machined and fitted. Wheels Revolve on Steel Bearings. This Mower is Guaranteed to Give Perfect Satisfaction.

Drive Wheels 10½ inches in diameter; Reel 6 inches in diameter with Four Revolving Cutters; Adjustable to Cut Grass to Lengths of 5-16 to 1½ inch. Cuts grass standing 7 inches high.

Handsomely Finished in Blue and Gold.

THE PEERLESS ELECTRIC HOME LAUNDRY MACHINE

The Most Serviceable, Most Satisfactory and RELIABLE ELECTRIC MACHINE ON THE MARKET.

Especially low-priced by us—within the reach of all

By Purchasing an Electric and dispensing with services of Washerwoman, cost is met within a period of one half year

Electric Home Laundry Machine

THE ELECTRIC WASHER is made primarily for the up-to-date woman—the housewife who wishes to be a real help-mate. It saves her and her family money—wearing apparel—and what is more important to the busy head of the household—time. It matters not if the home be large or small, this **Automatic, Electric Home Laundry Machine** creates a distinct saving that is quickly noticeable. It is certainly an aid in keeping good servants in the large home, which is a point much desired. In the small home it eliminates entirely the extra cost of wash-day help, or excessive laundry charges. Most important of all, it washes the clothes perfectly clean and does not damage them in any manner. Especially will the woman who has been paying all the way from fifty cents to three dollars per week for extra wash-day help, or in laundry charges, appreciate the saving effected by the use of this Electric Washer. This saving in money is, of course, of even greater moment in the small household than it is in the large one and it is easy indeed, to understand that such saving in actual money is great enough to pay the initial cost of one of these machines, in less than a year's time.

Economical

Model A Electric Washer—No Extension
Model B Electric Washer—With One Extension
Model C Electric Washer—With Two Extensions

This is the "Peerless" Electric (Model C) No. 3504, with two Steel Extensions for holding extra tubs for rinsing. When extensions are not in use it is folded flat and is entirely out of the way.

No. 3502	Model A Electric Washer (No Extension). Each	...$119 00
No. 3503	Model B Electric Washer, with One Extension. Each.. .	122 75
No 3504	Model C Electric Washer, with Two Extensions, as illustrated Each . . .	.. 128 50

In order to insure prompt shipment, SPECIFY CURRENT, VOLTAGE, and CYCLES.

Facts About The Peerless

THE STEEL EXTENSION for holding extra tub is hinged to the side of the frame and provides a substantial support for the tub. When not in use this extension is folded close against frame and is entirely out of the way. The complete machine then occupies no more space than the ordinary one-tub electric. The extension is optional, that is, it can be supplied with the machine, if desired, at a slight extra price or it will be omitted altogether.

BALL BEARING WRINGER. The wringer furnished is of the highest grade obtainable, nicely finished and fitted with ball bearings. The rubber used in the rolls is not scrap rubber such as is used in many cheap wringers, but is of the very best quality and with proper care will give years of satisfactory service. This wringer is fitted with a new and patented device convenient to the hand which allows the rolls to be relieved of all pressure instantly, as is sometimes necessary, should the operator carelessly catch her fingers, or if for any other reason it is desired to relieve the rolls of pressure quickly. The wringer is connected with the motor by means of a quiet, smooth running belt, which is crossed, as shown in the illustration, in order to get the most secure grip on the pulleys. A simple, easily operated lever handle at the side of the tub controls this wringer so that it is started, stopped or reversed instantly, at the will of the operator

COST OF OPERATION. In operation this Washing Machine is simple in the extreme. After connecting the extension cord to an ordinary electric light socket the agitator is started by pulling towards you the lever handle nearest to the front of the machine. The wringer is started by pushing the lever nearest to the wringer towards the back of the machine, and is instantly reversed by pulling this same lever towards the front of the tub as far as it will go. The cost of operation is very light—less than two cents per hour for electrical current consumed. As the average family washing can be finished complete in from two to three hours time the total cost for electricity will never be more than ten cents per week.

IN CONSTRUCTION AND FINISH this machine is unexcelled. It is very simple and all the mechanism is perfectly fitted and very strong. With proper care the "Peerless" Electric Home Laundry Machine will last for many years. The tub is made of selected Southern Cypress—"the wood everlasting"—is well built and is finely finished with good quality varnish. All of the mechanism and gearing as well as the motor is placed underneath the tub on a rigid steel frame. All metal parts are sherrardized. This finish is much more attractive than paint and as it will not peel or check, will last for a life time and effectually prevent rust

THE FRAME OR STANDARD is made of angle steel, the different pieces being securely riveted to each other, forming an exceedingly strong and rigid frame, which at the same time is not heavy nor cumbersome. The entire frame has sherrardized non-rust finish and is mounted on strong steel castors, which allows the machine to be readily moved from place to place.

AN EXTRA DRAIN BOARD is supplied, if desired, at a small additional charge. It is in addition to the regular drain board supplied with wringer and is used when wringing clothes across the machine from the rinsing water to the bluing water, and from the latter to the clothes basket.

THE MOTOR. The electric motor is of ample strength to run the wringer and washing machine at the same time. It is the best motor manufactured today and is built in accordance with our specifications for use on the "Peerless" Washer. All of these Electric Machines are regularly equipped with motor for use on alternating current, 110 volt, 60 cycle electric systems, as these specifications are proper for practically all the electric light systems today. The "Peerless" Machine can be furnished, however, with motors for use on any odd voltage or odd cycle systems. In order that the proper motor shall always be sent, we request that orders for electric machines specify current, voltage and cycles

THE PEERLESS HIGH SPEED WATER MOTOR WASHING MACHINE

$36.90 SAVES TIME, STRENGTH AND NERVES, ALWAYS READY **$36.90**

Washes Clothes White as Snow, Reliable and Willing

Just Attach Hose — Turn on Water — That's All

DESCRIPTION

THE MOTOR. The "Peerless" water motor is gearless. This prevents noise and lost motion and insures the easy running qualities that are absolutely necessary in a motor that will operate, as does this one, on a very low water pressure. It has no frictional parts; it is self-draining and non-freezing; requires no oiling; will not wear, rust or stick. The bearings are non-metal

THE TUB. The tub is well built of highly finished, selected cypress and will hold fifteen gallons of water. If given reasonable care, it will not warp or shrink.

THE ADVANTAGES. The "Peerless" water motor washing machine is the greatest labor saving device for womankind that has ever been invented. The motor does all of the work. You do nothing except filling and re-filling the tub until the washing is completed. All drudgery is eliminated on wash day with the families blessed with our "Peerless" water motor washer.

The "Peerless" Water Motor Washing Machine, adapted to low pressure, no gears, no spring, no complications.

No. 3501 Peerless High Speed Hand Power Washing Machine **$27.40**

Facts About The Peerless Ball Bearing—High Speed Washing Machine

In the construction of the "Peerless" Ball Bearing High Speed Washing Machine we have embodied every possible convenience and advantage that mechanical ingenuity and skill can produce in a high-class washing machine.

During our forty years' experience in the manufacture of highest quality family sewing machines, with which the whole world is now familiar, we have established an enviable reputation. This same skill and ingenuity—this invaluable experience of two score years, has enabled us to produce the "Peerless" Washer—a machine that stands at the head of all strictly first-class, high speed washers.

All metal parts are finished with the electro galvanizing process—it is an attractive finish that will not wear and cannot rust

The "Peerless" Washing Machine runs so easily that a mere child can operate it.

The "Peerless" Washing Machine is guaranteed against defective workmanship and material for a period of five years.

The tub is strongly built of well finished, select material—with reasonable care it will last for years.

The ball bearing is a simple and most effective device. It is absolutely the easiest running bearing that can be made, and is so constructed that it will wear for years without oiling or adjustment.

The compound lever construction in connection with the Walking Beam and the exclusive ball bearing gives the "Peerless" such a decided advantage that it requires but one-half the labor to operate it that is necessary with other makes.

This type, namely the high speed washer with balance wheel, has proved to be the most practical and easiest running washing machine devised. The improvements we have embodied in the "Peerless" Washer, place it in the van of all machines of this particular type.

The washing machine is recognized as a necessary equipment in the small homes This is evidenced by the following article which we quote from the "Ladies' Home Journal," issue of February 15, 1911:

"If the washing machine is a luxury, why put it in the small house? The answer is: A washing machine is no longer considered a luxury, where actual economy is practiced—economy of wear, of tear, time and labor. As a matter of fact a washing machine which may cost no more than a sewing machine, and is quite as useful, is of more moment in the small house than it is in the large house, for economy is more vital in the former. It will minimize labor, expenditure, and maximise convenience. With a good washing machine one can do one's own washing and need not depend on a washer woman. Hand scrubbing cannot compete with it."

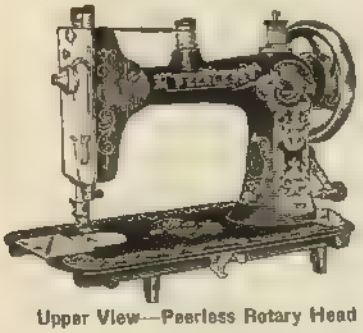
THE RELIABLE IMPROVED PEERLESS SEWING MACHINES

Only the Best Materials and Most Skilled Workmanship Enter into These Machines

Almost any machine may present an attractive outward appearance, but the real test is in the service given by constant every day use. The machine with defective material or inferior workmanship soon tries the patience of the operator, while the machine made of reliable and tested material by the skilled hands of mechanics who are experts in this particular line, is a constant source of joy and satisfaction to the operator.

DESCRIPTION OF THE IMPROVED PEERLESS ROTARY

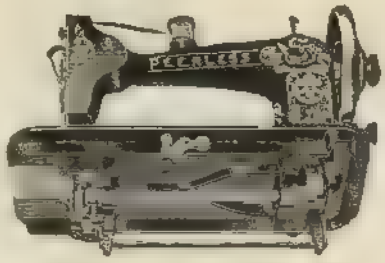
WITH AUTOMATIC TENSION



Upper View—Peerless Rotary Head

In one vital point the Improved Peerless Rotary towers head and shoulders over other machines of similar construction. That point is the truly wonderful automatic tension which adjusts itself automatically to any kind and size of thread without any attention whatsoever from the user. This means the certain absence of the tension troubles common to the ordinary machine—it means a perfect and even stitch at all times and on all classes of goods. The Improved Rotary is the only machine of its type having this invaluable improvement.

The Improved Peerless Rotary, as its name indicates, embodies the rotating principle of construction throughout. It makes the double-lock stitch but unlike sewing machines, the lower stitch-forming mechanism has a continuous rotary motion which is entirely free from the vibration of reciprocating machines. By reason of this it may be run at a general higher and runs one-third faster, thereby saving just that much time for the operator. The high arm head is handsomely finished, the surface being covered with three coats of brilliant black enamel, ornamented with beautiful imported decalcomania.



Under View—Peerless Rotary Head

The double four-motion feed is positive in its action and can be instantly adjusted for any desired length of stitch. The hook, which performs the function of a shuttle, rotates on the outer side of the steel chamber containing bobbin and case, the thread being drawn off once in every revolution to form the stitch. The stitch forming mechanism is so arranged that it is absolutely impossible for the machine to clog, an annoying complaint experienced by users of other sewing machines of similar construction. Another splendid feature is the ease with which the bobbin may be removed and replaced from above by opening the large hinged plate, which allows ample room for the insertion of one's hand for the desired purpose. In this particular respect, as in many others, the Improved Peerless Rotary is in a class by itself.

In finish, in style, in equipment, in labor saving conveniences, in wide range of work, in easy running and perfect stitching qualities, in efficiency and in durability the Improved Peerless Rotary has no rival. A trial will convince you such is the case.

THE MANUFACTURERS' BINDING WARRANTY ON ALL OUR PEERLESS SEWING MACHINES AFFORDS YOU ABSOLUTE PROTECTION

Should any part prove defective or even anything go wrong, the manufacturers will positively make good free of charge during the long period of 10 years (the life of GUARANTEE).

THE PEERLESS ROTARY CABINET MACHINE

The Highest Grade Cabinet Machine on the Market Today

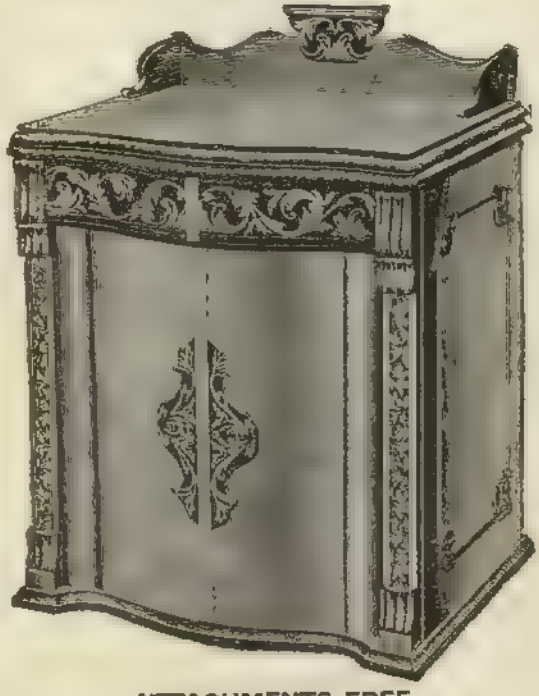
Of extraordinary merit, every late improvement, every time and labor saving feature, we offer rare value in this positively highest grade cabinet machine.

Finished in Rich Golden Oak

DESCRIPTION OF CABINET

The Boudoir Cabinet is typical of the highest achievement of the wood craftsman's art. The design is most artistic indeed, and as the wood utilized in the construction is selected quarter-sawed oak, which is treated with our special mirror finish, the cabinet is in keeping with the luxurious furnishings of the modern home. Graceful columned corners and exquisitely grained panels in the side and door complete the general effect of quality and luxury.

All Orders Filled Same Day Received—No Delay



DESCRIPTION OF CABINET

Our double lever device raises the sewing head automatically to position. The stand mechanism is enclosed in the dust-proof box and when the paneled door is opened, is immediately accessible for use. A commodious drawer attached to the inner side of the door affords ample room for the steel foot attachments.

Read Description of the Improved Peerless Rotary above

ATTACHMENTS FREE

With each machine there is supplied entirely free of charge a full and complete set of steel foot attachments packed in a well finished, highly polished, velvet lined metal box. The following pieces are included in the set: Ruffler, tucker, binder, braider, under brailer, four hemmers of different widths, feller, shirring slide, cloth guide, four bobbins, six needles, two screw drivers, filled oil can and well illustrated book of directions.

FLOOR SCRAPERS

One Man Can Scrape on an Average of 1000 to 1200 Square Feet of any Kind of Hardwood in a Day of 8 Hours.

★*Diamond Edge*

This Scraper is intended for use on Large Surfaces. The Knife Scrapes the Floor when the machine is drawn toward the Operator. Has **Adjustable Cross Handle** which allows the Operator to Work up to the Wall and into the Corners. When the Machine is in operation about 85% of the Weight is resting on the Blade; when not in operation the Weight is so perfectly Balanced on the Wheels that the Blade is clear of the Floor.

The Frame is carried on Two Rubber Tired Wheels working independently of each other. Knife is firmly Clamped in the Scraper, which, together with the weight of the Machine, nearly all of which rests on the Knife, prevents Vibration or Chatter, doing away with all Wavy effects on the Floor.

Very Strong and Durable, Cast Iron Frame; Aluminum Finish, Forged Steel Handle Braces; Varnished Hardwood Handle and Grip, Tempered and Honed Steel Blades.

Complete with One Curved Scraper Blade; Two Straight Scraper Blades; one No. 2 Burnisher; one DE25 Hand Scraper; one DE20 Wrench; One DE 8-inch Mill File, One DE5 Oil Stone.

Each

No. DEL200—Width of Cut 6 inches; Diameter of Wheels 5 inches; Size of Handle Braces ⅞x¼ inches; Length of Handle 38 inches, Length over All 57 inches. Weight Complete 95 lbs. **$23 00**

One in a Case.

EXTRA BLADES FOR *Diamond Edge* FLOOR SCRAPERS

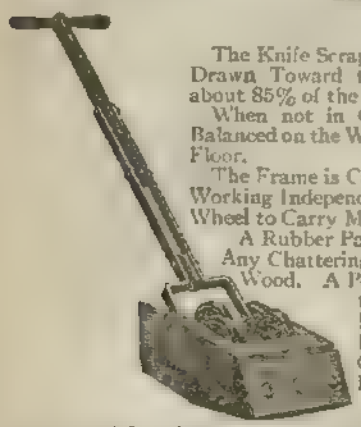
Per Dozen

No. DE1200CB—Curved Blades Size 6x2½ inches; Weight per Dozen 2¼ lbs. **$3 50**

No. DE1200SB—Straight Blades; Size 6x2¼ inches, Weight per Dozen 2¼ lbs. **6 00**

Loose

FOX



The Knife Scrapes the Floor when the Machine is Drawn Toward the Operator. When in Operation about 85% of the Weight is Resting on the Blade. When not in Operation the Weight is Perfectly Balanced on the Wheels, with the Blade Clear of the Floor.

The Frame is Carried on Two Rubber Tired Wheels, Working Independently of Each Other, and a Third Wheel to Carry Machine on Back Stroke.

A Rubber Pad Just Back of the Blade Eliminates Any Chattering When Working Out the Grain of Wood. A Polishing Knife is Furnished to Take the Place of a Sanding Device. This Knife Leaves a Finer Finish on the Floor, and Brings Out the Natural Grain of the Wood. It Permits of Faster and Better Work than Could be Done with a Sander;

Japanned Cast Iron Frame; Steel Fender; Forged Steel Handle Braces; Hardwood Handle and Grip, Rubber Tired Rollers; Tempered and Honed Tool Steel Blades.

Each

No. F—Width of Cut 8⅜ inches; Diameter of Wheels 7 inches; Size of Handle Braces 1¼x¼ inch; Length of Handle 40 inches; Length Over All 57 inches; with 4 Cutting Knives, 3 Roughing Knives, 1 Polishing Knife, an Oil Stone, a Filing Clamp, Burnishing Tool, Mill File and Wrench; Weight 94 lbs. **$33.00**

One in a Case. Plus.

No. EF8—Extra Blades for No. F. Fox Floor Scrapers. Eight Blades in a Set; Weight per Set 1½ lbs. **$6 50**

Loose

FLOOR SCRAPERS

LITTLE GIANT

The Knife Scrapes the Floor when the Machine is Drawn Toward the Operator. A Shaving about 2 inches Wide and 6 Feet Long is Removed with Each Stroke. The Knife Projects Beyond the Front of the Machine and will Scrape Right Up to the Base-Board.

Japanned Cast Iron Frame; Natural Finish Hardwood Handle; Rubber Tired Rollers; Tempered, Honed and Polished Tool Steel Blades, with Convex Cutting Edge.

Each

No. 2—Width of Cut 7⅝ inches; Diameter of Large Roller 8½ inches; of Small Roller 2⅝ inches; Length of Handle 37¾ inches; Length Over All 56 inches; Complete with 6 Knives, Wrench, Burnishing Tool and Oil Stone; Weight Each about 105 lbs **$60 00**

One in a Case

Per Set

No. EG6—Extra Blades for No. 2 Little Giant Floor Scraper; Six Blades in a Set; Weight per Set 1 lb. **$7 00**

Loose.

FOX

The Scraper is Balanced so that the Weight is Over the Blade, where it should be when Scraping, and cannot get out of Balance. The Wheels are set in so that the Knife will Cut Close up to Baseboards and into Corners. A Rubber Pad is Placed over the Blade which Prevents chattering or leaving waves, and protects the Blade and Flooring when going over Rough or Knotty Places. Frame carried on two Rubber Like Wheels working independently of each other. Adjustable Handle.

Very Strong and Durable Cast Iron Frame, Painted Red; Forged Steel Handle Braces. Will Work Well on all Hardwood Flooring and is well Adapted for Scraping Floors.

Each

No. F4—Width of cut 6 inches; Diameter of Wheels 4½ inches; Size of Handle Braces ⅞x¼ inches; Length of Handle 38 inches; Length Over All 57 inches; 6 Regular Cutting Knives, Size 5½x1¼x.1 Honed Polishing Steel, 1 Wrench, 1 File and 1 Filing Block, 1 Form for Holding Blades when Resharpening; Weight Each about 90 lbs. **$37 00**

One in a Case

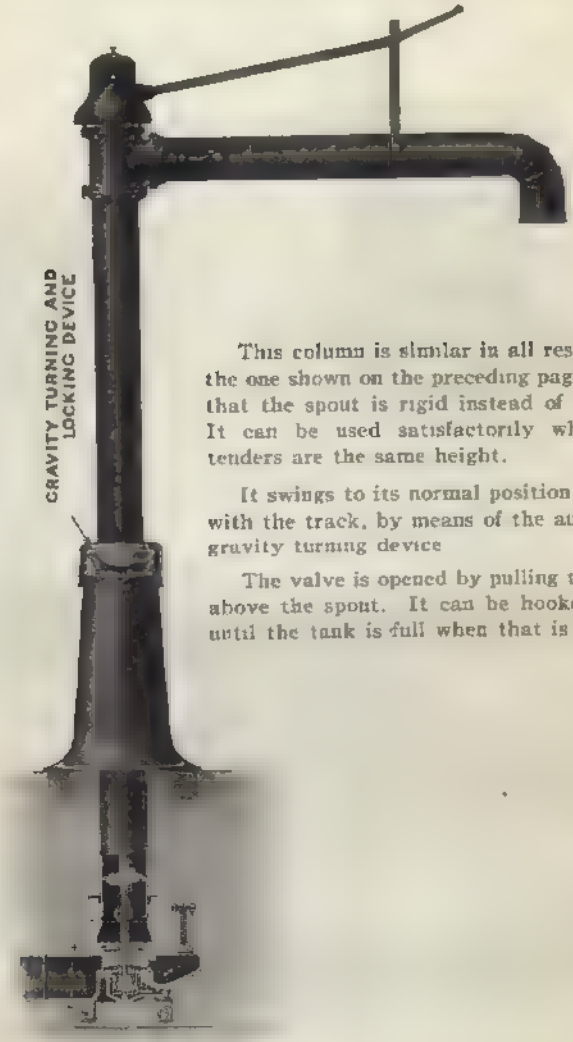
Poage Style "H" Automatic Water Column with Rigid Spout



This column is similar in all respects to the one shown on the preceding page except that the spout is rigid instead of flexible It can be used satisfactorily where all tenders are the same height.

It swings to its normal position parallel with the track, by means of the automatic gravity turning device

The valve is opened by pulling the lever above the spout. It can be hooked down until the tank is full when that is desired.

Fig. 41

Write for Prices

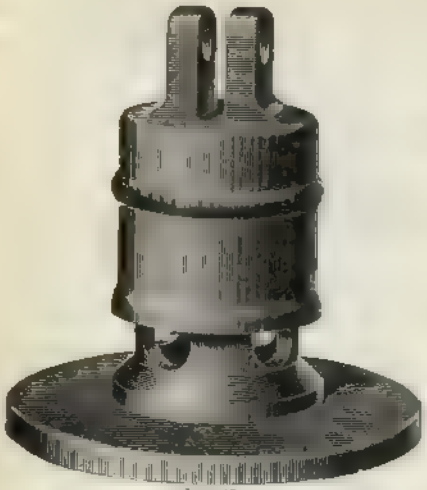


Fig. 42

Cotter Tank Valve

For Locomotive Tenders

Possesses the following advantages over the old-style four-wing valve

First. It has its advantages as to time of labor saved

Second. It will give perfect service in all kinds of weather

Third. Its seat is on an angle so as to protect it from any obstruction, having an angle of 45 degrees, and nothing can remain on its seat

Fourth. No hanging of tank valve; no leakage when off

Fifth. It is simple and durable in service, and will give greater satisfaction than any up-to-date improvement of the old-style four-wing valve

Sixth. This valve can be placed on the new goose necks with very little expense to the railroad companies

Seventh. No changes to be made in the fittings now in use on locomotives. This valve is to be placed on the inside of tank

Price . . . . . each $7.50

Cotter Tank Valve

For Water Tanks, Settling Basins, City Water Works, etc.

One Pair in Box

Per Dozen

Extra Keys No. BK. **$4 50**

Loose

TOWER'S ADJUSTABLE DOUBLE LOCK WITH PATENT LOCK

The Patent Stop Prevents Locking by Effort of the Prisoner or by Accident, before the Handcuffs are Closed on the Limb. When in use, the Forward End of the Stop Projects Above the Surface of the Bow, and while Allowing the Bow to Enter the Lock Socket Until the Bolt has Passed into the Notches, Will Not Permit the Shackle to Lock on the Limb of a Prisoner, a Slight Pressure on the Stop with the Finger Over it When Ready to Lock—Depresses it Even with the Surface of the Bow, Which Then Passes Through and is Self Locked; Weight 18 ozs. with Key. Per Pair

No. 2—Polished Steel **$7 00**

No. 2N—Nickel Plated Steel **8 00**

One Pair in a Box

Per Dozen

Extra Keys No. TK **$4 50**

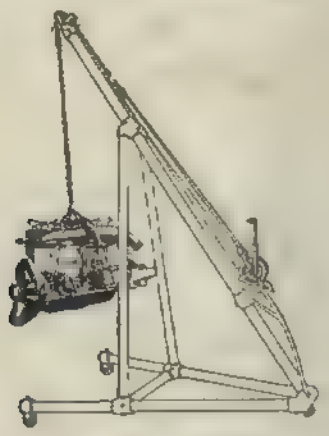
PORTABLE FLOOR CRANES OR HOISTS

PULL-U-OUT



This crane is built of 2½ in., extra heavy steel tubing, enameled black and shaped so the weight can not tip it over. Base is 3 ft. 3 in. wide and 6 ft. deep. Total height 10 ft.

Equipped with Pull-U-Out No. 1 this crane weighs but 250 lbs., yet it lifts a ton 9½ ft.

One man handles it easily, lifting anything up to ton weight. If desired, the Pull-U-Out can be detached and used separately for all kinds of hoisting and pulling.

Shipped ready to put together. All connections are slip-joints. Can be knocked down or set up in three minutes with only a small S-wrench.

No. 1P—Pull-U-Out—(Including Pull-U-Out Hoist).....Each $100.00

CANTON

Stiffest possible construction, a combination of cast iron and steel.

Has Roller Bearing Wheels.

Has Guaranteed-Hand-Forged-Tested-Chain.

No. 7 Portable Rail Saw

Hand Power

Fig. 15.2

This machine is designed for cutting off rails at any angle with their length. The saw blade begins cutting in the center of the head of the rail and will make a true vertical cut at any angle, leaving the ends of the rail perfectly smooth and straight.

We furnish two regular carbon 18-inch diameter by $\frac{5}{32}$ inch thick blades with each machine.

Dexter Valve Reseating Machines

are known wherever valves are used and are the result of twenty five years specializing in tools for repair of valves

Fig 1511

Outfit No 6 T L capacity for reseating globe valves $\frac{1}{4}$ to 6 inches

The Dexter Machines recut a worn valve seat and disc accurately, making a perfectly tight valve that will hold water or steam

The same valve can be recut from ten to twenty times The saving of a few valves pays for a machine Extensively used in mines sugar mills public institutions railroads, ships and manufacturing plants

VACUUM WATER SERVICE SETS.

HOT-A-KOLD.

Vacuum Water Sets are most convenient and serviceable in the home. Becomes available at times when hot or cold liquids are required for use in the dining room, sleeping room, living room or on the veranda. Indispensable in the sick room.

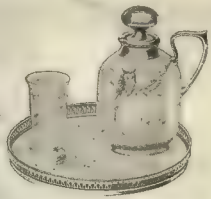
Per Set

No. 151-1—Water set; rose color enameled jug and tray; glass stopper; 6-oz glass tumbler; capacity of jug, 1 pint; diameter of tray, 10 inches..... **$13.30**

No. 151-3—Water set, turquoise color enameled; otherwise as No. 151-1.. **13.30**

Per Set

No. 151-10—Water set; white enameled jug and tray, with Adam decoration; has glass stopper; 6-oz. glass tumbler; capacity of jug, 1 pint; diameter of tray, 10 inches..... **$19.50**



Per Set

No. 150-17—Water set; white enameled jug and tray, with owl decoration; has glass stopper; 6-oz. glass tumbler; capacity of jug, 1 pint; diameter of tray, 10 inches..... **$18.00**

CAFENOIRAS.

UNIVERSAL.

Cafenoira at work, fascinates every watcher. The whole percolating process, visible through the glass, is a most attractive sight at any table After dinner coffee made in the Cafenoira is distinguished by its rich full flavor and aroma

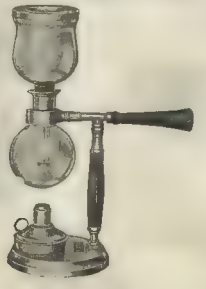
Made almost entirely of glass the Universal Cafenoira is perfectly sanitary and appeals to many for that reason

All this combination of simplicity, cleanliness, efficiency and attractiveness is not a luxury. In fact it is an economy, for you can use one teaspoonful of coffee to make a stronger beverage than you make of one large tablespoonful by ordinary methods

Each

No. 16 –Cafenoira; plain glass bowl and funnel, nickel plated frame and alcohol lamp, ebonized grip handle; capacity, 6 cups. **$8.00**

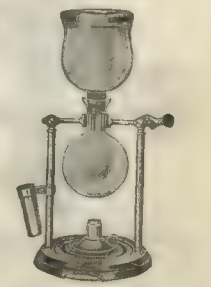
No. 18—Cafenoira; capacity, 8 cups; otherwise as No 16 ..... **9.34**



Each

No. 26—Cafenoira; plain glass bowl and funnel; silver plated frame; ebonized handles; capacity, 6 cups..**$9.34**

No. 28—Cafenoira; capacity, 8 cups; otherwise as No. 26.....**10.70**



Each

No. 36—Cafenoira; plain glass bowl and funnel; turn over style; nickel plated frame and alcohol lamp; capacity, 6 cups.....**$10.70**

SHEFFIELD PLATE ELECTRIC WARE.

UNIVERSAL.

SILVER PLATED ON NICKEL SILVER. OLD ENGLISH CHASED PATTERN.

Each

No. E840—Chafing Dish; silver plated on nickel silver; ebonized handles and feet; fast and slow heat connections; 450 and 160 watts **$40.50**

Each

No. E843—Toaster; silver plated on nickel silver; ebonized feet; height over all, 6⅞ inches; weight, 2⅝ lbs.; 350 watts **$16.20**

Each

No. E8646—Coffee Percolator; silver plated on nickel silver; ebonized handles and feet; capacity, 6 cups; height, 9½ inches; weight, 9½ lbs. **$37.15**

No. E8649—Coffee Percolator; capacity, 9 cups; height, 11 inches; weight, 6 lbs.; otherwise same as No. E8646 ..... **43.20**

Each

No. E8149—Coffee Urn; silver plated on nickel silver; ebonized handles and feet; capacity, 9 cups; height, 15 inches; weight, 9 lbs. . **$44.60**

Per Set

No. 8166044—Coffee Urn Set; consisting of silver plated on nickel silver, urn with ebonized handles and feet, capacity 6 cups, height 15½ inches, gold lined sugar bowl and creamer; satin center waiter, length 18 inches **$95.20**

No. 8169044—Coffee Urn Set; capacity of urn, 9 cups, height 17½ inches; otherwise as above **98.55**

Furnished complete with 6-foot art silk flexible cord and 7-point contact terminal plug.
Each article put in a white cotton bag and packed one in a box or strong carton.

SILVER PLATED WARE.

TEA AND COFFEE SETS.

QUADRUPLE PLATED, BURNISHED, ENGRAVED WITH ROCOCO BORDER.

Each

No. 50—Tea Pot; height 8 inches **$9.50**
No. 50—Sugar Bowl; height 5½ inches **6.50**
No. 50—Spoon Holder; gold lined; height 4¼ inches **5.80**
No. 50—Cream Pitcher; gold lined; height 4½ inches **5.80**

Per Set

No. 50—3-piece set; sugar, cream and spoon holder **$18.10**
No. 50—4-piece set; tea, sugar, cream and spoon holder ... **27.60**

QUADRUPLE PLATED ON NICKEL SILVER, BURNISHED: APPLIED THREADED BORDERS.

Each

No. C253—Tea Pot; height, 7½ inches **$26.40**

Car Derailers and Replacers

Fig. 94

Car Derailer

Price, per pair $30 00

The Tilden Car and Locomotive Replacing Frogs

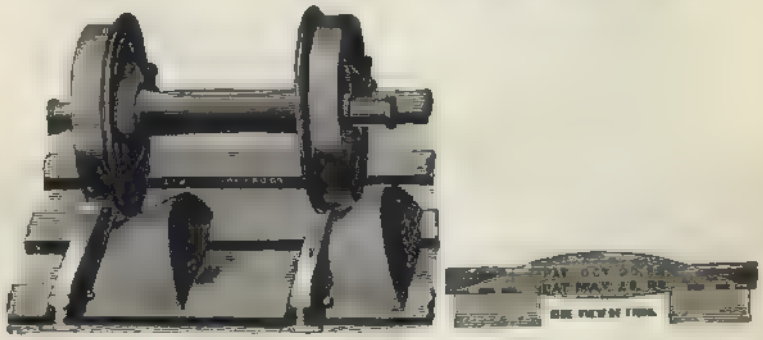

Fig. 95

The power of gravity never admits of the wheels passing the slant side Illustrated. The wheels go laterally to their place upon the rail as soon as the tread on the inside wheel and the flange on the outside wheel come to an altitude equal to the top of the rails as Illustrated above

This cut illustrates a pair of wheels upon a pair of our frogs where the wheels must slide to their proper place on the rails whether under a car or engine These frogs are in use on more than eight hundred Railroads and have proven more efficient than any other device in use for re-railing any derailed rolling stock Several cars can be replaced by one setting of these frogs As the train is pulled ahead and each pair of wheels reaches the frog it is carried up and onto the rails with wheels had very flat tires, a considerable distance from the rails the first setting of the frogs slews the trucks and carries them laterally, the second, places the wheels on the rails It is immaterial whether trains be pulled ahead or backed up the frogs being double-enders the result is the same They are complete, self-contained car and locomotive replacers These replacers are the greatest time savers in railway service Proper work fully developed by the most severe practical and technical tests are found to be perfect These frogs will replace any rolling stock to any rail in about one half the time of any other devices

The Tilden Replacer is made in the following sizes

No 2 for rail up to 60 pounds, weight per pair, 185 pounds

No 3 for rail 60 to 85 pounds; weight per pair, 208 pounds

No 4 for rail 80 to 100 pounds, weight per pair, 220 pounds

The weights mentioned in the above table are figured including clamps

The Aldon Car Replacers

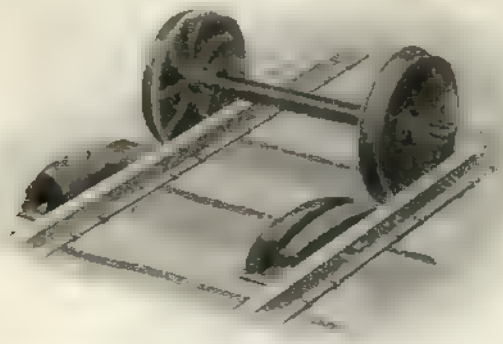

Fig. 96

Frogs are marked right and left. The right frog is always placed next adjacent to the right rail, the left frog to the left rail. Place the high end as close to the rail as possible. The weight of the car on end of the frogs must never be placed on top the flange of the rail.

No.	Material	Equipment Suitable For	For Rail Type to	Weight Pounds	Price Per Pair
1	Cast Steel	Heaviest	100	200	$51 50
2	Cast Steel	Modern	85	180	20 00
3	Malleable Iron	Electric Suburban	70	100	23 20
3½	Malleable Iron	Electric Suburban	50	100	25 20
4	Malleable Iron	Industrial	35	55	19 50
5	Malleable Iron	Street Railways	40	40	9 50

Johnson Car Replacers

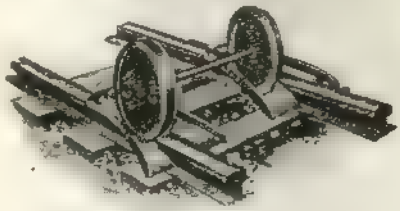

Fig. 97

These are in general use by Steam and Logging Railroads, Contractors and Mines. Have three points of contact on supporting rail and will not rock, as the saddle the rail and replacer wheels on both sides of rail in one setting. Do not require bolts clamps screws or wedges to hold in place when in operation. Full sections of rail from 6 inches down, these frogs will also work.

Type	For Rail Up to Weight Pounds	For Rail Up to Height Inches	Capacity Locomotive	Weight Pounds	Price Per Pair
M	45	3½	20-ton	30	122 00
C	65	4	30-ton	66	27 00

The Pony Tie Car

Fig. 253

You will see at a glance the Pony Car is useful and valuable.

Platform 52 x 16 inches

Carries ties, timbers and rails

Weight 100 pounds

Ballast Box on Pony Car with Skid Set

The ballast box hooks on over the crescent brace of the Pony Car. Fits close to the car. Will not slide endwise or forward.

Weight of box, 107 pounds

Box detachable, and sold separately

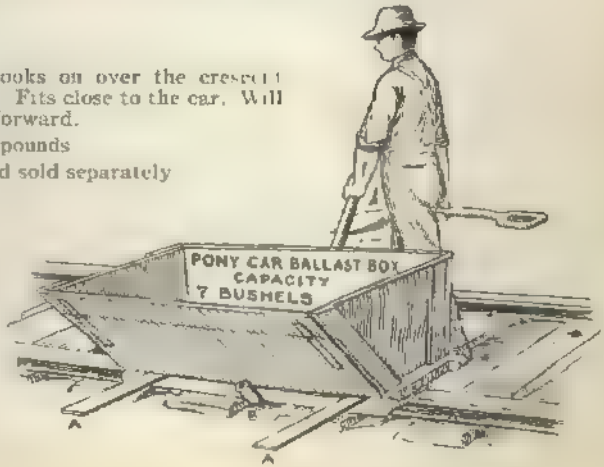

Fig. 254

Western Side Dump Cars

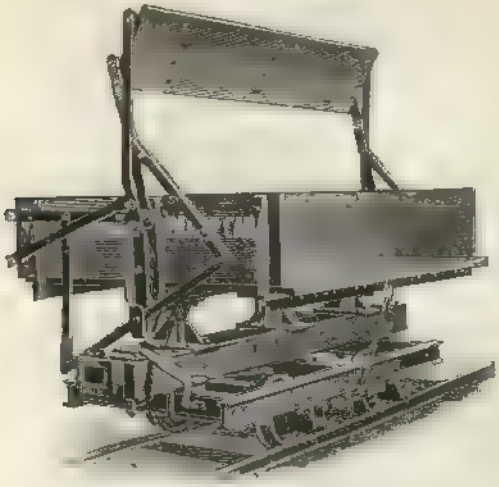

Fig. 255

Gauge

The standard gauge for the 1¼ and 1½ yard sizes is 24 inches; 3-and 4 yard, 38 inches, and 5, 6 and 12-yard, 4 feet 8½ inches. A car holding 1½ cubic yards will stick to the track better on a 24-inch than on a narrower gauge, while the wider gauge track is more economically maintained. The Western cars of above gauges are several inches lower and dump at sharper angle than the old-fashioned cars on narrower gauge. While the above are the standard, cars will be made on any desired gauge, at an extra cost.

Western Rotary Dump Car

Fig. 256

1 ¼ yard car—Gauge 24 inches; wheels 12 inches; axles 2 inches; bronze journal bearings 1 ¾ x 4½ inches; weight about 1500 pounds.

1½ yard car—Gauge 24 inches; wheels 14 inches; axles 2¼ inches; bronze journal bearings 1¾ x 4½ inches; weight about 1800 pounds.

2-yard car—Gauge 30 inches; wheels heavy pattern, 14 inches; axles 2½ inches; bronze journal bearings, 2⅜ x 5½ inches; weight about 2800 pounds.

Changes in gauge or in other respects can be made where required. Quotations on application.

SPRING PUNCHES.

+RIVERSIDE.

SINGLE TUBE.

Single tube cast steel, steel spring, polished finish.

Per Dozen

No. 10—Length, 8 inches; tubes assorted Nos. in box as follows: 4, 5, 6, 7, 8, 9 and 10; weight per dozen, 8½ lbs.. **$12.00**

EXTRA TUBES.

Per Dozen

No. 10T—Cast steel, to drive, assorted..... **$2.80**

One dozen in a package.

REVOLVING.

Four tubes, assorted sizes, cast steel, polished finish.

Per Dozen

No. 40—Length, 8 inches; tubes assorted Nos. 4, 5, 6, 7, 8, 9 and 10; weight per dozen, 9½ lbs..... **$20.50**

No. 60—6 tube, otherwise same as No. 40; weight per dozen, 9¾ lbs..... **24.00**

Half dozen in a box.

EXTRA TUBES.

Per Dozen

No. 40T—Cast steel, to drive, assorted..... **$2.80**

Half dozen in a package.

OSBORNE.

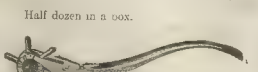
Extra Fine Quality, for Saddlers' Use.

For saddlers' and mechanics' use; are made from high grade steel; extra strong springs; entire tool is highly polished finish

Each

No. 153—Spring Punches; single tube, sizes 1 to 8; length, 8 inches; weight per dozen, 8½ lbs..... **$1.70**

Half dozen in a box.



For saddlers' and mechanics' use. Made from high grade steel; extra strong springs; entire tool is highly polished finish.

Each

No. 155-4—Tube Punches; 4 revolving tubes; sizes assorted 1 to 8; length, 8 inches; weight per dozen, 9½ lbs.... **$2.50**

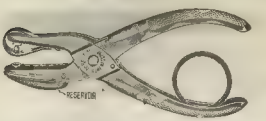
No. 155-6—Tube Punches; 6 revolving tubes; sizes assorted 1 to 8; length, 8 inches; weight per dozen, 10 lbs.... **3.00**

Half dozen in a box.

Each

Screw Tubes, for Nos. 153 and 155 Spring Punches..... **$0.30**

CONDUCTORS' PUNCHES.



Conductors' or ticket punch. Has spring reservoir to catch waste clippings. Made from pressed steel; coil spring; assorted shape dies; knurled handle. Entire punch is nickel plated.

Per Dozen

No. 260—Ticket Punches; assorted dies; length, 5 inches; weight per dozen, 2 lbs..... **$7.00**

Half dozen in a box.

Conductors' or ticket punch. Made from cast steel; polished finish; steel wire spring; assorted dies.

Per Dozen

No. 12—Conductors' Punches; assorted dies; length, 4½ inches; weight per dozen, 2½ lbs..... **$20.00**

Half dozen in a box.

Conductors' or ticket punch. High grade steel; nickel plated finish; extra strong steel wire spring; assorted dies.

Per Dozen

No. 9—Conductors' Punches; assorted dies; length, 5 inches; weight per dozen, 3 lbs..... **$26.50**

Half dozen in a box.

High grade conductors' punches. Made from high grade steel, full nickel polish finish; extra strong coil spring; special shape assorted dies.

Per Dozen

No. 6—Conductors' Punches; special assorted dies; length, 5½ inches; 1¾ inch slot; weight per dozen, 5 lbs..... **$42.50**

Half dozen in a box.

High grade conductors' punches; special design; full nickel plated finish; assorted shape dies. Street car and railroad conductors prefer this shape owing to its great strength and compact design.

Per Dozen

No. 3—Conductors' Punches; assorted shape dies; length, 4 inches; 1¼ inch slot; weight per dozen, 3 lbs..... **$64.00**

One in a box.

Skid Shoes

Fig. 89

The uses of the skid shoes are not confined to clearing main line tracks of disabled cars. As a buffer, or brake, to stop runaway cars where sidings are on a grade at the foot of coal inclines, on coal trestles, or where flying switches are used in gravity hump yards, the skid shoe has been found most efficient and very serviceable

The No. 3 size skid shoe, or track skate, is used extensively for plowing down ballast and clearing cinder tracts. In this use, a tie or board, is placed in front of the skids and the ballast, or cinders, "float" by, clear of the tracks thereby eliminating the possibility of getting "flat wheels" as is generally the case when wheels are chained

The skid shoes are made in these sizes
No. 1 size, weighing about 190 pounds per set
No. 2 size, weighing about 140 pounds per set
No. 3 size, weighing about 100 pounds per set
Skid shoes fit all rail sizes. Prices quoted upon request

Guard Rail Clamps

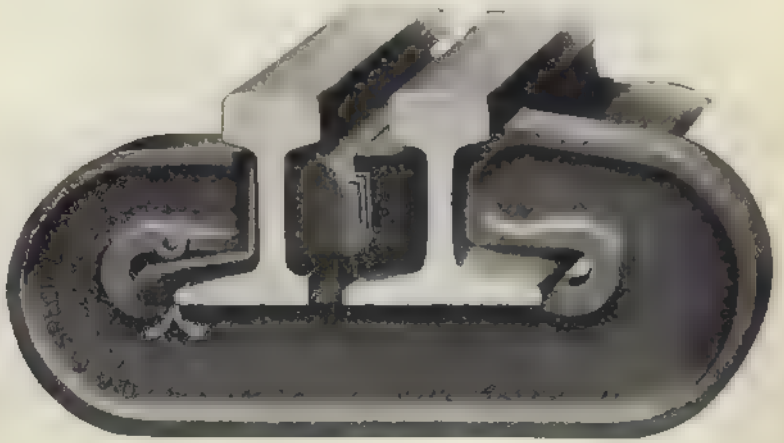


Fig. 90

Universal Guard Rail Clamps are made in two sizes, No. 1 and No. 2. The No. 2 size is designed to clamp guard rails of heavier sections for use on heavy steam railroads, the guard rail being heavy T rails. It can be used with plates applied with bolts passing through the guard rail. If desired, the plates can be furnished so that they do not interfere with detector bars

The yoke is drop forged, high carbon, open hearth steel of the "I" beam construction. The wedge, or pasts, bolts, locks and lock nuts are malleable iron and accurately fitted to the section of rail

The wedge is secured in place by a [illegible] bolt. The shelf on the wedge and the wide bearing surface of the shoe, maintain the vertical alignment of the yoke

As the yokes are interchangeable for all standard T rail sections of rail, it is only necessary to order new malleable fittings when changing rail sections

Derailers

Hayes Derails

Fig. 91
Model C

Fig. 92
Model E

Model C is for operation by pipe line or switch stand. It consists of only two pieces.

Model E is for operation by hand only. It consists of two pieces joined by a ¼" steel pin. It can be locked on the rail by applying a padlock direct to the lever as shown above.

Model H not illustrated here, is a new derail for operation by hand switch stand or pipe line. It consists of only two pieces and may be locked on or off the rail.

These models are made both in right hand and in left hand to operate to the right or to the left respectively. They are also made in double end to derail in either direction; they are then called Models CX, EX and HX. They may be used on any rail head up to 2" wide and for any service.

Derails for medium service and for use where the rail head does not exceed 2¼" in width are

Model G for operation by hand, switch stand or pipe line
Model A for operation by switch stand or pipe line
Model D for operation by hand only

Model F is a portable derail for use where it is desired to place a derail temporarily without spiking it to the ties.

Fig. 93
Derailing Surface of Double End Derails.

Size. The word "size" applied to a Hayes Derail, indicates the vertical distance from the top of the rail to the surface on which the derail is secured. Size 4 is best for use on rail from 3 to 4 inches high, size 5 is best for use on rail from 4 to 5 inches high, and size 6 is best for use on rail more than 5 inches high. All of these may be used on higher rails but none on lower rails than the lowest figures given.

In ordering Hayes Derail specify model, size and right or left hand. (Omit the right or left in ordering double end derails.

List of Hayes Derails

Model A	Made in sizes 4 and 5, in right and in left
Model C	Made in sizes 5 and 6, in right and in left
Model CX	Made in sizes 5 and 6, combined right and left
Model G	Made in size 5, in right and in left
Model H	Made in sizes 5 and 6, in right and in left
Model HX	Made in sizes 5 and 6, combined right and left.
Model D	Made in sizes 4 and 6, in right and in left
Model E	Made in sizes 4, 5 and 6, in right and in left.
Model EX	Made in sizes 4, 5 and 6, combined right and left.
Model F	Made in sizes 4 and 5, in right and in left

An operating stand is made which can be used to throw any of the models which are for operation by switch stand a target stand is made which can be used with any Hayes Derail except Model F to indicate whether the derail is open or closed.

The Hayes Derail is carefully designed and thoroughly well made. It has no small or loose parts. It is simple track material and is easy to install and requires little attention for maintenance. More than 100,000 are now in track. It is used on nearly every railroad in North America. The manufacturers make it their business to help the user get good results from every Hayes Derail he has all the time it is in track.

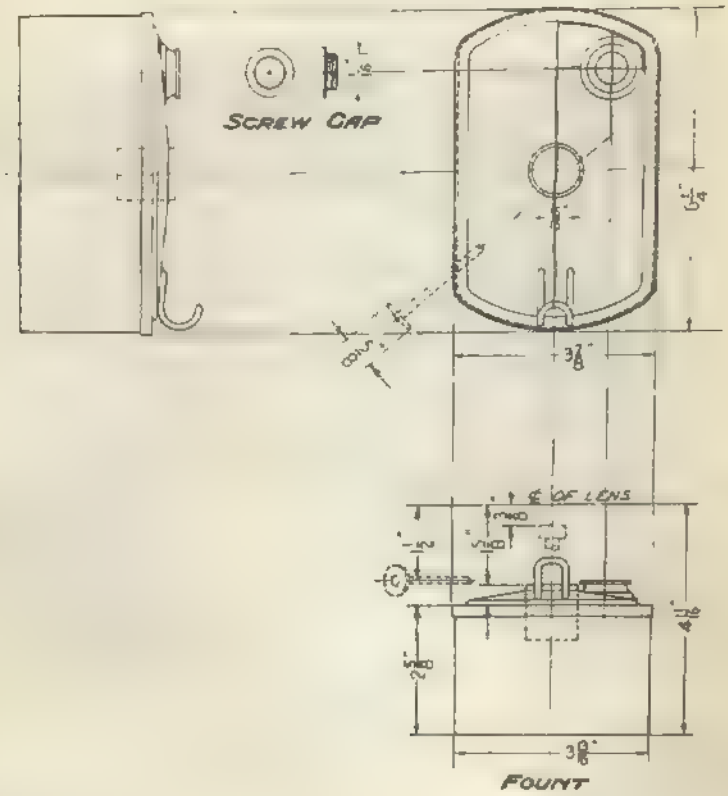
Railway Signal Association Lamp Fount



Specifications

1. Fount shall be 31 fluid ounce capacity, one fitted with a slip collar $\frac{1}{16}$ of an inch in diameter.

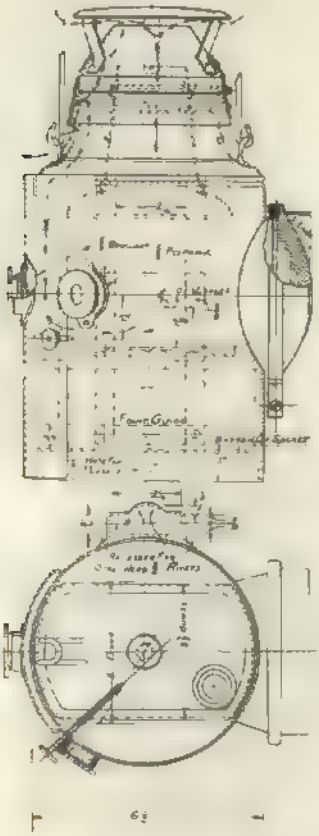
2. Fount shall be made of No. 22 drawn sheet steel, tinned and body pressed in one piece and with top soldered on.

3. Long-time burner shall be used.

Handlan Signal Lamps

No. 28 R. S. A. Semaphore Lamp

Wind Proof - Rain Proof



Railway Signal Association Specification

With or without prism glass reflector
No. 18 gauge steel.
31-Ounce font
5-Inch or 5⅝-inch white lens
Long-time burners.
Improved oil pot guide.
Improved burner shaft protection

See specifications on page 72.

18-Inch Engine Lathes

Series "AA"

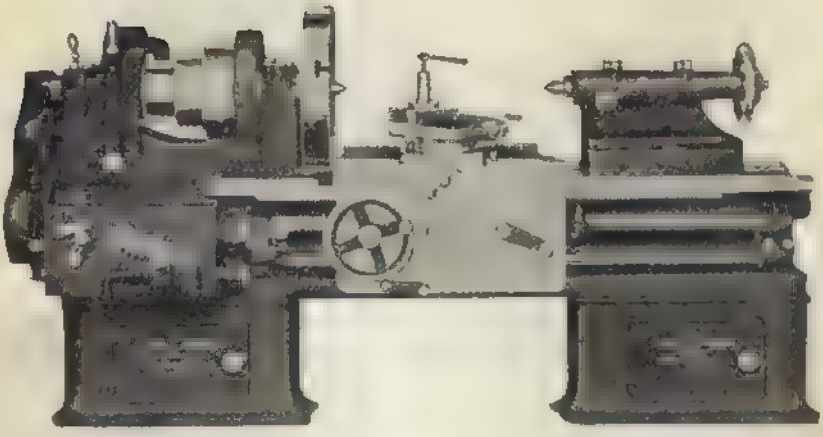


Fig 1557

With Quick Change Gear

Design of this lathe conforms strictly to the requirements of modern machine shop practice. It is rigid and simple in construction, sensitively accurate and easy to operate. It is especially designed and constructed for the use of modern high-speed steel where efficiency for accurate and rapid work is desired.

Bed is very heavy and of deep section and firmly braced its entire length with box girders, thus made to absorb the vibration of the heaviest cut

Hamilton 24 x 24-Inch Planer

Spur-Geared Only.

This button is so constructed as to positively insure contact at all times no matter what angle or position it is operated from. The button can be placed in the most accessible location for convenient operation, the slightest pressure closing the contact even though you do not press dead center.

Each

No. 2—Push Button **$0.24**

Floor or steering wheel switch. Made entirely of metal. Especially adapted for use where intermittent service is required as in operating motor driven horns, gauge lights, electric bells, etc.

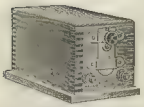
Each

No. 1—Push Buttons **$0.48**

COILS.

JEFFERSON.

BOX TYPE.



This trouble-proof coil is designed and guaranteed to give service under the most adverse operating conditions. It is very economical in battery consumption and produces at all times a hot, intensive spark.

The construction of the vibrator is such that the coil cannot be adjusted to stop the engine from working, nor can it be adjusted to consume an excessive amount of battery current, thereby prolonging the life of the dry cells. Coils are assembled in dove-tailed highly polished seasoned oak cases and are sealed in a water-proof compound.

Each

No. 1—Single cylinder, box coil **$5.50**
No. 2—Double cylinder, box coil **11.00**

COVERED DASH.

This covered coil is especially desirable for automobile, marine or stationary gas engines where coil is exposed to the weather, as the vibrator is covered, and, therefore protected from water, dampness and dirt. Coil is equipped with our trouble-proof vibrator; assembled in dove-tailed box which is oak finished. Without switch.

Each

No. DC1—Single cylinder, dash coil **$7.30**
No. DC2—Double cylinder, dash coil **14.60**

STEEL CASE, MAKE AND BREAK.

These coils are designed to answer the most rigid requirements of stationary and marine make and break gas engines. A hot, flaming arc is produced under compression with a minimum current consumption. Coils are assembled in a substantial black enameled steel case, and immersed in a special insulating compound which renders them impervious to moisture.

Each

No. 15—Size, 2¼x2¼x6 inches; weight, 3 lbs **$2.00**
No. 30—Size, 3x3½x4 inches; light, 5 lbs. .. **4.00**

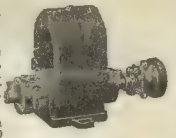
MAGNETOS.

WIZARD.

FOR STATIONARY ENGINES ONLY.

TYPE B.

CONTACT OR MAKE AND BREAK SPARK FOR ONE-CYLINDER ENGINE.



Suitable for starting engines up to three or four horse-power, without the aid of batteries. When batteries are used for starting it is satisfactory for much larger engines.

Each

No. F689 ..... **$24.80**

TYPE A.

CONTACT OR MAKE AND BREAK SPARK FOR MULTIPLE CYLINDER OR LARGER ENGINES.

The magnetic field in this type being twice that of type B, it will start a much larger engine without the aid of batteries, and can be run at a much lower speed, which means that the brushes, etc., will last much longer

Each

No. F691 ..... **$28.00**

TYPE BC.

CONTACT OR MAKE AND BREAK SPARK FOR ONE-CYLINDER ENGINE.

Exactly the same as type B, except that the coil is attached to the magneto. This makes an extremely simple and efficient arrangement, as there are only two wires to connect direct to your engine.

Each

No. F690 ..... **$28.00**

TYPE AC.

CONTACT OR MAKE AND BREAK SPARK FOR MULTIPLE CYLINDER OR LARGER ENGINES.

Same as Type A, except that the spark coil being attached makes an extremely simple and efficient arrangement, as there are only two wires to connect to your engine.

Each

No. F692 ..... **$32.00**

MAGNETO FILES.

A well made magneto file designed especially for cleaning magneto, coil and spark plug points.

Per Dozen

No. MF—Magneto File **$2.00**

Weight per dozen, ½ lb.

CATCHERS' MASKS.

REACH.

Reach Men's Spitter Model. Extra strong steel wire. Specially reinforced to assures trength. Sides extended to protect ears. Special pads which lace to frame. Adjustable head straps

Each

No. SL—Weight each, 2 lbs. **$11.56**

Reach Men's Professional Model. Open vision construction. Made of extra steel wire with dull black enamel finish. Self conforming laced on pads and adjustable head straps.

Each

No. 400—Weight each, 2 lbs **$10.00**

Reach Association Mask. Made of heavy steel wire, gun metal enameled to prevent reflection of light, strongly put together, well finished, warranted first-class and reliable in every particular. Special "Patented" hair filled leather and canvas side and head pads and special elastic head band. This mask is also fitted with a special green transparent sunshade.

Each

No. 30S—Weight each, 2 lbs. **$7.00**

Reach Amateur Mask. Made full size of steel wire. Black enameled, well padded and strongly constructed. Special elastic head band. Fitted with green transparent sunshade.

Each

No. 50S—Weight each, 2 lbs **$5.00**

Reach Amateur Mask. Made in same size and general style as Association masks, of lighter bright steel wire, well padded and strongly constructed. Improved frame and padding.

Each

No. XX—Weight each, ¾ lb. . **$3.50**

Reach Amateur Men's Mask; made of heavy bright steel wire; well padded and finished in the best manner. Improved frame.

Each

No. 3M—Weight each, ¾ lb.. ..... **$2.80**

YOUTH'S SIZE.

Reach Youths' Masks. Heavy wire and well padded. Without head or chin piece.

Each

No. CM—Weight each, ½ lb... . . .. **$2.20**

BODY PROTECTORS.

The padded or Sullivan model body protectors have proven superior to the old style inflated rubber protectors. We sell the padded style only. They afford thorough protection, are light in weight, conform to the movements of the player and will outwear rubber protectors.

Each

No. SP—Catchers' khaki canvas; laced edge **$17.06**

SELF-LOADING AND REPEATING SHOTGUNS

WINCHESTER TAKE-DOWN REPEATING SHOTGUNS

Rolled steel barrel, pistol grip stock and fore-arm of plain wood, not checkered. The Winchester take-down Repeating Shotgun is the popular Winchester Model 1897, with a strong, simple, serviceable, and handy take-down system applied to it. This gun can be taken apart and put together as easily and quickly as a double-barreled shotgun, and can be carried in a Victoria case, packed in a trunk, or rolled up in camp bedding. The take-down system used on this gun is similar to the one used on Winchester take-down rifles. The interrupted screw system is used on the take-down shotgun. This permits the removal of the barrel from the receiver by a one-quarter turn.

Model 1897, "Standard"— Each

12 gauge, 32 in. barrel, full choke. Wgt. 8 lbs. $31.00
12 gauge, 30 in. barrel, full or modified. Wgt. 7¾ lbs. 31.00
12 gauge, 28 in. barrel, full or modified. Wgt. 7¾ lbs. 31.00
12 gauge, 26 in. barrel, cylinder. Wgt. 7⅛ lbs. 31.00
16 gauge, 28 in. barrel, full or modified. Wgt. 7⅛ lbs. 31.00

The barrel is made of the celebrated Winchester rolled steel, 30 inches long, handsomely matted on the top, and bored to shoot a close, even pattern with any trap load. All barrels are tested and none are sent out which will not shoot at least 200 pellets of shot inside a 30 in. circle at 40 yards, with a load of 3¼ drams of smokeless powder and 1¼ ounces of 7½ chilled shot. The stock is made of handsome selected walnut and has a well-shaped straight grip, which is checked, and a rubber butt-plate. It has a dark rich oil finish. The length of pull is 14 inches, the drop at comb 1⅝ inches and at heel 1⅜ inches. The comb is heavy and rounding, which minimizes cross-sighting. The action slide is made of selected walnut, finished to harmonize with the stock, and checked.

Model 1897, "Tournament"—

12 gauge, 30 in. barrel, full choke. Wgt. 7¾ lbs. ..... Each $48.00

30 in. rolled steel barrel, matted, chambered for 2¾ in. shells, bored to shoot smokeless powder and to target 200 pellets, of No. 7½ chilled shot, inside a 30 in. circle at 40 yards, with a load of 3¼ drams of smokeless powder and 1¼ ounces of shot. Selected fancy walnut, handmade, oil-finished stock, with straight or pistol grip, checked, and checked rubber butt-plate. The action slide handle is of fancy walnut, handsomely checked. The standard style of stock is 13¾ in. long, has a drop of 2⅜ inches at heel and 1⅝ inches at comb. The comb is heavy and rounding. The stock of this gun being handmade, any length or drop desired will be furnished without extra charge.

Model 1897, "Trap"—

12 gauge, 30 in. barrel, full choke. Wgt. 7¾ lbs. ..... Each $59.50

WINCHESTER REPEATING SHOTGUNS

The Winchester Model 1897 "Riot" gun is made especially to shoot buckshot. This gun is used by sentries in the U. S. Army, express messengers, watchmen, prison guards, train hands, manufacturers, and by many people for home defense. The stock, construction, etc., are like the Standard 1897 Model.

Model 1897, "Riot"—

12 gauge, 20 in. barrel, cylinder bore. Wgt. 7 lbs. .... Each $28.50

WINCHESTER HAMMERLESS REPEATING SHOTGUN

A two-part take-down safe gun, nickel steel barrel. No tools required to take it apart. When taken down can be cleaned from either end. Plain walnut stock and fore-end, rubber butt-plate, all metal parts of nickel steel, six shots.

Model 1912, "Standard"— Each

12 gauge, 30 in. barrel, full or mod. choke. Wgt. 7¼ lbs. ... $36.00
12 gauge, 28 in. barrel, full, mod. or cyl. Wgt. 7¼ lbs. 36.00
16 gauge, 26 in. barrel, full, mod. or cyl. Wgt. 6 lbs. 36.00
20 gauge, 26 in. barrel, full, mod. or cyl. Wgt. 5¾ lbs. 36.00

WINCHESTER HAMMERLESS REPEATING TOURNAMENT SHOTGUN

A two-part take down tournament gun, nickel steel barrel, with raised matted rib. Handsome stock of selected walnut, oil finished, with well-shaped straight grip, checked, rubber butt plate. Action slide handle of selected walnut, checked. The length of pull is 14 inches, drop at comb 1⅝ inches, and drop at heel 1⅜ inches. These dimensions have been worked out with a great deal of thought and care, to make the gun fit the average trap shooter's requirements and, therefore, handle well. The comb is heavy and rounding, which is a help to quick and accurate shooting, and also minimizes cross-sighting.

Model 1912 "Tournament"—

Each

12 gauge, 30 in. barrel, full choke. Wgt. about 7½ lbs. ... $54.00

MARLIN HAMMERLESS REPEATING SHOTGUN

Hammerless, solid steel breech inside as well as out, solid top, side ejection, matted barrel, press-button cartridge release, automatic recoil hang-fire safety device, double extractors, take-down, trigger and hammer safety. Barrels are our special rolled steel, an extra strong and tough quality. Breechbolt, firing pin and other important parts are of chrome nickel steel, specially heat-treated, with an elastic limit of over 100,000 pounds to square inch, nearly twice as strong as similar parts in other guns. Buttstock and fore-arms are fine straight-grained black walnut, handsomely shaped and finished. Buttstock measures 13½ in. in length, 1½ in. drop at comb, 2½ in. drop at heel, genuine rubber butt-plate.

No. 28A—12 gauge, 30 in. barrel, full choke. Wgt. 7¾ lbs. Each $30.00

MARLIN HAMMER REPEATING SHOTGUN

Barrels are of special rolled steel, take-down. American black walnut stock and fore-arm. Frame and action cut down from solid drop forgings to insure greatest possible strength, blued finish, six shots.

No. 24A—12 gauge, 28 or 30 in. barrel, full choke. Wgt. 7¾ lbs. Each $25.00

Each Gun in a Box

REMINGTON AUTO-LOADING REPEATING SHOT GUNS

GUARANTEED FOR NITRO POWDER

NOTE.—The Mechanical Construction of all Remington Auto-loading Repeating Shot Guns is the Same. After a Shot has been Fired the Recoil Opens the Breech Locks the Empty Shell Extracts, Carries the Cartridge Over the Breech and Locks the Breech, the Gun is Then Ready to be Fired Again by Pressing the Trigger. The Trigger must be Released and Pressed Each Time the Gun is Fired. In Consequence of the Recoil Being Utilized to Operate the Mechanism, the Recoil is Largely Absorbed and the Shooter is Spared the Discomforts that Otherwise Result from the "Kick." Greatest Rapidity of Fire.

Take Down, Solid Breech, Hammerless, 5 Shots, Side Ejector, Absolutely Safe and Sure in Action
Chambered for any Length Shell up to 2¾ inches.

REMINGTON AUTO-LOADING REPEATING SHOT GUNS

Guaranteed for Nitro Powder

NOTE. The Mechanical Construction and Resulting Action of Remington Auto-Loading Shot Guns is the same. After a Shot has been Fired the recoil opens the Breech, Ejects the Empty Shell, Recocks the Hammer and Locks the Breech, and leaves the Arm ready to be Fired again by Pressing the Trigger. The Trigger must be Released and Pulled each time the Gun is fired. In Consequence of the Recoil being Utilized to Operate the Mechanism, the recoil is Largely Absorbed, and the Shooter is spared the Discomforts that Otherwise result from the "Kick." See the Remington Repeaters.

Take Down, Solid Breech, Hammerless, 5 Shots, Side Ejector; Absolutely Safe and Sure in Action; Chambered for any Length Shell up to 2¾ inches.

REMINGTON REPEATING RIFLES

New .22 Caliber Auto-Loading;—No. 16A Standard Grade

SPECIFICATIONS

SIMPLICITY—The [illegible] of this arm is extremely [illegible] the working parts [illegible] trigger, insuring dependable operation under all conditions.

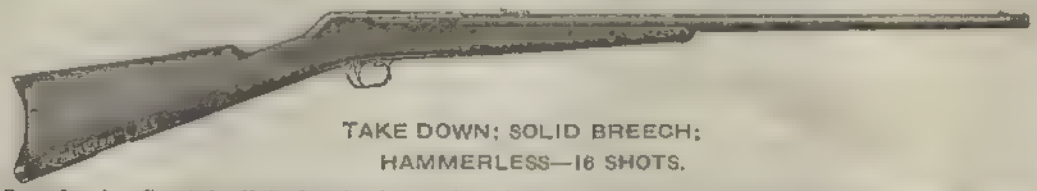
ACCURACY—This rifle has [illegible] barrel [illegible] to the [illegible] MC standard of [illegible] qualities. It is placed on the market together with the latest development in Remington-UMC .22 caliber rim fire [illegible]. [illegible], having been especially designed for Remington-UMC Auto-loading rifles, is [illegible]. [illegible] load but gives the maximum [illegible], and there is [illegible] no [illegible] [illegible] cartridges [illegible] with [illegible] cartridges of other brands.

SAFETY—The [illegible] is [illegible] conveniently [illegible] thumb [illegible] trigger. When the [illegible] is pushed to [illegible] the trigger or fire the arm, the safety [illegible] indicates whether the gun is locked [illegible] the safety [illegible] "on" until [illegible] the gun is [illegible]. Model 16 being hammerless, it is impossible for premature discharge to occur from striking [illegible] part, as is often the case with old style rifles having hammers.

TAKEDOWN—The [illegible] quickest and simplest known, and embodies [illegible] features to preserve [illegible] of the barrel with the frame. When [illegible], the [illegible] can be [illegible] by [illegible] the [illegible] take-down button give the barrel a [illegible] turn, and when [illegible]. No screws [illegible] to [illegible], and [illegible] cartridges and by removal [illegible] assembling screw, which [illegible] of the [illegible], rendering [illegible] impossible. [illegible] of very important feature: Provision [illegible] to take up [illegible] which can [illegible] to [illegible] of barrel to frame at all times.

[illegible] may be [illegible] from [illegible] any [illegible] conveniently [illegible] without [illegible] proper care of any .22 caliber [illegible] with which [illegible] is to be used.

MAGAZINE—A simple tube holding fifteen cartridges is arranged within the stock where it is protected from injury incident to rough usage in all conditions. This feature also affords the development of more symmetrical outlines than [illegible] in other arms where the magazine is placed beneath the barrels. The loading hole is on the bottom of the stock and [illegible]. Cartridges [illegible] single-loaded into the barrel, making a reserve of 16 shots.



TAKE DOWN; SOLID BREECH; HAMMERLESS—16 SHOTS.

In bulk.

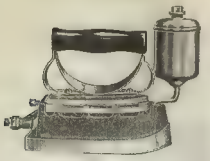
ROYAL, GASOLINE.



Simple, practical and durable; easy to operate. Heat can be regulated instantly.

Heated by gasoline which is generated into gas to supply the burner. The burner extends the full length of the iron, giving the entire bottom an even temperature.

The lid or top is made in two sections, separated by asbestos which keeps the handle cool. The handle is again protected by a shield. It never gets hot no matter how hot the iron is heated.

The heat is regulated with a wrench and can be instantly changed to suit the wishes of the operator.

Made of iron and steel, bottom and edges highly polished and nickel plated; fuel tank made of brass, nickel plated; black enameled wood handle grip.

Each

No. R—Royal Gasoline Sad Iron; weight each, 6½ lbs....**$4.25**

One in a carton, complete with wrench and full instructions for operating

COMFORT, GASOLINE.

Two point, self heating gasoline iron. Fuel capacity, ¾ pint; will burn 5 hours with one filling. Base is an iron casting, perfectly moulded, double pointed, heavily nickel plated. Handle is always cool. Tank and iron nickel plated.

Each

Comfort Gasoline Sad Iron—Weight each, 8 lbs.; complete with pump, lighter, funnel, extra washers and instructions.....**$5.00**

One in a carton

DOMESTIC, ELECTRIC.

The leaf type separable heating unit is insulated with mica and connected to terminal posts with heavy brass connectors; terminal posts are rigidly fastened to top of iron and are removable.

Iron is fully nickel plated and highly polished; handle is ebonized finish. Each iron is equipped with extra quality cord, with socket plug and detachable plug for attaching to iron, also a double deck safety stand.

Each

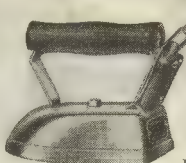
Domestic—110 Volts; length of cord, 6 feet; size of face, 3⅞x6½ inches; height, 5 inches; weight each, 6 lbs....**$7.00**

One in a box, six in a carton.

DOMANCO, ELECTRIC.

Heavy sheet steel hood, formed to prevent radiation of heat from interior of iron. A heat reservoir of solid iron is bolted to the heating element and extends into the space formed by the hood; contact posts are rigidly attached to this plate.

Heating element consists of special resistance wire imbedded in a composition which is a perfect electric insulator; readily conducts heat; prevents over heating of wire; protects wire from oxidation; saves current. Finished, base polished bright, exposed metal parts nickel plated, black enameled handle.



Each

No. 4—Domanco; 110 volts; size of face, 3⅝x6¼ ins.; weight each, 6 lbs.; complete with 6-foot feed cord, attachment and detachable plug and one two-deck steel stand.....**$7.70**

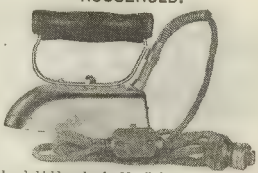
One in a carton.

Each

No. 475—Domanco; 110 volts; size of face, 3⅝x6¼ inches; weight, 8 lbs.; complete with 6-foot feed cord, equipped with C/H Feed Thro switch and attachment plug and one two-deck steel stand.....**$7.70**

One in a carton

HOUSEHOLD.



Hood and shield made of cold rolled strip steel, highly polished and nickeled; rubberoid handle, bolt full length to hold to handle support.

Heating element consists of many feet of Nichrome wire, imbedded in a refractory composition, all formed in pattern cast iron, under hydraulic pressure and hermetically sealed by an especially heavy heat retaining clamp plate. Complete with 6-foot feed cord, equipped with C/H Feed Thro switch and C/H two-piece socket plug, also cord encircled next to iron with a special cord protecting spring; three-deck nickeled steel stand, may be used as a small stove, curling iron heater; waxer and cleaner.

Each

No. 675—Household; 110 volts; size of face, 3⅝x6¼ inches; weight complete, 6 lbs.....**$9.44**

One in a carton.

For Electric Push Button Switches, see page 1981.

Cemcoat

The Enamel-like Wall Coating

Cemcoat is furnished in either Gloss or Flat.
Cemcoat has the combined virtues of enamel and paint.
It presents a tile-like finish.
It is washable, sanitary and durable.
Cemcoat should be used for all municipal buildings such as Schools, Bath Houses, Police Stations, Jails, etc.
Particularly adapted for safety lines on pavements.

RAPID FIRE

Business to-day is a rapid-fire proposition.

We've got to have people and machines that are capable of the very highest efficiency.

Royal Master Model No. 10—$100.

The Royal Typewriter is built with this fact in mind.

It is built for the rapid-fire, strenuous business of the time.

When you buy a ROYAL, you get a typewriter which is built on the understanding that you expect to keep it in service for many years.

ROYAL TYPEWRITER COMPANY
INCORPORATED
Royal Typewriter Bldg., 364-366 Broadway New York
Branches and Agencies the World Over

THE GAMEWELL FIRE ALARM TELEGRAPH CO.

"Registered U. S. Patent Office"
Manufacturers of
Fire Alarm and Police Signal TELEGRAPHS
For
Municipalities and Private Parties

The Gamewell system of to-day is the outcome of the combined inventive genius and mechanical skill of many whose valuable services the company has been able to secure during the past fifty-seven years, in pursuance of its policy of meeting at any cost the requirements of the varied conditions existing in different localities.

There is Enough Skill Required in Propelling the Gocycle to Make it Fascinating to Boys and Girls of Any Age.

They Are Made Entirely of Hardwood and Iron, Securely Jointed, the Iron Parts Well Enameled to Protect Against Rust and Wear, the Platform and Standards are Stained Bright Green, Metal Parts Red, Affording Strong Contrast in Colors.

	Per Dozen
No. GC—25x25 inches; Weight per dozen 50 lbs. Loose	$15 00

BOYS STEEL WAGONS

★NORLEIGH DIAMOND

"Norleigh Diamond" High Grade Boys Wagons are Original in Construction and Distinctive in Appearance. They are Better Ironed, Better Finished and Much Stronger than any other.

The Norleigh Diamond Boys Wagon is **Better Ironed, Better Finished** and **Much Stronger** than any other Wagon on the Market. Just Compare our Gear with any other and verify this Statement. Where other Front Gears are Riveted Once or Twice the **Norleigh Diamond Riveted, Welded** and **Reinforced** at **Nine Different Places.**

Note the Practical and Powerful Fifth Wheel and Gear. Note that the Tongue is Ironed—this Obviates all Tongue Trouble—Tongue Remains where you Leave it—Does not Fall to the Ground. Examine the **New Idea Steel Hand Loop**, which is the Best and Most Practical ever Used.

The NORLEIGH DIAMOND Gear and Heavy Iron Work, together with the "New Idea" Large Barrel, Anti-Friction Outer Bearing Hubs and Extraordinary Heavy Spokes and Wide Tires, Enables the NORLEIGH DIAMOND to Withstand Heavy Loads and Rough Usage where other Wagons Break Down.

Body—24-Gauge Steel (others made of 29 Gauge). Double Beaded or Swedged. Top Edge Reinforced with Heavy Steel Wire; Bed Substantially Fastened to Gear by Eight Steel, Copper Plated Bolts and Nuts, with Washers Under Heads to Keep them from Pulling Through.

Finish—Enameled, Varnished and Decorated by Hand in **Four Different Color Combinations**, as follows: Red Outside, Green Inside, Green Gear and Wheels; Green Outside, Red Inside, Red Gear and Wheels; Blue Outside, Red Inside, Red Gear and Tinned Wheels; Red Outside, Green Inside, Black Gear and Tinned Wheels; Gold Letters and Decorations.

Wheels—Steel, Highly Finished to Match Gear, **Fitted with Extra Heavy Spokes and Wide Tires**; "New Idea" Large Barrel, Outer Bearing Anti-Friction Hubs and Brass Plated Hub Caps.

Gear—Extra Heavy 10-Gauge Channel Steel (others made from 14-Gauge, which is much Lighter), Enameled to Match Wheels; "V" Shaped Channel Steel Braces; Improved Style Reinforcing Brace on Rear Axles, Extra Large and Strong Fifth Wheel Braces (see Page 3401)

Tongue—Made of Select Closely Grained Bent Hard Wood and will reach back far enough to allow Coasting; Finished in Oil; Fitted with "New Idea" Steel Hand Loop.

Packing—All NORLEIGH DIAMOND Gears, Wheels and Tongues are Packed in the Wagon Bed; this Eliminates Battered or Broken Wheels and Lost Tongues; This also means a Lower Freight Rate.

SLEDS AND COASTERS.

STEERING, KALAMAZOO.

Will absolutely steer perfectly at a greater rate of speed, further to either side and with less exertion than any other sled.

The runners are strictly high carbon spring steel, carefully formed to shape without destroying the carbon which gives them greater flexibility. The knees are pressed steel. The woodwork is carefully selected and the entire sled put together with rivets. The decorations are unique, tasty and perfectly executed.

We can recommend them to our customers as the best sled of this type on the market.

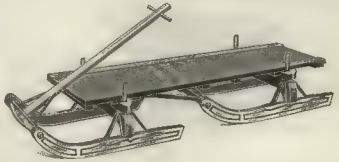
BOB SLEDS.

F. O. K. & CO. MAINITE.



This sled is built exactly like a standard Mainite farm sleigh. It has a long removable wood rack 12½ ins. by 3 ft. 9 ins. and is 8½ ins. high from floor. The runners are 26 ins long and have shoes running well over nose of runner. The sleigh has 4 feet of floor base. The tongue, short reach, bunks, rollers and bolsters are well ironed and braced. The lumber is all of good sound air-seasoned stock.

Nicely painted, striped and varnished. The gear is painted red and striped with black and yellow. The rack is painted green.

This is just the sleigh for a boy, whether for coasting or hauling light things, and with ordinary usage it should last a boy for many years.

Each

No. M—Bob Sleds; weight each, 25 lbs **$9.50**

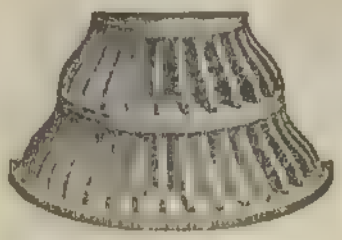
Design. These shapers are from entirely new and heavy patterns of modern type, and include all the late improvements. The columns are of generous proportions, heavy and strong, having projections both front and back for the ram slides. The outside column is well braced and ribbed to resist any strain of the working parts. The ram, cross rail and table are of proper proportions, strong, well braced and ribbed. The base covers a large area, is extra heavy, well ribbed and provided with projections for attaching a table support when necessary.

AXE RACKS

SENSIBLE

Hardwood, Oil Finished; Top and Edges Painted Red and Varnished



Two of these Racks, Placed Back to Back, Form a Circular Receptacle for 64 Handled or Unhandled Axes.

Showing Sensible Rack Displaying Handled and Unhandled Axes

BENCH VISES

RICHARDS-WILCOX

Especially Suitable for Use in Manual Training Schools and Where Subject to Heavy and Sudden Strains.

Instantaneous adjustment. Continuous in action. Phosphor Bronze Nut operates entire length of screw. No pawls, racks or triggers to break or wear. Nut is released and completely disengaged when pressure on work is removed by slight reverse movement of handle. No stripping or cutting of threads. When pressure is applied it causes the nut to engage and lock the screw firmly and is not held in position by any external mechanism. Screw is cut with single thread four to one inch, hence has double the power or pressure of vises having screw cut with double thread. Guides are of cold rolled steel. Jaws are of best gray iron with working surfaces ground and finished. Special design of ribs on jaws secures minimum deflection or spring under pressure, as well as minimum weight.

Head or Side Vise

Each

No. 430/1—Jaws 7x4 inches; Jaws open 10 inches; Screw, 1 inch in Diameter, 4 Threads to the inch; Length over all 17 inches; Weight 29½ lbs. **$12 00** 6.00

YOUR THEATRE & THE OTHER MAN'S

CONDUCTED BY R. W. BAREMORE

NOVEL WINDOW CARDS ISSUED BY FOX CORP.

Advertising Aids for "Queen of Sea," "Why America Will Win" and "Prussian Cur"

As an aid to exhibitors who have booked the pictures, the Fox Film Corporation has had printed more than a million copies [illegible] of some striking window cards ad[illegible] "Queen of the Sea," "Why America Will Win" and "The Prussian Cur" and these cards, it is announced, are being sent out all over the country.

The card advertising "Queen of the Sea" shows the magnitude of this great submarine phantasy, which, it is said, cost more than $1,000,000 to make. Several striking pictures, illustrating Annette Kellermann, star of the production, in some of the most attractive poses as the ruling [illegible] of the creatures of the deep, are shown in this card, which has a space for the name of the theatre.

One of the most striking features of the present world conflict furnishes the theme of the window card to be issued in connection with "Why America Will Win." A picture of a duplicate of the famous 7 inch gun used by the Germans is shown just at the moment of discharge, while in another part of the card is a portrait of General Pershing.

The window card to be sent out in connection with "The Prussian Cur" shows the Kaiser, typifying all the brutality of the Hun, squatting on a ruined cathedral, while behind him on a giant American cannon cracker prunes in readiness to explode. The cannon cracker is representative of the American A

Children's Playroom In Rialto, Omaha

Many exhibitors have trouble with babies crying in the theatre. Manager H. M. Thomas of the new Rialto Theatre in Omaha has overcome this entirely by establishing a comfortable children's playroom, where babies may be "checked" in the care of an expert attendant while the parent views the film. The mother is given a check and the number is attached to the child.

Should the child begin fretting, or for any other reason make it necessary to call the mother, the number appearing on the tag is thrown on a small screen at the front of the stage by a special [illegible] and in this manner the parent is notified the child needs attention.

SEE PAGE 1075

The Way You Advertise the Pictures You Book Is at Least 51 Per Cent. of Your Success

Method of Selling the House En Bloc for "America's Answer" Used in Phila. and Boston

THE unique method of disposing of the house en bloc, which has proved so successful during the engagement of "America's Answer," the United States Official War Film at the George M. Cohan Theatre in New York, has been duplicated for the showing of this patriotic picture at the Forrest Theatre in Philadelphia and the Majestic Theatre in Boston. The season in these houses opened August 12, after an extensive campaign by special representatives of the Division of Films, Committee on Public Information, under the direction of Ryerson Ritchie, chief of the community section.

Philadelphia sprung a novelty at the opening. Instead of that night being largely given up to invited guests, according to custom, John Wanamaker bought the house for the employes of the big Wanamaker store, and had the honor of inaugurating the engagement. It was a patriotic and memorable occasion in every [illegible].

It began with a parade of the John Wanamaker Commercial Institute Band and Companies A, B, C and D of the John Wanamaker Commercial Institute Regiment. The line was preceded by a platoon of police. At the theatre, a add tion to the picture, which created unbounded enthusiasm, there was a program of patriotic songs in which the entire audience readily [illegible].

On Wednesday evening, [illegible] entire house was taken b[illegible] & Co. for their employes. The Shellenburg Red Cross Band, the military organization from the big store, and the Shellenburg Band of 65 pieces paraded to the theatre. The special program included the singing of "The Long, Long Trail," and "Keep the Home Fires Burning." The entire house was also taken on different nights by the Southwark Foundry & Machine Co., the American American Railway Express Co., [illegible], Budd & Co. The establishments [illegible] were represented [illegible] nights during the engagement were J. G. [illegible], the Tacony Ordnance Co., Carlson-[illegible]om Co., England-Walton Co., Penn-[illegible] Blaisel Pencil Co., John T. Lewis & C[illegible] Warren Knight Co., Arthur Brock Co. and E. J. Schoettle & Co.

The opening night in Boston was thoroughly representative of official and military [illegible]. Among those who occupied boxes were Governor McCall, Mayor Peters, Postmaster Murray and Major-General Greuter, U. S. A., and Admiral Wood, U. S. N., with her respective staffs.

The enthusiasm of the audience was pronounced and the new picture was declared to be the most comprehensive war [illegible] produced. During the first two w[illegible] the run the entire house was sold to firms and industries for six nights. The employes of the Boston Navy Yard bought two nights, and nights were taken by the S. A. Woods Machine Co., Rivett La he & Grinder Co., Peter Gray & Sons, Inc., and he Gillette Safety Razor Co.

The disposal of the house to business concerns in Philadelphia and Boston in stures the success of the engagements in these cities, but the response of the public on the intermediate nights has been gratifyingly large.

Indiana Newspapers Are Beginning to Establish Motion Picture Departments

FOR some unknown reason, Indiana newspapers, for the most part, have, in the past, apparently failed to realize and appreciate the power of the motion picture as a means of building and sustaining circulation. Why they have failed to do this has always been a much discussed question among Hoosier exhibitors. However, a perusal of some of the state papers of recent dates discloses the fact that some of them at least are beginning to create a real live motion picture department.

One of the most noticeable changes in this respect has been noticed in the columns of *The Chronicle*, a daily newspaper published at Marion, Ind. Pages two, three [illegible] of recent issue of *The Chronicle* [illegible] devoted exclusively to motion picture[illegible]. And in the same issue was one hundred and eighty inches of advertising for the theatres of Marion.

The news, for the most part, was not the old, stereotyped press agent dope, but live, seasonable, interesting news matter pertaining to the plays and players to be seen during the week at the Marion theatre [illegible] instance, on the first page of the motion picture section was an article of Frances X. Bushman's marriage of recent date to his co-star, Beverly Bayne. The public was interested in this case. *The Chronicle* told them about it.

No city in Indiana the size of Marion can boast of a better or larger motion picture department than the one maintained by *The Chronicle*. The theatre men of Marion have also found the department a big help to them, and they show their appreciation by using the advertising columns of the paper extensively.

Some of the other newspapers of the state which appear rapidly realizing the great power of the motion picture as a medium of not only increasing their advertising, but in building up circulation, are the Evansville *Courier*, the South Bend *Tribune*, the Terre Haute *Tribune*, the Ft. Wayne *Journal-Gazette*, and the Lafayette *Courier and Journal*.

Gladys Leslie Welcomed at Cumberland Theatre, Brooklyn

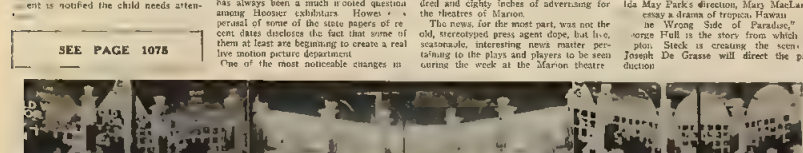
The announcement that Gladys Leslie, the golden haired little Vitagraph star, yielded to the persuasions of the eloquent manager of the Cumberland theatre in Brooklyn the other night and presented herself at his theatre during a showing of "Little Miss No-account," may give hope to the exhibitors throughout the country who have been literally deluging the Vitagraph offices in New York with demands that the popular young woman make a personal appearance at their theatres.

The diminutive star's first appearance might be called a triumph. In popular terms it would be described as a "hit." The crowd went wild with an ovation. Miss Leslie has been with Vitagraph for a year and in that time, up to the day she succumbed to the appeals of the Brooklyn manager, she had remained adamant to all requests for a personal appearance. The truth is, the only young star, whose face has been made known to millions by the camera is very modest. She admits now that a personal appearance is not at all an unpleasant experience, after one gets over one's stage fright.

"And that audience at Brooklyn was a [illegible]," she said, all smiles.

Drama of Hawaii Coming Soon for Mary MacLaren

Following the completion of "The Vanity Pool," in which she is working under Ida May Parks's direction, Mary MacLaren will essay a drama of tropical Hawaii. The Wrong Side of Paradise," by George Full is the story from which the [illegible]ption. Steck is creating the scenes. Joseph De Grasse will direct the production.



The elaborate way in which the Central Park Theatre, Chicago, Ill., advertised "Old Wives for New," "How Could You, Jean?" and "Missing [illegible]. It paid to advertise in these

Heart Of The Wilds" is the Artcraft picture adapted from "Pierre of the Plains" by Edgar Selwyn, with Elsie Ferguson in her stage role at the Rivoli N. Y. this week

The Silent Woman" is Edith Storey's newest starring vehicle, and Metro says it is one of the best things she has ever done

"OVER THE TOP" EMPEY ISSUES STATEMENT

(Continued from page 1062)

injure me in the opinion of our army men makes me see red

"Boys, I value your good opinion and respect more than anything else in this world, because I honor and respect every one of you, whether you volunteered or were drafted makes no difference to Uncle Sam, you are all in it to lick Germany. God bless you. The passing of the draft bill was one of the finest and timeliest acts in American history, because in all wars heretofore the volunteer system has proven a failure

"Recently I offered my services to the War Department and was commissioned a captain in the Adjutant General's Department of the National Army. In some way or other, a technical error was made in commissioning me. To rectify this mistake, I was honorably discharged. Immediately upon being discharged I requested authority from the Adjutant General of the Army to join the Tank Corps. This authority was granted me, provided I was eligible and could pass the physical examination. I return to New York in a few days and will apply for enlistment. If I pass, no doubt I will meet some of you; and we will pool spuds together on kitchen police. Anyway, I will see a lot of you 'over there,' and good luck to us all.

"Drafted men, to further prove that I am for you heart and soul, I make the following offer to the headquarters of the Y. M. C. A., or Knights of Columbus, of each draft cantonment in the United States. I will donate my moving picture, "Over the Top," for one night's showing in each cantonment, no admission to be charged.

"Furthermore, I will donate one copy each of my books, 'Over the Top' and 'First Call,' to every headquarters library of the Y. M. C. A. or Knights of Columbus, of every cantonment in the United States of America. After seeing this picture and reading my books, I guess it won't take a soldier long to decide whether I am with him or not.

"Directors of Y. M. C. A. and Knights of Columbus headquarters, if you will write, call or wire to me at my office, 220 West 42d street, New York City, I will make immediate arrangements.

"Boys, do me a favor! If anyone tells you that Empey ever cast a slurring remark or ever said anything not in your praise, please give him a Yankee wallop on the nose! Good luck to you all."

Empey has been one of the most potent factors in the work of stirring the patriotism of America that the country has known. Long before he wrote his book "Over the Top," and long before he appeared in Vitagraph's production of its strong scenes, he was at work for the Government.

In the First Liberty Loan drive he was instrumental in selling $900,000 worth of bonds.

In the Second Liberty Loan campaign he sold $1,011,000.

In the Third Liberty Loan drive he sold $11,000,000 worth of bonds.

Besides this, he has been a powerful recruiting force and has raised $1,300,000 in cash for various war funds, including the Red Cross, the Knights of Columbus, the Y. M. C. A. and special smoke funds for soldiers.

He probably will be one of the most strenuous campaigners in the Fourth Liberty Loan drive. If his military duties will permit him to work for the loan.

Sam Rork Makes Tour of the Mutual Exchanges

For the purpose of talking over personally with the first run exhibitors and Mutual exchange managers, the Sessue Hayakawa release "His Birthright," Sam F. Rork, general representative of the Haworth Pictures Corporation, left New York City for a trip which, it is announced, will take in Cleveland, Detroit, Chicago and Indianapolis.

Mr. Rork intends to go over in detail with the exhibitor the merchandising plan which has been worked out by the Mutual, bringing to their attention the wide possibilities of the picture and its numerous advertising points.

AMERICAN FILM CO. INC. *Presents*—

MARY MILES MINTER

IN

"THE EYES OF JULIA DEEP"

BY KATE L. McLAURIN
DIRECTED BY LLOYD INGRAHAM

First of the Mary Miles Minter productions to be released under the American Film Company's new plan of selling direct to exhibitors through American representatives in Pathé exchanges.

An exceptional story of department store life, giving Mary Miles Minter an opportunity to display her ability as an ingenue in the role of an humble department store clerk. Romance, comedy, pathos are woven into this story in an interesting manner.

Communicate at once with the American Film Company's representative in your nearest Pathé exchange for bookings

DISTRIBUTED BY PATHÉ

EMPEY'S "OVER THE TOP" GOES BIG DOWN SOUTH

"Over the Top," Vitagraph's war picture featuring Arthur Guy Empey, has not been too busy the last fortnight to drop down South and pull out a few S. R. O. signs that have not been used in a year.

A. Y. Xydias, live-wire manager of the Xydias theatres in Hattiesburg, Miss., (The Lomo and the Gem) writes an interesting letter to Vitagraph stating that he ran "Over the Top" August 8-9-10 to capacity business.

Mr. Xydias got a lot of high class newspaper publicity for "Over the Top," including an editorial in the Hattiesburg *American* of August 10, which was not only a tribute to "Over the Top," but to Vitagraph for producing such a timely picture.

"Over the Top" continues to run strong in all parts of the country and letters from exhibitors indicate still greater demand for the feature in connection with the coming Liberty Loan Drive.

Story Written by
A FAMOUS AUTHOR

Use this as Program Copy

ON the floor of his room the doors bolted, windows locked from the inside—lay the body of a man—murdered! And circumstance so spun its web that it entangled the destinies of many.

For Robert Ashton, the slain man, had carried a mysterious green god that he had stolen from a Chinese temple. And because Major Temple was determined to possess the little emerald effigy, Ashton had offered it for the hand of Muriel, Temple's daughter. And in the midst of it all appeared Owen Morgan, who offered his love and protection, his life if need be, to the woman whose father would bargain her off.

Yet who had entered through sealed doors to slay Ashton? Was it Morgan, to save the woman he loved? Was it Muriel, forced to any lengths to escape Ashton's sensuous covetousness? Was it Temple, impelled by his passion for the idol Ashton possessed? Or Li Min, the Chinese servant, with vengeance in his heart for the heretic who would desecrate the temple of his gods? Or was it the hand of Fate itself?

Landers, Frary & Clark's "UNIVERSAL" Electric American-Sheffield Plate Ware

In "Universal" American-Sheffield Plate is found the modern successor to the beautiful English Sheffield Plate of a century ago, now so highly prized as heirlooms and so eagerly sought by collectors of antiques.

Originally, the method employed in making this ware was the joining of silver and copper bars together with wire, fusing them with intense heat and then rolling them to proper thickness, after which they were converted into buttons, buckles, snuff boxes, candlesticks and other small articles.

The introduction of "Universal" American-Sheffield Plate marks a Renaissance of this historic ware and revives the artistic chased designs of earlier days, but instead of being silver plated on copper "Universal" American-Sheffield Plate is electro silver plated on a fine quality of solid white nickel silver which, because of its hardness and color, is greatly superior to copper as a base metal.

To the combination of modern materials and methods of manufacture is added a superiority of design as evidenced by the old English Chased pattern featured on this page. Each of these beautiful creations embody the many points of mechanical superiority which have made the name "Universal," as applied to household devices, known the world over.

RICH OLD ENGLISH CHASED PATTERN

The most discriminating set admire and esteem this beautiful ware.

HENRY DISSTON & SONS

Made of Best Grade Crucible Cast Steel; Perfectly Tempered in Oil; Carefully Sharpened and Set; Polished and Etched; Ground to an Even Gauge Throughout the Tooth Edge, with a Relative and Uniform Thickness Throughout the Body to a Thin or Extra Thin Edge at Back Edge, Giving the Saw a Maximum Amount of Clearance Without Sacrificing its Elasticity and Stiffness.

No. DGA—GREAT AMERICAN TOOTH

14 Gauge at Tooth Edge, 19 Gauge at Back Edge

This Style of Tooth is Easily Kept in Order and as it Takes Less Hold Upon the Log, Requires Less Effort to Drive it.

Single Station Mechanical Clocks

For Inside or Outside of Building — No Wiring Required

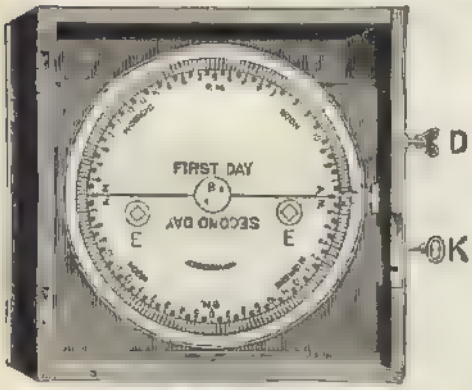

Fig. 1275
With the Door Removed

Full size 11 x 11 x 4 inches
Price with one year's supply of paper dials, complete, $12 00

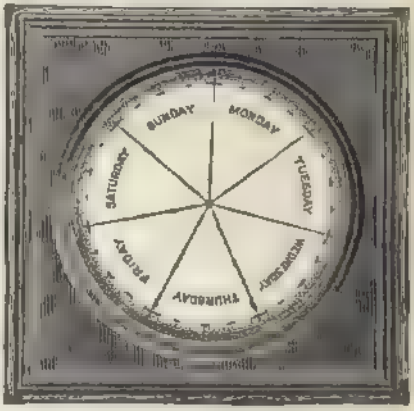

Fig. 1276

Full size 12 x 12 x 4 inches
Price, with one year's supply of paper dials, complete, $15 00

This system consists in having one of these clocks at each station. The watchman inserts his key at "D" and gives it a slight turn and thereby registers his visit on the paper dial. We make them with a two or a seven day dial, divisions for Day and Night. The case has a glass front and is screwed to the wall from the inside "A" "A"

SPEEDING UP!

Handles Dirt Faster And Cheaper 50%

SPAULDING 2 IN 1 ROAD MACHINE Helps You Solve The Labor Shortage Problem

The new, modern, fast and **easy** way to handle dirt. A special machine that **cuts costs.** Enables you to **move dirt just as fast with half the crew** or **twice as fast with the same crew.** Nothing experimental or freakish. Absolutely proven **right** by the biggest contractors in Iowa. Moves dirt, sand, or gravel **faster than four wheel scrapers—one man and four horses do the work.** Digs dirt out, no plowing necessary. Self-loading, **puts on 1 1-2 yards of dirt in 30 seconds.** Spreads dirt evenly or dumps in piles as desired.

Investigate Now! Write us for full information, **let us "show" you.** Ask for special jobbers and dealers proposition if prepared to represent us in your territory. **SPAULDING MFG. CO.**
Dept. 240, Grinnell, Iowa

A City Official

writing us recently says among other things: "Your

'Genuine Open Hearth Iron' Culverts

are certainly well adapted to city use as they can be laid nearer the surface of our streets than other types of culvert and are much easier installed than the pipes that come in short sections."

A pure Iron-Copper Alloy Sheet with a heavy spelter coat makes an ideal material for culvert construction. And that's what our culverts are made of. They are practically permanent. Let us send you our booklet and prices.

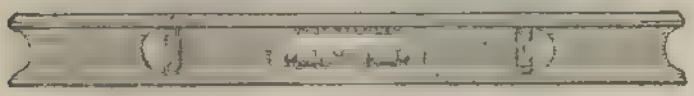
Per Dozen	$18.70	24 00	31 50	35.50

One in a Box

ALUMINUM PLUMBS AND LEVELS



STANLEY

These Levels have tops and bottoms milled and wet ground to insure two perfectly parallel surfaces, and the Level Glasses are located between [illegible]. This is a distinct advantage, as the Level can be used [illegible] by placing the bottom on the work in the ordinary way, or the [illegible] for the work as required in leveling ceiling beams, girders, etc.

The Glasses are what are known as "proved" and are set in metal cases which rest at each end on a support cast in the frame of the Level. The cases are held on the supports by means of eccentric cone center at each end, having screw adjustment.

Both the Plumb and Level Glasses are completely protected. This protection feature consists of a metal shell or cover, which can be turned so as to entirely cover the glass when the Level is not in use.

On account of their light weight, great strength, and the fact that they will not rust or warp, they are especially adapted for carpenters use.

Aluminum Frame; Nickel Plated Trimmings; Flat Top and Bottom; Two Plumb and One Level Glass; Proved Glasses.

No. 237

Length, In.	12	18	24
Weight Each, lbs.	1	1¼	1¾
Per Dozen	$65 80	77 00	89 00

One in a Box

J. SAND & SONS

One in a Box

MASONS PLUMBS AND LEVELS

★DIAMOND EDGE ADJUSTABLE

These Levels have adjustable Vials and can be changed to any Grade desired; It is this feature which makes it so Popular with Farmers, who have Tileing to put in, as they can get their Levels and Grades for Drainage with this Level and as accurately as with the most costly outfit. Also indispensable to Brick Masons and Concrete Workers. No danger of it being put out of Adjustment by a Jar or from a Fall off a building.

Per Dozen

No. DE6 Ring Vial; One Piece Spruce Stock; Highly Finished with Bright Carmine Paint; Two Spirit Plumbs and One Spirit Level; Size of Stock 48x1⅛x3½ inches; Weight Each 5 lbs.; Weight per Dozen 60 lbs. **$36.00**

One in a Box

The Plumb Bob and the Line are enclosed within the Stock in such a manner as to allow the Line and Bob to swing freely and the Line can be read at Three Convenient Points.

The opening for the Bob is nicely enclosed with Heavy Transparent Celluloid Plates. The Line is adjusted by a Reel that it is attached to, the Reel being let into the upper end of Stock. The Reel carries enough Line for Two Lines. To remove Reel or put on new Line, take off clip and remove Reel Screw. The Line is of the Best Black Braided Silk, very Strong and Durable. By using this Level you have your Plumb Rule always at Hand. Plumb Line and Level and all are always Ready for Service no matter from what direction or how hard the wind blows.

Per Dozen

Half Dozen in a Box

Per Dozen

No. 7—Full Brass Bound; Otherwise Same as No. 3A; Weight Each 4 lbs. $112.00

Half Dozen in a Box

STRAIGHT EDGES

**DIAMOND EDGE*

Stocks—Made of the Best Selected Seasoned Hardwood; Light Weight; Handy, Grooved Grip along the Two Sides, affording an easy Grip on the Tools; Handsomely Finished Bright Carmine Painted.

Vials—The Vials in this Straight Edge are provided with a new Adjustment. They can easily be placed in any position and securely fastened by the Two Small Screws which connect with a Steel Nut that is fastened to the stock beneath the Vial Ring and a slight pressure with a Small Screw Driver releases or fastens the Vial ring. It is Metal to Metal and is entirely reliable. Each Glass in both Plumb and Level is Set in Plaster and Enclosed in a Metal Case and held in place at Each End by an Adjusting Screw. A very delicate Adjustment is thus obtained. The Glasses in all *DIAMOND EDGE* Straight Edges are Tested and Marked with Two Indelible Lines, between which the Bubble can be readily seen from above, either Side or when working Overhead.

All Brass End Clips and Vial Rings are of Extra Heavy Gauge, Handsomely Polished. Heavy Brass Adjusting Screws.

Per Dozen

No. DE5½—Ring Vial; One Piece Stock; Brass Ends; Bright Carmine Painted; Two Spirit Plumbs and One Spirit Level; Length 5½ feet; Width at Center 5⅜ inches; Width at ends 3¼ inches; 1⅝ inches Thick; Weight per Dozen 52 lbs. $60.00

Loose

FARM LEVELS

BOSTROM

Meets every requirement for all kinds of Drainage work, including Tile or Under Drainage, also Open Drains or Ditches, all kinds of Irrigating work, including Canals and Latterals; Terracing Land, Road Building, House Foundation work, Grading of all kinds, Setting out Orchards, Running Fences, Getting Angles and every sort of Farm work requiring a Level.

The Telescope is "Achromatic," giving a clear field, and was designed especially for this instrument; and gives the operator a longer range and clearer sight. You can read the cross on the Target at a distance of about one-fourth of a mile, in any direction, thus being enabled to cover a scope of one-half mile, as the Turret carrying the Telescope revolves.

The line of sight is arrived at by cross hair lines set in the system of the magnifying glasses in the Telescope, and which cannot be dislodged or destroyed except by smashing the instrument. The Turret carrying the telescope and bubble revolves so that the telescope may be pointed in any direction desired, without the necessity of readjusting the level.

The Target rod and target is composed of a telescopic or sliding target rod, with thumb screw for securing in any position and is graduated to feet, inches and one-fourth of an inch, telescoping to five feet when closed, and to nine and one-half feet when extended, the target is sliding and of the usual form.

A Plumb Bob is included which adapts the Lever to the use of Architects, Contractors and Builders.

THE TRIPOD—This is composed of three wooden legs and Head receiving the Adjusting Head, which supports the Face Plate.

The Adjusting Head is screwed on to the Tripod and carries Three adjusting screws for the adjustment of Face Plate and Level to a perfectly horizontal position. The Face Plate is attached to the Adjusting Head by a screw and strong spring which presses the Face Plate firmly against the ends of the THREE adjusting screws, and at the same time insures a flexible joint, so that the Face Plate can adjust itself to any position. For the purpose of obtaining any angle desired, this Face Plate has a graduated circle, divided into 360 degrees, numbered from zero to 90 degrees in both directions, giving zero points on opposite sides of the circle.

Each

No. F—Farm Level Complete with Level, Telescope, Target and a Plumb Bob, all packed in a Neat Wood box; Tripod and Sliding Target Rod Wrapped; Weight 11 lbs. $28 80

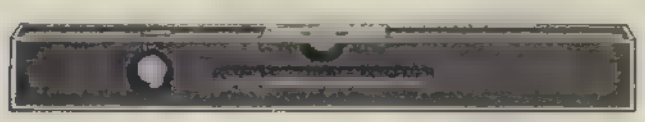
One in a Box

STANLEY'S PLUMBS AND LEVELS

Made from 1⅝x3⅛ in. mahogany, brass bound, adjustable, brass tips, brass lip, side views, ground glasses, handy grip.

No. 26—Length, inches	26	28	30
Per dozen	$70.00	70.00	70.00

Twelfth Dozen in a Box



Made from 1⅝x3⅛ in. mahogany, brass bound, adjustable, brass tips, polished side views, proved glasses, handy grip

No. 33—Length, inches	26	28	30
Per dozen	$55.00	55.00	55.00

Twelfth Dozen in a Box

Made from mahogany, 1⅛x2⅛ in. stock, brass bound, adjustable, brass tips, polished side views, proved glasses, handy grip

One-twelfth Dozen in a Box

NOTE—**Nos. 30S** and **42S** are of double construction, always in position for use, no matter which way they are picked up Double plumb glasses at top and bottom, both reading the same way. For low work the upper glass is read and for overhead work the lower glass is in range.

STANLEY'S METALLIC LEVELS

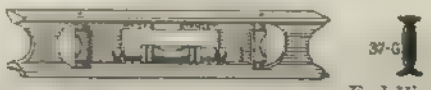
BENCH

End View

Japanned, nickel trimmed, tops and bottoms milled. Glasses are set so either surface may be used to level or plumb. Adjustable, proved glasses, grooved bottom.

No. 36G—Length, inches	6	9	12	18	24
Per dozen	$18.75	22.75	26.75	31.75	36.00

Twelfth Dozen in a Box



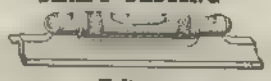
End View

Are of the same general design as No 36G, except have ground glasses, are full nickel plated and the glasses are protected.

No. 37G—Length, inches	6	9	12	18	24
Per dozen	$30.00	36.00	42 00	50.00	58 00

Twelfth Dozen in a Box

SHAFT TESTING



Eclipse

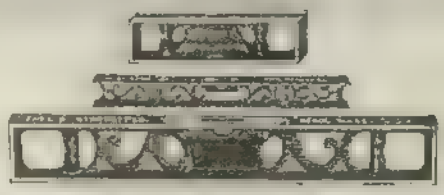
Glass fitted in a metal case, this case being enveloped by an outer case which can be turned to protect the glass, nickel plated, adjustable ground glass; V bottom for leveling shafting, etc.

No. 34V—Length, inches	4	6	8	10
Per dozen	$17.00	20.00	27.00	34.00

Twelfth Dozen in a Box

STARRETT'S METALLIC LEVELS

BENCH



Have concave groove on the bottom, adapting them to set on cylindrical work, piping, shafting, etc. Double plumbs sizes 4, 6, 9 in., built as in top cut, 12 in. as in middle cut, 18 and 24 in. as in bottom cut.

No. 182—Length, inches	4	6	9	12	18	24
Each	$1.35	1.50	1.65	1.75	2.00	2.25

One in a Box

ENGINEERS' AND PLUMBERS'

An adjustable incline level, a fixed level, and a plumb are all combined in this level. Has hinged tube inside the working faces of the frame carrying a level glass, which is adjustable to the graduated scale and shows any incline by 32ds to 2 inches to the foot. Has groove on bottom for use on shafting, pipe, etc.

With Plain Glasses

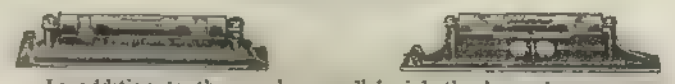
No. 133A—Length 10 inches . . . . . Each $2 75
No. 133B—Length 15 inches. . . . . Each 3 00

With Ground Glasses

No. 133C—Length 10 inches. . . . . Each $5 75
No. 133D—Length 15 inches. . . . . Each 6 00

One in a Box

SHAFT TESTING



In addition to the regular parallel vial, the bases have a cross level, which enables one to place or hold the base on a shaft level in its cross section. Has round groove on bottom for use on curved surfaces. The 12 in. size has single plumb, while the 18 in. has the double plumb.

No. 97—Length, inches	6	8	12	18
Each	$1.75	2.00	2.50	3.50

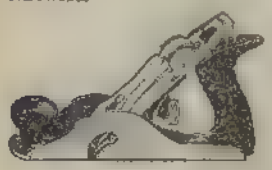
RABBET PLANES

STANLEY CARRIAGE MAKERS

These Planes are especially adapted for the heavy framing required in mining work, for carriage or wagon building, or in any work of similar nature. They are constructed along the lines of the "Bailey" Plane, having a cutter of the double type and being adjustable both endwise and sidewise.



Length 9 inches; 2⅛ inch Cutter; Rosewood Handle and Knob; Weight 8 lbs

	Each
No. 10½—Flat Bottom	**$5 80**
No. 10½C—Corrugated Bottom	**5 80**

One in a Box.

Length 13 inches; 2⅛ inch Cutter, Rosewood Handle and Knob, Weight 9 lbs.

	Each
No. 10—Flat Bottom	**$7.10**
No. 10C—Corrugated Bottom	**7 10**

One in a Box.

TILTING HANDLE

This Plane not only has all the features of Nos. 10 and 10½, but in addition both the handle and knob can be tilted to either side. This permits of the Plane being worked well up close to perpendicular sides of any height without hurting the hands of the user. It is also fitted with spurs on both sides, so that it will rabbet across the grain equally as well as with it.

Length 13 inches; 2⅛ inch Cutter; Rosewood Handle and Knob; Weight 4¼ lbs.

	Each
No. 10¼ Flat Bottom	**$8 50**
No. 10¼C—Corrugated Bottom	**8 50**

One in a Box.

RABBET AND FILLETSTER PLANES

STANLEY SKEW CUTTER

This Plane has an extra wide skew cutter. An adjustable spur if fitted to each side. The fence and depth gauge are also adjustable; the plane is therefore suitable for right or left hand work. The Adjustable fence slides under the bottom, regulating the width of the cut. Remove arms and fence, and a Skew Cutter Rabbet Plane is obtained.

	Each
No. 239—Length 8½ inches; Handles; Cast Iron; Japanned; 1¾ inch Cutter; Weight 3¾ lbs	**$4.30**

One in a Box.

STANLEY DUPLEX

This Plane has two seats for the cutter, one for ordinary work and the other where bull nose is required. It has a spur and removable fence. The adjustable fence can be used either way and slides under the bottom, regulating the width of the cut. For work same as a rabbet plane remove fence and arms.

	Each
No. 78—Length 8½ inches, Handled; Cast Iron; Japanned; 1½ inch Cutter; Weight 3 lbs	**$3 80**

One in a Box.

STANLEY

The sides and bottom being square with each other, the plane will lie perfectly flat on either side.

It has an adjustable fence which slides under the bottom, regulating the width of the cut.

It is fitted with two spurs, one on each side, for working across the grain; also an adjustable depth gauge.

As both the fence and the depth gauge can be attached to either side, the plane is suitable for either right or left hand work.

The front part of the plane can be easily detached, thus providing a bull nose plane for working close up into corners or other difficult places.

The cutter is adjustable endwise.

	Each
No. 278—Cast Iron; Japanned Trimmings; Length 6¾ inches; 1 inch Cutter; Weight 2 lbs	**$3 60**

One in a Box.

RABBET PLANES

STANLEY

These Planes will lie perfectly flat on either side and can be used equally as well with right or left hand while planing into corners or up against perpendicular surfaces.

Length 8 inches; Handled; Cast Iron; Japanned; Fitted with a Spur which permits the Plane being used for working across the Grain also fitted with a detachable Depth Gauge.

Nos.	190	191	192
Cutter, inches	1⅝	1¼	1
Weight, lbs.	2½	2¼	2
Each	$2 90	2.90	2 90

One in a Box.

STANLEY

These Planes will lie perfectly flat on either side and can be used equally as well with right or left hand while planing into corners or up against perpendicular surfaces.

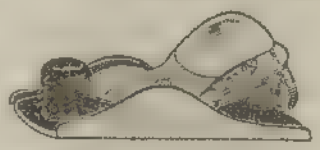
Length 8 inches; Handled; Cast Iron; Japanned; Without Spur but with a detachable Depth Gauge.

Nos.	180	181	182
Cutter, inches	1⅝	1¼	1
Weight, lbs.	2½	2¼	2
Each	$2.70	2.70	2.70

One in a Box.

RABBET AND BLOCK PLANES

STANLEY



Cast Iron, Japanned Trimmings; Rosewood Knob. A detachable side will convert it from a block plane to a rabbet plane, and vice-versa, a combination that will be appreciated by many. The cutter is adjustable endwise, and set on a skew.

	Each
No. 140—Length 7 inches; 1¾ inch Cutter; Weight 1⅛ lbs.	**$3 10**

One in a Box.

BULL NOSE RABBET PLANES

STANLEY

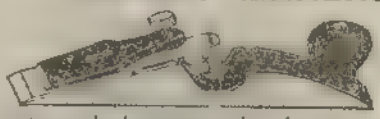
Cast Iron; Japanned Trimmings; This Plane will be found very useful for working close up into corners or other difficult places. The mouth can be adjusted for different widths by means of the set screw on top of the plane.

	Each
No. 75—Length 4 inches; 1 inch Cutter; Weight ⅝ lb.	**$0 90**

One in a Box.

CABINET MAKERS EDGE PLANES

STANLEY



For Piano Makers and all Cabinet Workers. It has a cutter resting on a solid bed practically its entire length. The cutter is adjustable endwise. Rosewood Knob.

	Each
No. 97—Length 10 in.; Cast Iron; Japanned; 2¼ in. Cutter; Wt. 3¾ lbs.	**$4.50**

One in a Box.

SIDE RABBET PLANES

STANLEY

These will be found to be very convenient for side-rabbeting in trimming dados, mouldings and grooves of all sorts. A reversible nose-piece gives the tool a double use, whereby it will work close up into corners when required.

	Each
No. 93—Right Hand; Length 4 inches; ¾ inch Cutter; Nickel Plated Cast Iron; Rosewood Knob; Weight ½ lb.	**$2 30**

One in a Box.

STANLEY

These will be found to be very convenient for side-rabbeting in trimming dados, mouldings and grooves of all sorts. A reversible nose-piece gives the tool a double use, whereby it will work close up into corners when required.

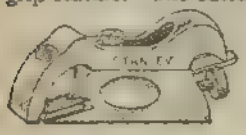
	Each
No. 99—Left Hand; Length 4 inches; ¾ inch Cutter, Nickel Plated Cast Iron; Rosewood Knob; Weight ½ lb.	**$2 30**

One in a Box.

CABINET MAKERS RABBET PLANES

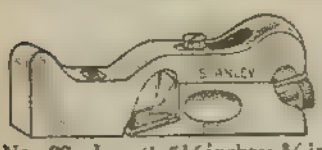
STANLEY

For fine cabinet or other work where extreme accuracy is required. The sides and bottom, being square with each other, the Planes will lie perfectly flat on either side, and can be worked either right or left hand. They have adjustable throats; this means that the width of the throat opening, or mouth, can be widened or narrowed as coarse or fine work may require. They are also fitted with the side groove or "Hand-y" grip feature. The cutters are adjustable endwise.



Built Nose Pattern; Nickel Plated Cast Iron.
This Plane is so designed that it can be used close up into corners or other difficult places. Each

No. 90—Length 4 inches; 1 inch Cutter; Weight 1 lb. **$4.50**
One in a Box.



Regular Pattern; Nickel Plated Cast Iron.

Each

No. 92—Length 5½ inches; ¾ inch Cutter; Weight 1½ lbs. **$4.50**
No. 93—Length 6½ inches; 1 inch Cutter; Weight 1¾ lbs. **5.30**
One in a Box

DADO PLANES

STANLEY

This Plane has an extra narrow cutter, only ⅛ of an inch wide, making it an ideal tool for blind wire grooving, as well as for many other purposes.

It is fitted with a double spur, which prevents splintering when working across the grain and insures a smooth, clean cut.

A depth gauge is also attached allowing a groove to be cut of any desired depth up to limit of the plane—½ of an inch. This Plane will be of special interest to electricians.

Each

No. 238—Cast Iron; Japanned Trimmings; Length 7½ inches; ⅛ inch Cutter; Weight 1 lb. **$4.90**
One in a Box.

STANLEY

The great advantage of these Dado Planes over those made of wood is that they will keep true under all conditions, even in the narrowest widths. They have skew cutters, an adjustable depth gauge, and two adjustable spurs, one on each side of the plane. This adjustable feature permits of the spurs being adjusted to take up wear, as well as for the depth of the cut.

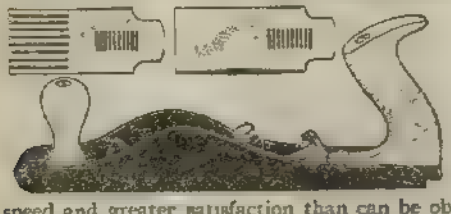
The plane is made in seven sizes from ¼ inch to 1 inch in width. In ordering always give the number (39) and width of cutter desired.

No. 39—Cast Iron; Japanned Trimmings; Length 8 inches.

Cutter, in.	1/4	3/8	1/2	5/8	3/4	7/8	1
Weight, lbs.	1¾	1¾	1¾	2	2	2¼	2¼
Each	$3.60	3.60	3.60	3.60	3.60	3.60	3.60

One in a Box.

BUTCHERS BLOCK PLANES



STANLEY

Designed especially for truing and facing Butchers Blocks

With its use blocks having the most uneven surfaces can be leveled up with more speed and greater satisfaction than can be obtained with the use of any other tool.

The work is accomplished with a specially formed cutter or plane iron set at an exceptionally low angle.

In addition to the special cutter mentioned, a regular Plane Iron is furnished which will enable the user to finish smooth the final surface of a Block, also for planing smooth and keeping in condition the Meat Benches and Tables ordinarily found in a butcher's Establishment.

Cast Iron, Japanned Finish; Hardwood Handle and Knob.

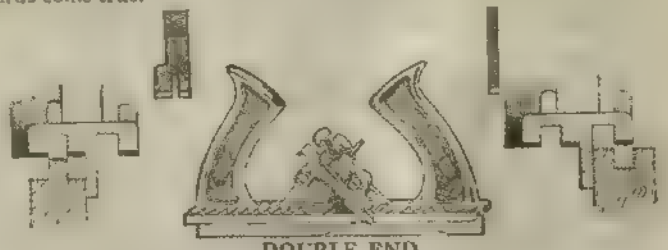
Each

No. 64—Length 12½ inches; 2 inch Cutter; Weight 4 lbs. **$5.40**
One in a Box.

MATCHING PLANES

STANLEY

These Planes cut a tongue on the edge of one board to fit a groove in the edge of another board, so that when put together the surfaces of the boards come true.



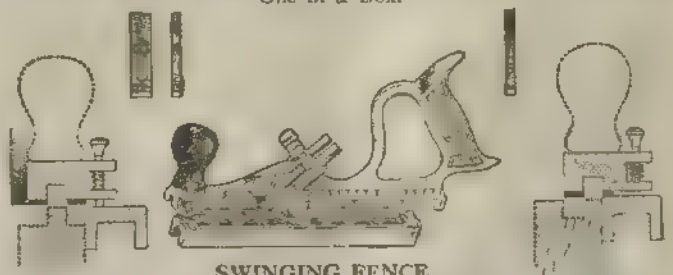
DOUBLE END

These Planes have two separate cutters, a plow, and a tongue tool both governed by one permanent fence. The tongue tool has one edge wider than the other, which overhangs one side when tonguing on center Both tongue and groove are cut by working the tool in the same direction by merely reversing it end for end.

Cast Iron; Nickel Plated; Handles Cast Solid with Body.

Each

No. 140—Cuts ⅛ Groove, on boards ⅜ in. to ½ in. Centers on ⅜ in. Weight 1½ lbs. **$4.50**
No. 147—Cuts 3/16 Groove, on boards ½ in. to ¾ in. Centers on ⅝ in. Weight 1⅝ lbs **4.50**
No. 148—Cuts ¼ Groove, on boards ¾ in. to 1 in. Centers on ⅞ in. Weight 2⅛ lbs. **4.50**
One in a Box.



SWINGING FENCE

This form has two plow cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is substituted for groove cutter when cutting tongue.

Cast Iron; Nickel Plated; Rosewood Knobs. Each

No. 48—Cuts 5/16 Groove, on boards ¾ in. to 1¼ in. Centers on ⅞ in. Weight 3¾ lbs. **$6.00**
One in a Box

EDGE TRIMMING PLANES

STANLEY

Designed especially for trimming or smoothing the ends of boards, such as sidings, etc., for a square or close fit. It has a right angle rest or guide from the cutter edge, and the cutter works on a skew giving an easy shaving cut. In the rest or guide are two screw holes to which wood blocks of various bevels may be attached enabling the user to make a slanting cut.

Each

No. 95—Length 6 inches; Japanned Cast Iron; ⅞ inch Cutter; Weight 1¼ lb. **$2.50**
One in a Box.

BELT MAKERS PLANES

STANLEY

A Plane designed for chamfering down the ends or laps of a belt before fastening them together It is very largely used by belt manufacturers, but it is also a valuable tool for all users of belting, enabling them to make repairs that otherwise would require that the belt be sent to the makers.

The Plane is fitted with an adjustable throat, by means of which a wide or narrow opening may be given to the mouth, or slot, for the cutter. Cutter is adjustable endwise by means of the screw shown at the back of the Plane.

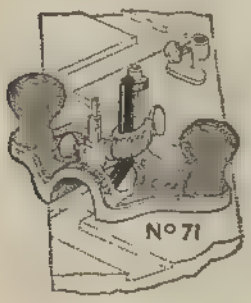
Each

No. 11—Cast Iron, Japanned; Hardwood Handle; Length 5¾ inches; 2⅛ inch Cutter; Weight 3½ lbs. **$5.00**
One In a Box.

ROUTER PLANES

STANLEY

These Planes are for surfacing the bottom of grooves or other epressions parallel with the general surface of the work.



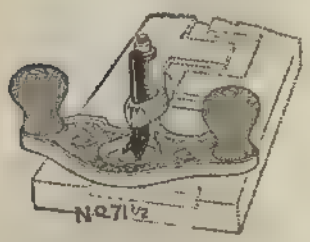
OPEN THROAT

An improved design giving more freedom for Chips and a better view of the work and cutter. Has an attachment for regulating the thickness of the Chip and a second attachment for closing the Throat for use on narrow surfaces. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on larger openings. Cutters have screw adjustment and can be held as shown in illustration or on the back of the cutter Post for **Bull-Nose** Work.

Each

No. 71—Nickel Plated Cast Iron; Rosewood Knobs; Length 7½ inches; Furnished with one each ¼ and ½ inch Cutters; Weight 2¾ lbs..... **$4 60**

One in a Box



CLOSED THROAT

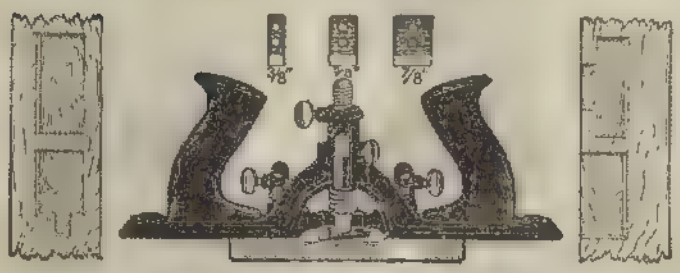
This is the ordinary form of Router Plane. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on larger openings. Cutters have screw adjustment and can be held as shown in illustration or on the back of the cutter post for **Bull-Nose** work.

Each

No. 71½—Nickel Plated Cast Iron; Rosewood Knobs; length 7½ inches; Furnished with one each ¼ and ½ inch Cutters, Weight 2¼ lbs..... **$3.60**

One in a Box.

DOOR TRIM PLANES



STANLEY

This new Plane will make mortises for butts, face plates, strike plates, escutcheons, etc., up to a depth of 5/16 and a width of 3 inches. Its original feature is the method of mounting the cutter, which can be instantly set to work from either end of the Plane or across it. In addition, the cutter is cushioned by a spring which prevents taking a heavier chip than can be easily carried. A fence regulates the position of the cut and insures the sides of the cut being parallel. The depth of the cut is governed by a positive stop.

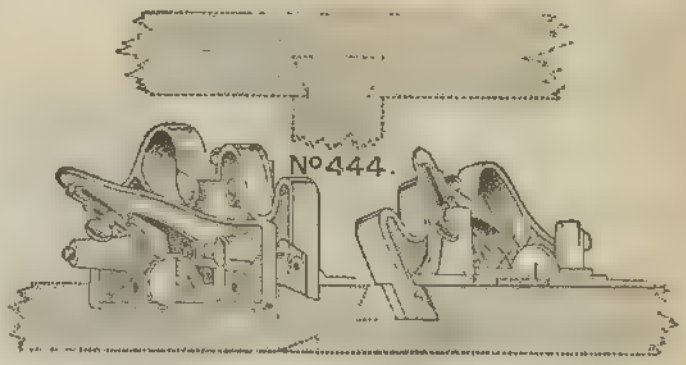
By removing the fence and locking the cutter post with the thumb screw instead of using the spring a very superior Router Plane is obtained. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on large openings.

Each

No. 171—Cast Iron, Japanned; Rosewood Handles; Length 11 inches; Furnished with three forged steel Cutters, ⅜, ⅝ and ⅞ inch wide; Weight 3 lbs..... **$6 80**

One in a Box.

DOVETAIL TONGUE AND GROOVE PLANES



STANLEY

It will cut any size grooves and tongues to fit with sides at flare of 20 degrees, where the width of the neck is more than one-quarter of an inch and the depth of groove not more than three-quarters of an inch. The tongue and groove are cut separately, and can be made with parallel or tapering sides. The operation of the Plane is simple. A circular containing instructions for assembling and operating is packed with each tool. All parts carefully machined and interchangeable.

Three Sizes of Cutters are furnished for forming Grooves; Smaller Size for ⅛ and ⅜ inch Boards; Medium Size for ¼ and ⅝ inch Boards; Large Size for 1 to 2 inch Boards. One Size Cutter will Cut any Size Tongue.

Each

No. 444—Nickel Plated Cast Iron; Length 9 inches; Weight 6 lbs..... **$13 70**

One in a Neat Wooden Box with Directions.

CORE BOX PLANES

STANLEY

Adapted for large core boxes, and is furnished with one pair of extra sides, or as they are called, Additional Sections. Without Sections it will work semi-circles from 1 inch up to 2½ inches in diameter. With one pair of Sections it will work semi-circles up to 5 inches in diameter. Additional Sections can be supplied, each extra pair adding 2½ inches to the diameter of the semi-circle that can be worked, up to 10 inches in diameter, the practical limits of the Plane.

Each

No. 57†—Nickel Plated Cast Iron; Beechwood Handle and Knob; Length 10 inches; ⅛ inch Cutter; Weight 6¾ lbs..... **$8 80**

One in a Box

Per Pair

†**Extra Sections** for No. 57 Plane; Weight per Pair 2 lbs..... **$3 00**

One Pair in a Box.

Items Marked † not carried in Stock; Can only be furnished by shipping direct from Factory New Britain, Conn.

VENEER SCRAPER PLANES

STANLEY

This is a small handy tool, designed to be used with one hand and well adapted for Violin Makers and all Mechanics requiring a light adjustable scraper. It has a rosewood Knob but no Handle. It also has the "Hand-y" feature on both sides.

Each

No. 212—Cast Iron, Japanned; Rosewood Knob; Length 5½ inches; 1⅝ inch Blade; Weight 1½ lbs..... **$3 50**
One in a Box.

STANLEY
Single Handle and Knob

The blades are adjustable endwise and for angle, and can be firmly locked in position desired. It can also be used as a Toothing Plane, doing excellent work in scraping off old paint or glue, and in roughing up the surface of wood preparatory to veneering same.

Each

No. 112—Cast Iron, Japanned; Rosewood Handle and Knob; Length 9 inches; 3 inch Blade; Weight 4 lbs **$5 00**
One in a Box.

Per Dozen

No. EPB—Extra Scraper Blades; For No. 112 Scrapers, also Nos. 0, 12 and 12½ Stanley Veneer Scrapers; Wt. 4 ozs..**$6 00** $2.40

Loose.

STANLEY
Double Handle; Iron Face

The handles are of rosewood with a double grip, and, being placed across the center of the tool, give it a good balance. The blades are adjustable endwise and for angle, and can be firmly locked in position desired.

They can also be used as Toothing Planes, doing excellent work in scraping off old paint or glue, and in roughing up the surface of wood preparatory to veneering same.

Each

No. 12¼—Cast Iron, Japanned; Rosewood Handles; Length 6¼ inches; 2 inch Blade; Weight 2½ lbs. **$4.60**
No. 12—Cast Iron, Japanned; Rosewood Handles; Length 6¼ inches; 3 inch Blade; Weight 3¾ lbs..... . ...**5 50**
One in a Box.

STANLEY
Double Handle; Rosewood Face

The handles are of rosewood with a double grip, and, being placed across the center of the tool, give it a good balance. The blades are adjustable endwise and for angle, and can be firmly locked in position desired.

They can also be used as Toothing Planes, doing excellent work in scraping off old paint or glue, and in roughing up the surface of wood preparatory to veneering same.

This Plane has an extra bottom, or face, made of rosewood. This wood bottom is especially adapted for use on very fine work, as it renders less liable the possibility of marring or scratching the surface being worked upon. This bottom is detachable, and, when worn, can be readily removed and a new one substituted.

Each

No. 12½—Cast Iron, Japanned; Rosewood Handles and Face; Length 6¼ inches; 3 inch Blade; Weight 4 lbs..... .....**$7 40**

CIRCULAR PLANES

These Planes have flexible steel faces which can be accurately adjusted for planing the inside or outside of circles. The cutters are the same and have the same adjustments as the "Bailey" and "Bed Rock" Planes.

There are two designs, varying in the method of adjusting the face.

Plane set for Inside work.

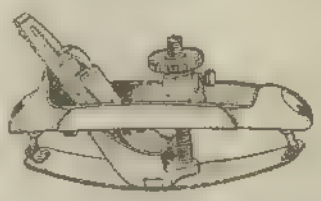
Plane set for Outside work

STANLEY ADJUSTABLE

The face is fastened at its center to the Plane Body, and adjusted at the ends by means of a screw and levers. A valuable feature is the graduated scale for setting the face.

Each

No. 113—Japanned; Length 10 inches; 1¾ inch Cutter; Weight 3 ½ lbs . **$8.70**
One in a Box.



No. 20

No. 20½

VICTOR ADJUSTABLE

This is a more recent and improved design. The face is fastened at each end to the Plane Body, and adjusted by a screw at the center. This construction gives great strength and accuracy. The fewer number of working parts causing less lost motion, give greater solidity which makes the plane work more smoothly

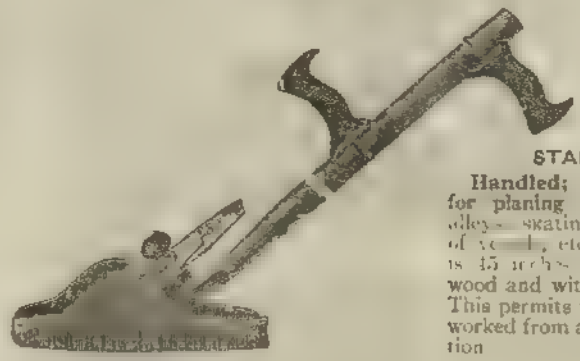
The design of the frame provides convenient and firm handles for both hands.

Length 10 inches; 1¾ inch Cutter; Weight 4 lbs.

Each

No. 20—Nickel Plated **$8 90**
No. 20½—Japanned..... .... **7 70**
One in a Box.

FLOOR PLANES



STANLEY

Handled; it is designed for planing floors, bowling alleys, skating rinks, decks of vessels, etc. The handle is 45 inches long, of hardwood and with double grips. This permits the plane to be worked from a standing position

Each

No. 74—Cast Iron, Japanned Body; Length 10½ inches; 2⅝ inch Cutter; Weight 21½ lbs..... ..... **$11 50**
One in a Box.

STANLEY SPECIAL

This Plane is fitted with an adjustable throat, permitting a wide or narrow mouth, according as coarse or fine work requires. It is designed for working from a kneeling position, the double handle making it an easy tool to work under such conditions. The cutter is adjustable endwise

Each

No. 11½—Cast Iron, Japanned Body, Hardwood Handle. Length 7 inches; 2⅜ inch Cutter; Weight 3¾ lbs **$7 00**
One in a Box.

STEEL BENCH PLANES

STANLEY ADJUSTABLE

These Planes are much in demand for outdoor work where tools are apt to get knocked around and are subjected generally to more or less rough usage. The bottoms and sides are one piece of pressed steel, making them practically non-breakable. They weigh considerably less than iron planes, and for light work on soft woods will be found very useful. The cutters are of the double type and are adjustable endwise by means of the small lever shown in the cut.

SMOOTH

Pressed Steel; Black Japanned Trimmings; Rosewood Handle and Knob; Finest Quality Tempered English Thin Steel Cutter, Ground and Honed Ready for use.

Each

No. 104—Length 9 inches; 2⅛ inch Cutter; Weight 3⅛ lbs..... **$4.30**
One in a Box.

JACK

Pressed Steel; Black Japanned Trimmings; Rosewood Handle and Knob; Finest Quality Tempered English Thin Steel Cutter, Ground and Honed ready for use.

Each

No. 105—Length 14 inches; 2⅜ inch Cutter; Weight 8⅞ lbs..... **$5.60**
One in a Box.

WOOD BENCH PLANES

BAILEY ADJUSTABLE

The frog is held in place by two machine screws which pass through the top iron and screw into two brass lugs. These lugs are screwed and securely pinned into the wood bottom. This is far superior to other methods of fastening, as it holds together firmly the wood bottom, the top iron which strengthens the wood bottom, and the frog.

SMOOTH

The bottom, handle, and knob are made from selected and well seasoned beech. The cutters are the regular "Bailey" type and are adjustable both endwise and sidewise

WOOD BENCH PLANES

STANLEY LEVER ADJUSTMENT

They have a simple lever adjustment, are well made, and for the Householder, the Farmer or the Amateur, or in fact for use in any place where extreme nicety of work is not required, make an excellent tool.

SMOOTH

The cutters are of the double cutter type, of a high grade of steel and ground and honed ready for use. They are adjustable endwise by means of a lever and are held in place by a lever thumb screw instead of a cam. The bottoms, handles and knobs are made of beech and the entire plane is well finished.

Each

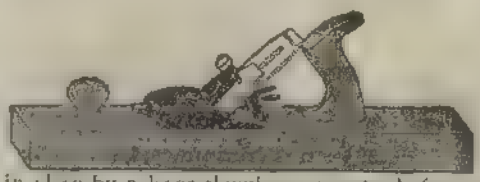
No. 122—Length 8 inches; 1¾ inch Cutter; Weight 2⅝ lbs..... **$2 50**
One in a Box.

HANDLED SMOOTH

The cutters are of the double cutter type, of a high grade of steel and ground and honed ready for use They are adjustable endwise by means of a lever and are held in place by a lever thumb screw instead of a cam. The bottoms, handles and knobs are made of beech and the entire planes well finished.

Each

No. 135—Length 10 inches; 2⅜ inch Cutter; Weight 3 lbs..... **$3.30**
One in a Box.



The cutters are of the double cutter type, of a high grade of steel and ground and honed ready for use. SCRUB PLANES

STANLEY

With these planes the user can quickly plane down to a rough dimension any board that is too wide to conveniently rip with a hand saw, an operation that is sometimes called "hogging." This is made possible by reason of the peculiar shape of the extra heavy cutter, the cutting edge of which is rounded instead of square.

Japanned Cast Iron; Beechwood Handle and Knob.

Each

No. 40—Length 9½ inches; 1⅝ inch Cutter; Weight 2¼ lbs. **$2 40**
No. 40½—Length 10½ inches; 1⅝ inch Cutter; Weight 2½ lbs. **3 30**
One in a Box.

FURRING PLANES

STANLEY

For preparing lumber as it comes roughly sawed from the mill. The construction of the bottom is such that it will remove the fur, grit, dirt, etc., and in fact "clean up" the surface and get it ready for the bench plane quicker than any other hand tool.

Each

No. 340—Japanned Cast Iron; Beechwood Handle and Knob; Length 10 inches; 2 inch Cutter; Weight 2½ lbs.... **$3 30**
One in a Box.

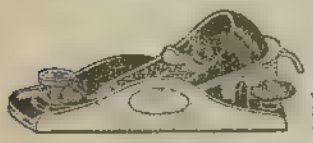
IRON BLOCK PLANES

BAILEY ADJUSTABLE

All numbers have the most improved form of adjustment, which enables the user to accurately adjust the cutter either endwise or sidewise. The cutter rests on its seat at an angle of 20 degrees as against 45 degrees in the ordinary Bench Plane, and the cutter bevel is made on the upper instead of on the lower side. All have adjustable throats which permit of the opening or closing of the mouth as coarse or fine work may require.

Length 6 inches; 1⅝ inch Cutter; Weight 1½ lbs.

	Each
No. 9½—Japanned Trimmings	$2 30
No. 16—Nickeled Trimmings	2 70



Length 7 inches; 1⅝ inch Cutter; Weight 1⅝ lbs.

	Each
No. 15—Japanned Trimmings	$2 60
No. 17—Nickeled Trimmings	3 00

Knuckle Joint; Nickel Plated

These Planes are now fitted with a new and patented form of lever or cap, which being entirely of steel, makes it practically indestructible. This new Knuckle Joint permits of great leverage, consequently the lever can be placed in position or removed with very little effort.

	Each
No. 18—Length 6 inches; 1⅝ inch Cutter; Weight 1⅝ lbs.	$2 90
No. 19—Length 7 inches; 1⅝ inch Cutter; Weight 1⅝ lbs.	3 10

With Iron Handle and Rosewood Knob extending from Rear to enable the User to conveniently work the Plane with both hands if desired. **Japanned Trimmings;** 1⅝ in. Cutters

	Each
No. 9¾—Length 6 inches; Weight 1⅝ lbs.	$2 90
No. 15½—Length 7 inches; Weight 1⅝ lbs.	3 10

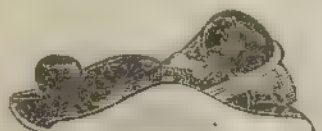
STANLEY ADJUSTABLE

Lever Adjustment

For light work. The cutter is adjustable endwise, the form of adjustment being known as the lever adjustment. The small boss cast on the front of the plane serves as a convenient finger rest for the operator. The bottom is ground true and the sides neatly japanned. Each

No. 103—Length 5½ inches; 1⅝ inch Cutter; Weight 1 lb. $1 20

Screw Adjustment



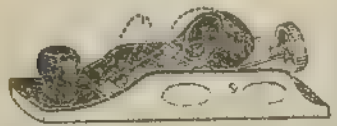
With Rosewood Knob on Front. In many ways better adapted for average use than any of the cheaper block planes made. It is ground on both bottom and sides. The cutter is made of high grade steel, is fastened by a lever cap, and is adjustable endwise by a screw adjustment operated from the rear of the plane. Each

No. 220—Length 7½ inches, 1⅝ inch Cutter; Weight 1⅝ lbs. $1 70

STANLEY SPECIAL

Double End, Non-Adjustable Hardwood Knob; Japanned Trimmings. Two slots and two cutter seats. The center seat and slot to be used for ordinary block plane work, the other slot and seat for use when it is desired to work same as a bull nose plane. Each

No. 130—Length 8 inches; 1⅝ inch Cutter; Weight 1⅝ lbs. $1 70



Double End, Adjustable Rosewood Knob; Japanned Trimmings; Combination block and bull nose plane. It has two slots and a movable cutter seat. Use center cutter seat and slot for ordinary block plane work. For use as a bull nose plane remove the cap and cutter, reverse the cutter seat by forcing to the position shown (dotted lines in cut), replace the cap and cutter in the new position. Also the "Hand-y" feature, and the cutter is adjustable endwise.

	Each
No. 131—Length 8 inches; 1⅝ inch Cutter; Weight 1½ lbs.	$2 90

Not Above One in a Box.

IRON BLOCK PLANES

STANLEY NON-ADJUSTABLE

For all kinds of ordinary work requiring the use of a block plane they are excellent tools. The cutters in all numbers are of a high grade of steel, and are as carefully tempered and ground as are those in the more expensive planes of this class. This is a very handy little plane for household use and many mechanics carry one in their kits for odds and ends of light work. The boss on the front acts as a finger rest. **The Bottom is ground and the sides japanned.**

Each

No. 101—Length 3½ inches; 1 inch Cutter; Weight ¼ lb. $0 50

Six in a Package.

With Iron Handle, Ground Bottom, Japanned sides. The Iron Handle fits nicely in the palm of the hand and insures a firm grip.

Each

No. 100—Length 3½ inches; 1 inch Cutter; Weight ⅝ lb. $0 66

One in a Package.

Ground Bottom; Japanned Sides. Boss on front acts as a Finger Rest. This is a light and serviceable Plane for general all around work.

Each

No. 102—Length 5½ inches; 1⅝ inch Cutter; Weight 1 lb. $0 90

One in a Package.

Black Stained Applewood Knob. Both the bottoms and sides are ground; Japanned Trimmings. The most popular of all non-adjustable Block Planes.

Each

No. 110—Length 7½ inches; 1⅝ inch Cutter; Weight 1⅝ lbs. $1.16

One in a Package.

LOW-ANGLE BLOCK PLANES

STANLEY

In the Low-Angle Planes the cutter rests on its seat at an angle of only 12 degrees. This angle permits of great ease in working across the grain on end grain work.

All cutters are made of high grade steel and are adjustable endwise by means of the adjusting wheel at the rear of the plane.

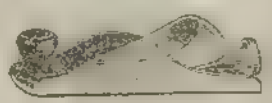
Adjustable Throat for Coarse or Fine Work. Length 6 inches; 1⅝ inch Cutter; Weight 1¾ lbs.

Each

No. 60—Nickeled Trimmings $2 70

No. 60½—Japanned Trimmings 2 40

One in a Box.



Solid Throat, Not Adjustable; Rosewood Knob; Nickeled Trimmings; The cutters are adjustable endwise and the planes are fitted with the "Hand-y" feature. On account of their size and simple adjustments, these planes will commend themselves to teachers of manual training.

Each

No. 61—Length 6 inches; 1⅝ inch Cutter; Weight 1¼ lbs. $2 30

No. 63—Length 7 inches; 1⅝ inch Cutter; Weight 1⅝ lbs. 2 80

One in a Box.

Adjustable Throat for Coarse or Fine Work with Patented Knuckle Joint Lever. Length 7 inches; 1⅝ inch Cutter; Weight 1⅝ lbs.

Each

No. 63 Nickeled Knuckle Joint $3.10

No. 65½—Japanned Trimmings 2.50

One in a Box.

LOW ANGLE JACK OR BLOCK PLANE

This Plane is especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained by the use of the ordinary Block Plane. It is fitted with a Rosewood Handle and Knob, and is designed to be operated with both hands.

Japanned Trimmings Each

No. 62—Length 14 inches; 2 inch Cutter; Weight 3⅝ lbs. $6.30

Rotary Multiple Ringing Foot Gong

Fig. 1088

There is no mistaking the ring of this gong, which can be varied from a single blow to a continuous alarm. Fifteen to twenty rings with each depression of the pin.

All exposed parts are highly nickel plated and the gong will not crack, chip or lose its tone, no matter what climatic conditions of service or weather it may be subjected to.

The attachment is simple and durable. There are fewer parts in it than in any other similar style gong and consequently less liability of getting out of order or expense to keep it in working order.

Star Power Hack Saw Machines

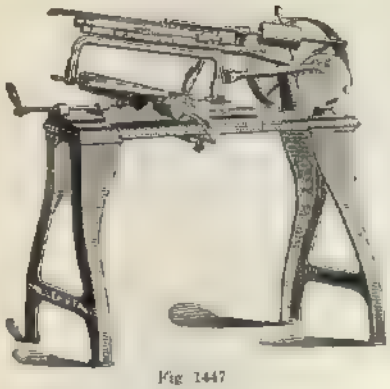

Fig 1447
No. 90

Gear drive gives great steadiness to stroke. Quick return of saw frame saves time, back stroke being twice speed of cutting stroke.

Saw frame slightly lifted on back stroke, prolongs life of blade.

Attachment holds the blade suspended just above work. Thus leaving both hands free for adjusting, etc. Support on bed prevents material from dropping off when cut is nearly finished. Adjusting screw takes up any wear on the arm. Working parts under the bed away from dust and dirt

Stops automatically when cut is made

Weight, boxed, 294 pounds; weight, crated, 258 pounds; weight, net, 215 pounds. Dimensions and all other descriptions same as No. 91. each $35 00

In all respects the same as machine No 90, except that it is provided with a swivel vise

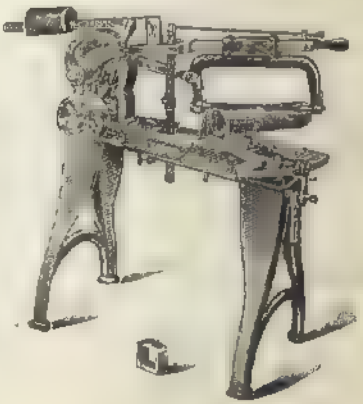

Fig 1448
No. 91

Peerless High Speed Metal Saws

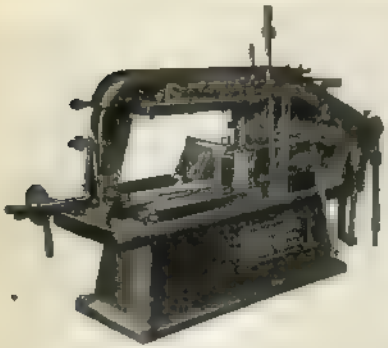

Fig 1449

It insures absolute alignment to all the working parts irrespective of how the machine may be set up. An irregular floor or a careless setting cannot affect the satisfactory operation of the Peerless High Speed The full [illegible] base also makes cleaning very convenient there is no open space under the machine to invite the accumulation of chips and dirt

In general you will find that the Peerless High Speed is designed throughout for long life and efficiency Special attention is invited to the ruggedness of design there are no complicated mechanisms nor delicate parts. The tool is so nicely designed and constructed that even though it is capable of the very heaviest work, still no degree of sensitiveness has been sacrificed

Speed—See instruction card.

Interchangeability is secured through the use of elaborate jigs and fixtures in the manufacture of the Peerless High Speed. This insures the easy renewal of broken parts and avoids the necessity of expensive hand fitting. This machine is not like the majority of hack saws, a product of a foundry, but is a machine tool of the highest grade

In general you will find that the Peerless High Speed is designed throughout for long life and efficiency. The main shaft is 1⅝-inch diameter with a main bearing 5½ inches long The driving pulley and the crank shaft disc are securely keyed to the main shaft, avoiding any possibility of their loosening at high speeds. The crank pin and wrist pin are of steel hardened and ground to exact size, and are 1-inch in diameter and 1⅛ inches long The connecting rod at the crank pin end is provided with a cap for taking up the wear, while at the wrist pin end a solid bronze bushing is fitted which may be easily renewed in case of wear

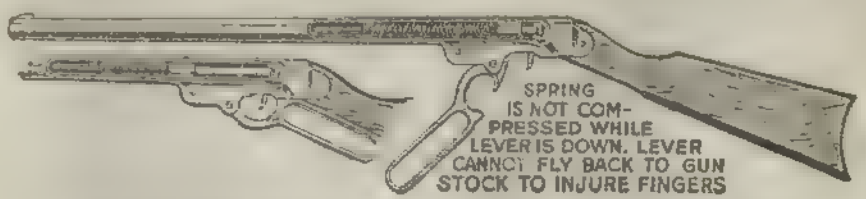
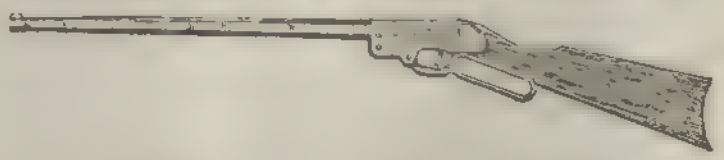
STERLING AIR RIFLES

FULLY GUARANTEED

These Air Rifles are Made of the Best Materials and Involve Only the Newest and Simplest Mechanical Construction. They Cannot be Discharged Until the Lever Has Been Pushed Down. The Gun Stock Cannot be Injured by The Safety is Automatic and No Safety Catch is Needed or Used. They are Provided with an Inner and Separate Compression Chamber Reinforced to withstand Extra Strong Shooting Force. All Working Parts are Enclosed in this Compression Chamber. The Plunger Rod and Trigger are Each Made of One Piece of Steel, Case Hardened and Will Not Break or Wear. No Cast Iron Use. Flat Wire Springs that will not Set or Break are Used, and are Fully Tested Before Assembled in Guns. Full Directions for Using Sent with Each Rifle.





MODEL G—LEVER ACTION, REPEATER

Magazine Holds 1,000 Air Rifle Shot; Loads Automatically by Operating Lever; Action of Lever Easy and Smooth; Automatic Shot Retainer; Prevents Shot from Rolling Out of Barrel.

Black Walnut Stock, Natural Finish; Gun Metal Finish; Octagonal Tapering Barrel and Frame.

Per Dozen

No. G—1,000 Shot; Length 35 inches; Weight per Dozen about 35 lbs. **$48 00**

One Dozen in a Case

MODEL F—LEVER ACTION, REPEATER

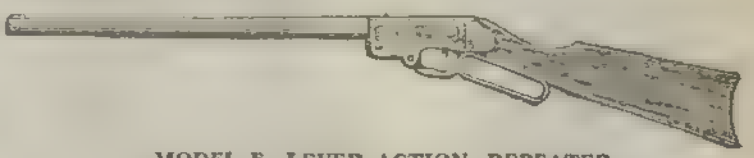
Magazine Holds 500 Air Rifle Shot; Loads Automatically; Action of Lever Easy and Smooth; Automatic Shot Retainer; Prevents Shot from Rolling out of Barrel.

Black Walnut Stock, Natural Finish; Gun Metal Finish, Octagonal Tapering Barrel and Frame.

Per Dozen

No. F—500 Shot; Length 33 inches; Weight per Dozen about 33 lbs. **$39 00**

One Dozen in a Case



MODEL E—LEVER ACTION, REPEATER

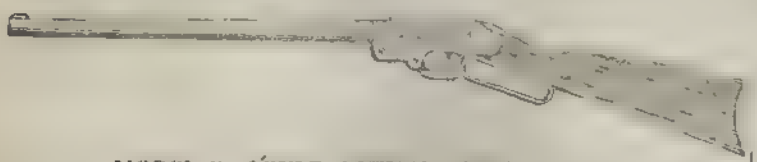
Magazine Holds 350 Air Rifle Shot; Lever Action; Smooth and Perfect; Automatic Shot Retainer; Prevents Shot from Rolling Out of Barrel.

Walnut Stock, Dull Finish; Gun Metal Finish, Round Tapering Barrel.

Per Dozen

No. E—350 Shot; Length 31½ inches; Weight per Dozen about 32 lbs. **$33 00**

One Dozen in a Case



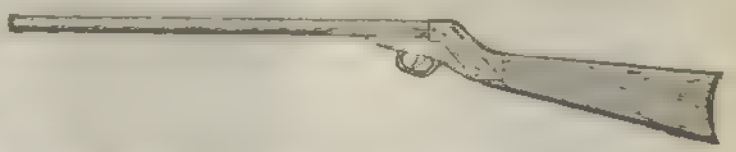
MODEL D—LEVER ACTION, SINGLE SHOT

Shoots Air Rifle Shot; Accurate and Strong; Walnut Stock, Dull Finish; Gun Metal Finish, Round Tapering Barrel.

Per Dozen

No. D—Single Shot; Length 31 inches; Weight per Dozen about 25 lbs. **$24 00**

One Dozen in a Case



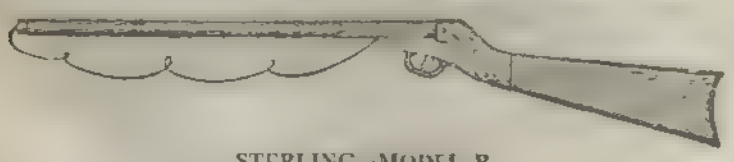
MODEL C—SPECIAL SINGLE SHOT; BREAK DOWN ACTION

Shoots Air Rifle Shot; Substantial Construction; Shoots Strong and Accurate; Stock Rigidly Attached to Frame; Reinforced Barrel, Highly Nickel Plated.

Per Dozen

No. C—Single Shot; Length 29 inches; Weight per Dozen about 20 lbs. **$12 00**

One Dozen in a Case



STERLING—MODEL B

A Perfect Air Pop Gun; Shoots Cork; Makes a Lot of Noise but Does No Damage; Substantial Construction; Walnut Stock Rigidly Attached to Frame, Barrel Highly Nickel Plated.

Per Dozen

No. B—Pop Gun; Length 20 inches; Weight per Dozen 20 lbs **$12 00**

One Dozen in a Case

STERLING—RIFLETTE

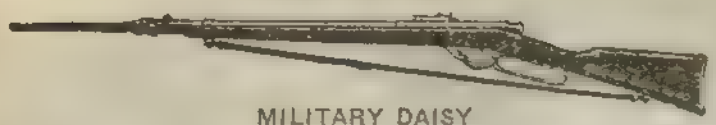
Shoots a Cork Attached to End of a String; Makes a Loud Noise but Does No Damage; High Class Construction; Easy and Smooth Lever Action; Black Walnut Stock Shaped and Polished, Round Barrel Nickel Plated and Polished.

Per Dozen

No. A—Riflette; Length 17 inches; Weight per Dozen about 6 lbs. **$5 50**

One in a Carton; One Gross in a Case; Weight per Case 70 lbs.

AIR RIFLES



MILITARY DAISY

Lever Action—Repeater

Every detail designed after the latest military rifle, a Repeater; has all the Hard-hitting, Accurate Daisy qualities—just the Gun for Drill as well as for Target Shooting.

While this Air Rifle shoots Strong and Accurately, it Avoids the Danger of ordinary Firearms. The Dart has a Brass and Rubber point so as to render it harmless.

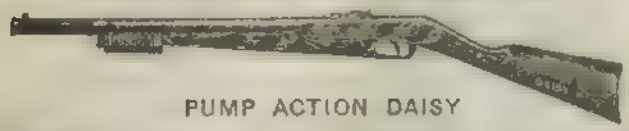
This Rifle is a Model Repeater and Uses a Barrel that it Can be Fired in any Direction without Losing a Shot.

In all Daisies, this Military Type is as Carefully Designed, Made and Finished as a Man's Rifle. It has a Beautiful Walnut Finished stock. All Metal Parts are Finished in Gunblue. The Rear Sights are Open and Adjustable. The Front Sight is of the Knife Type. The Rifle comes Complete with Sling and Swivel.

Per Dozen

No. 40—Shoots Air Rifle Shot only; Weight 3¾ lbs.; Length Over All 42 inches..... $66 00

One in a Box; Six in a Case; Case Weighs 30 lbs.



PUMP ACTION DAISY

A GENUINE PUMP ACTION REPEATER—TAKE DOWN MODEL

This is the Very Latest Improvement in Air Rifles and for Appearance and Effectiveness this New Pump Action Daisy Compares Favorably with the Finest of Small Arms on the Market.

A Simple "Take Down" System Permits the Rifle being Taken Down and Put Together Easily and Quickly.

This Rifle is very Effective for General Air Rifle use, Being Very Accurate and Powerful up to 25 or 30 Feet, And Specially Designed for the House, Club or for Target Practice.

The Loading Action is Automatic and Operated by Pulling the Slide Forward by the Stock. The Smoothest and Simplest Action ever Invented. Uses Round Lead Shot, Is Magazine Having a Forty Shot Capacity.

Barrel—Made of Good Grade Steel, Non-Rusting Gun Blue; Adjustable Front and Rear Sights.

Frame—Pressed Steel; Non-Rustable Gun Blue Finish.

AUTO HORNS.

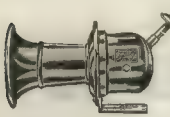
HAND OPERATED.

STEWART HORN

Very easy to operate, the slightest touch of the hand or elbow brings forth a clear penetrating tone.

Each

No. 114A—Stewart Hand Operated; finished in baked on black enamel, nickel trimmed; weight each packed 3½ lbs. $6.32



Equipped with special tempered diaphragm which produces a clear distinct warning signal. Made of the very best material throughout.

Each

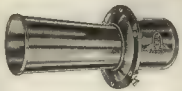
No. 151B—Stewart Hand Operated Horn; finished in black enamel; wgt. each packed 2¼ lbs. $5.00

MOTOR DRIVEN.

The model 157A is equipped with large diaphragm 5½ inches in diameter and made of the best tempered steel. Its projector is 8 inches long with a 4-inch opening at the end. The scientific relationship between the size of these and their bigness produces a compelling warning note of deeper pitch, greater volume and utmost carrying qualities.

Each

No. 157A—Stewart Motor Driven Horn; straight type for underhood mounting. $20.00



Its motor is Stewart-built and embodies a new improved design of magnetic circuit. The armature is large. Gives greater power with less current. The electrical connections are soldered direct to the brushes, assuring perfect contact at all times. The diaphragm is made of high grade tempered steel. Scientifically designed to produce the greatest tone volume and the purest note.

Each

No. 154A—Stewart Motor Driven Horn; with straight projector for underhood mounting. $8.66

The Stewart has a real motor. Its rotary motion, transmitted through an over sized vibratone-steel diaphragm, an exclusive Stewart feature, produces a full, piercing, far-reaching warning that gets instant action.

Each

No. 136A—Stewart Motor Driven Horn; with straight projector for underhood mounting. $13.32

Each

No. 136C—Stewart Motor Driven Horn; same as No. 136A, except with bell shaped projector for outside mounting. $13.32

No. BEW2⅞S Same as BEW2½, except equipped with ⅞-inch extension spark plug for Buick, Chevrolet and other cars using a ⅞-inch extension spark plug. 10.90

MOTO-METERS

A broken oil pump, open pet cock, loose fan belt, lack of oil or water from any cause whatever—all result in increased radiator temperature. The Moto-Meter, attached to the radiator cap, is an accurate indicator of radiator heat. The rise of the broad red column is a sure danger sign. In short, it gives your motor the power of speech before it shrieks at you. It signals plainly—"there is something wrong under the hood—stop and fix it or look out for trouble."

Standard—Black and nickel, or brass Glass crystals on both sides..Each $10.00
Junior—Black dial with nickel or brass finish .....Each 5.00
Special—For Ford cars. Same as Junior but including special radiator cap. Each 5.50
Midget—Black and nickel ....Each 2.50

One in a Box

7	[illegible]	10	[illegible]	180 00
8	[illegible]	13	[illegible]	250 00
9	16 x[illegible]	16	6[illegible]	325 00
10	[illegible]	18	[illegible]	450 00

Nos. 0000 to 3 [illegible] only one pulley, mounted on shaft between [illegible]. Larger sizes have two pulleys. All sizes [illegible] can be belted by [illegible] Nos. 4 to 10 are the only [illegible] with adjustable bed.

Although originally designed for [illegible] connection with cupola furnaces and forges, these blowers are adaptable for any purpose where pressures up to 16 ounces per sq. inch are to be maintained. The shell is of cast iron, the shaft of high grade steel, carefully finished, and the wheel of thin galvanized steel [illegible] on extra strong arms and accurately balanced. The great length and special oiling [illegible] of the journal boxes render them practically non-heatable.

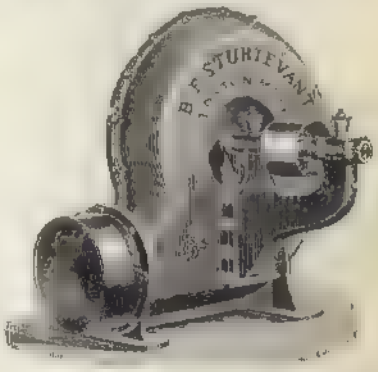

Fig. 6

"Monogram" Fans

The "Monogram" Fans, so called because of monogram "B. F. S." on side, are built either as blowers, with two inlets and a bearing on each side, as below, or as exhausters, with inlet on [illegible]. They are distinctively volume fans, with [illegible] of pressure at 4 or 5 ounces per square inch. The shells are of cast iron and construction of same high grade as the steel pressure blowers.

No. of Blower or Exhaust	Diam. and Face of Pulley in Inches	Outside Diam. of Outlet in Inches	Outside Diam. of Inlet of Exhaust in Inches	Weight in Pounds Not Packed		Price

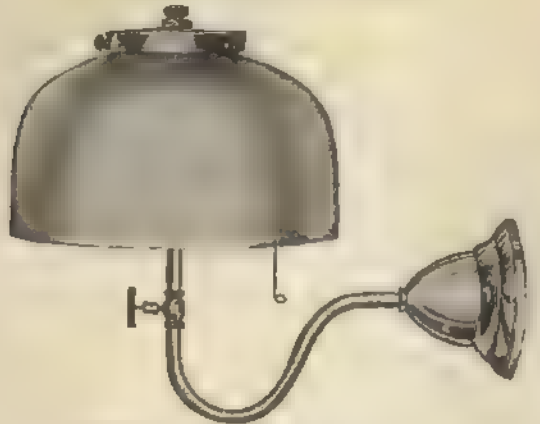
BARGAINS IN GASOLINE SPECIALTIES

GASOLINE produces the MOST POWERFUL artificial LIGHT known next to sunlight

ECONOMICAL CONVENIENT SAFE RELIABLE



THE SUNGLOW PORTABLE WALL LAMP (Nickel)
No. 207—400 Candle Power
Weight, 4½ lbs. Length, 14½ inches
Furnished for either Indoor or Outdoor Use

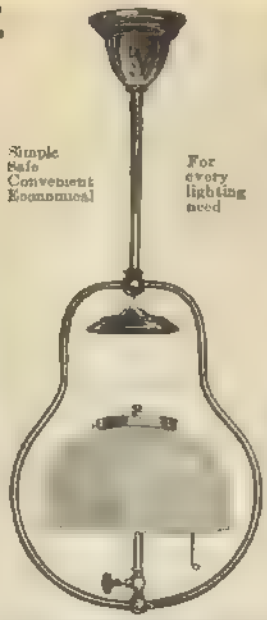
The No. 207 SUNGLOW WALL LAMP is designed for use in rooms with low or extremely high ceilings, and for lighting porches, dining rooms, bedrooms, offices, banks, boats, camps, and many other places where it is desirable to keep the lamp in use and where hanging or the stand lamp would not be advisable.

It is constructed with utmost care and best of material obtainable, thoroughly tested and inspected, insuring perfect satisfaction.

The No. 207 can also be equipped with the chimney cage and mica chimney used on the Storm King Lantern and thus becomes an excellent outdoor lamp.

No. 207 Indoor Wall Lamp, complete with pump, lighter, shades, two sets of mantles, and an extra rubber washer
List Price, Each $14 00

No. 208 Outdoor Wall Lamp with No. 7 mica, two sets of mantles, pump, lighter, and extra rubber washer
List Price, Each $15 10



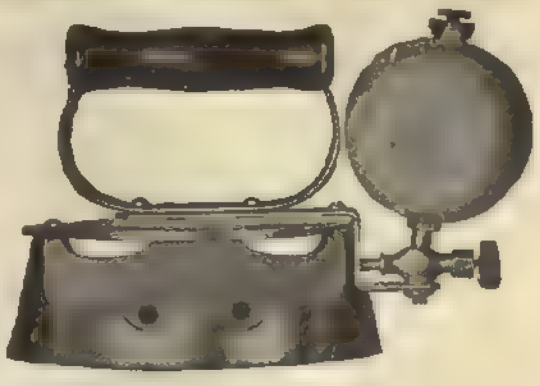
THE SUNGLOW PORTABLE HANGING LAMP (Nickel)
No. 203—400 Candle Power

The No. 203 SUNGLOW PORTABLE CEILING LAMP with new thread top is adapted for use everywhere—lighting stores, offices, factories, stores, mills, etc., and when equipped with the upright chimney and holder it is a most suitable hanging lamp for porches, lawns, tennis and driveways, buildings.

All parts are interchangeable with the parts of all other lamps of this series. Lengths over all, 22 inches with 11 inch rod. Weight 4 lbs. net. Packed singly, 10 lbs. gross, 2 lbs. singly by parcel post.

No. 203 Sunglow Indoor Hanging Lamp with two sets of mantles, No. 206 shades, pump, lighter and extra rubber washers
List Price, Each $15 75

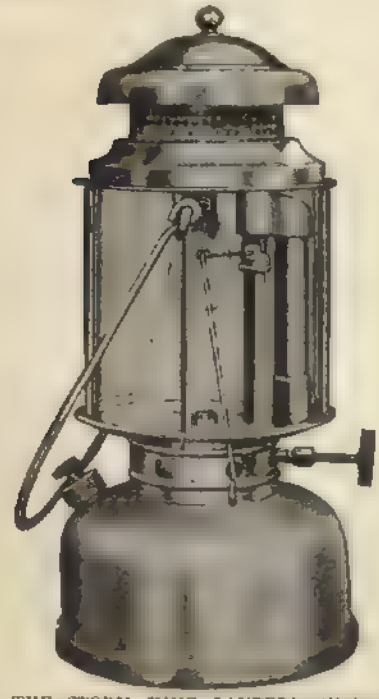
No. 203 Sunglow Outdoor Hanging Lamp, same as above, but with mica chimney and holder, complete
List Price, Each $16 75



THE COMFORT TWO POINT GASOLINE IRON (Nickel)
Easily Adjusted Always to be Trusted
Capacity, ¾ pint. Weight, 6½ lbs.
Operates 5 continuous hours on one filling. 15½ square inches of ironing surface.

Two Points—Both ends are Front Ends

The advantages are so many that no household can afford to be without one. The cost is insignificant when compared with results obtained that it is positively throwing money away to continue using the old out-of-date appliances. Quick lighting. Quick removable, self-cleaning generator. Positive shutoff against pressure.
No. 1 Each. $8.40



THE STORM KING LANTERN (Nickel)
250 Candle Power
Storm and Rain Proof
Automatically Cleaned, Cannot Clog
Guaranteed Safe and Efficient

The Nulite Storm King Lantern should be of interest to campers, hunters, summer resorts, street shows, circuses, railroad yards, freight houses, way stations, docks, wharves, camp meetings, military encampments, street lighting in small towns, and for farmers and householders everywhere.

It is an efficient, safe, reliable, powerful and economical light, absolutely storm proof and will burn anywhere and in any position. It is very simple in construction and in operation, easy to light and extinguish and can be taken apart in a few seconds if desired. It is equipped with our regular automatic tip cleaner which prevents clogging.

No dirty chimneys to wash, no wicks to trim, no smoke, no smell, no dirt, no danger, cheaper than kerosene, more efficient than electricity.

Weight, 4½ lbs. filled; height, 13 inches. Capacity, 1 quart of gasoline burns 15 hours on one filling, and produces about 250 candle power. Equipped with rag mantle, mica chimney, pump and lighter. Put up in cartons weighing 5 lbs. each.
No. 2 Each. . . $13 50

THE NULITE HANDY CAMP STOVE (Nickel)
Weight complete 5½ lbs. 8 inches high and 6 inches in diameter
Operates 6 hours on one filling of gasoline (one quart)

This is one of the most convenient articles ever made and adapted to such a large variety of uses that the field for its sale is practically unlimited.

Campers, hunters, soldiers, travelers, motorists, show people, construction and surveying gangs, miners, lumber camps, prospectors, etc., find the Nulite Camp Stove to be the very thing they have been seeking, for both cooking and heating purposes.

It produces as much heat as a 5-inch gas burner, and there is no smell, no smoke and no dirt. It generates quickly and costs a little to operate. Is safe and reliable and can be carried from place to place without waste in operation by means of wire case or handle with which it is equipped.

The heat can be regulated perfectly by means of a regulating valve so that a high or low heat can be obtained and maintained at will. Takes no priming and weighs as it burns in operation and its quick lighting qualities make it a very convenient and desirable article for the use of almost everyone.

The Nulite Camp Stove is packed in individual cartons weighing 5 lbs. each, which includes pump, funnel, alcohol bottle, lighter and instruction sheet.
No. 3 Each $11 25

250 C. P.
80 hours on one gallon of ordinary stove gasoline. Automatically cleaned. Weight, 6 lbs. Height, 22 inches. Quick removable generator. All parts interchangeable. Beautiful Hand painted 4 Color China Shade. Shade lifts off without disturbing working parts. 2 small high grade mantles. Fount holds one quart. Operates 14 hours on one filling. Finish nickel plated.

FEATURES
Simplicity, Safety, Economy, Efficiency, Convenience. Adaptability, Durability, Reliability, Ease of operation, High Candle Power, Style and Beauty. Light is adjustable. Operates on low pressure. Constructed by experts. Mantles, shade and pump furnished free with each lamp. All working parts renewable but seldom necessary. Guaranteed.

THE "NULITE FAVORITE" PORTABLE READING LAMP
Decorated China Shade (4) Colors
Automatically Cleaned, Positively Cannot Clog
(Nickel)

Portable lamp is pronounced by everyone who has seen it, the last word in gasoline lamp perfection. It is exceptionally beautiful, neat and convenient size and style, attractively finished in nickel, oxidized copper, brushed brass or polished brass, and equipped with a hand decorated china shade; it is easily the most beautiful gasoline lamp ever produced and as a household utility it is certainly a greater advantage in the modern household than any other article. It saves time and money for the user, adds comfort and cheer to the home, makes for comfort, cheerfulness and well being everywhere. It is artistically designed, perfectly constructed and produces a powerful white light of a quality unequaled except by sunlight.
No. 4 With Decorated Shade Complete. Each $16 80
No. 5 With Plain White Shade. Complete Each..... $16.10

CELEBRATED FRANCO ELECTRICAL PRODUCTS—FULLY GUARANTEED

The Franco wireless feature prevents breakage of connections, and the cases are so constructed that they cannot short-circuit when in contact with metal. One of the most common causes for trouble in flashlights is the corrosion and consequent breaking of the connection caused by leaky batteries. This wireless feature of the Franco Flashlights eliminates this trouble.

Franco Reflectors are correct in every particular and throw a brilliant, white light without any spots

Franco Radio Batteries are packed one each in sealed cartons, insuring fresh goods, and are fully guaranteed. Strong in service and recuperating powers

★DIAMOND AUTOMATIC

For Fly Fishing

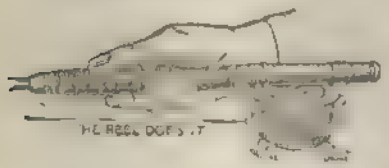
Mechanical Features

A decided improvement in Automatic Reels: Mechanism is very simple, and not likely to get out of order; Main shaft is of carbon Steel; substantial in size and runs in German Silver Bearings.

Spring is of the finest tempered Steel: All working parts are enclosed.

Anyone can take this reel apart and put it together in less than five minutes.

Reel fully guaranteed.



Desirable Features

This reel has an exclusive feature in a Safety Winding Spring, which allows the spring to be wound up at any time when line is in or out, by turning the milled spring box, without any danger of overwinding.

Spool has friction release which allows stripping of spool under all conditions.

Spool is fitted with safety release, which allows the spool to be run in at any speed without any fear of injuring the mechanism.

The line is guided by metal **Rollers**; This prevents the line from being injured and worn, as is the case of all other [illegible]

Will Wind 60 Yards of Line with One Winding of the Spring.

General Features

Reel can be used on reel-seat above or below; Particularly desirable for brook trout or fly fishing, where the line has to be lengthened and shortened so many times in fishing around brush, etc. A fish once hooked can never get any slack line if the finger is kept on the brake controller or the brake controller is pushed into the slot and kept out of action; The Reel will then do the rest without the use of the little finger; Of course, the spring is not supposed to be strong enough to reel in a large fish of its own accord; The rod is supposed to do this by raising the tip of the rod (which brings up the line,) then letting it back again quickly, which gives the Reel the slack line to take up, and this it will do before the fish can take it; [illegible]

Aluminum; Satin Verde-Bronze [illegible] Finish; Best Quality Tempered Steel Spring; Hard Brass and Steel Working Parts; Fully Guaranteed.

Per Dozen

No. DA—Capacity 100 yards No. 5 Line; Diameter of Spool 3 inches; Width of Spool ¾ inch; Actual Weight Each 7½ ozs.; Shipping Weight per Dozen 9 lbs. $90 00

Twelfth Dozen in a Box

FISHING REELS

MARTIN AUTOMATIC

For Fly Fishing

The Spring Drum is made from a single piece of Aluminum reinforced by a Brass Shell. The Ends of the Main Spring are drawn to the proper temper to prevent Breakage.

The Rim is of Hard Brass and encircles Drum of Reel in Final Assembling.

The Line Spool is made from two Brass Discs joined together by six Brass Posts.

The Reel Seat or Saddle is straight and of such length to insure a secure footing for the reel on the Rod.

The Friction Clutch maintains the same friction at all times.

The Lock Brake is hung on the same bearing that carries the brake shoe and brake shoe housing lever.

The Secondary Gear runs on a hardened Steel Bearing.

The Brake Shoe and Brake Housing Lever are hung on a single bearing which forms a rigid support.

The Throw Off sustains the tension of the Main Spring when wound and allowing the release of the Spring when not in use. Made of a single piece of Brass.

The Bearings are Bronze on Steel or Hardened Steel on Hardened Steel.

Per Dozen

STORE LADDERS.

THE MILBRADT.

Made to fit any kind of shelving; good oak lumber, handsomely finished; perfectly safe as they cannot jump the track. Take little space; run noiselessly and easily; extra wide shelf at top. All iron work on ladders, as well as supporting brackets, is malleable and aluminum bronzed.

How to Measure—Give height from floor to top of base shelf, width from front of base shelf to front edge of upright, height from base shelf to top of shelf to which track is to be fastened

No. 1. No. 2. No. 3.

For wood track only.

Each

No. 1—Bent; has paper filled wheels running on steel track; fastened to shelving with rubber wheels against base shelf.....$14.00

No. 5—Straight; otherwise same as No. 1..... 13.00

No. 4—Straight; same as No. 1 or No. 5, used on shelving without base shelf and provided with swinging arms... 13.00

No. 2—Bent; floor ladder; used where shelving is not strong enough to use other styles; top runs on wood track fixed to shelving, but weight of ladder is on wheels resting on floor; adjusts itself to uneven floor; uses wood track only..... 14.00

No. 3—Bent; runs on steel track; fitted with swinging arms for narrow shelf base; ladder made from oak and fitted with running parts except track brackets..... 14.00

EXTRAS.

Per Foot

Wood Track—For No. 2 ladders..... $0.20

Regular Aluminum Bronzed Track—With brackets..... .35

Extra Strong Aluminum Bronzed Track—With brackets . .40

A strong store ladder for use when shelving is not so arranged that ladders can be conveniently applied to it. Runs on steel track; top wheels are paper filled; lower wheels are rubber tired. Ladder runs noiselessly and easily. Made from oak, natural finished and varnished. Fully equipped with a complete set of fixtures (except track and brackets).

How to Order—Give exact height from floor to ceiling, also state number of feet of steel track wanted.

Each

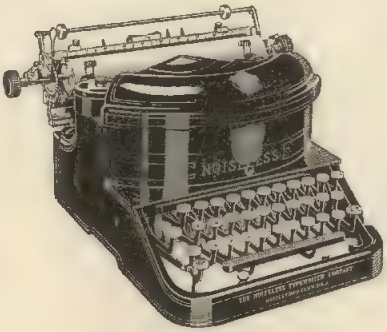
No. 12—Straight; runs on 1-inch steel track and rests in strong artistic brackets which are screwed to ceiling; furnished with complete set of fixtures.....$13.00

Per Foot

No. T12—Track; for above ladder $0.35

This cut shows part of top fixture for ladder No. 2; it also shows special hardwood track that it runs on only.

Track and Brackets are not furnished with ladder and must be ordered extra.



The Noiseless Typewriter

Increases productive power by giving the mind a fair chance.

Hence at a time of world crisis it is the helpful servant of those who with intense effort are bending their energy to accomplish great results.

Readers of this Magazine will be interested to learn that the Noiseless Typewriter is used exclusively in the office of the American City.

Send for literature and an impressive list of users; or better still, ask for a demonstration and test at your own office.

GAMES IN ASSORTMENTS
TIP TOP SERIES

HOME HISTORY GAME

That stirring picture, "The Spirit of '76," illustrates this label, and in playing the game children will learn many historical facts.

GYPSY FORTUNE TELLER

Here is a good fortune-telling game which will predict a good many probable and sensible incidents and a lot of others put in just for fun. Any number can have their fortunes told at the same time, and, no two will be exactly alike. It has all the fascination of Gypsy fortune telling, and the label bears a picture of one of the dusky horde, bracelets, bangles and all.

AUTHORS

William Shakespeare in deep meditation graces the label on this box, and before him burns the lamp of knowledge. On the cards are good portraits of Washington Irving, Oliver Wendell Holmes, Henry W. Longfellow and various other more or less modern authors. It is a thoroughly satisfactory set in every particular.

DR. BUSBY

Here we find the genial doctor pictured on his way to visit a sick patient and on the cards we find pictures of his numerous relatives and friends. The card designs are very funny, and finely lithographed in several colors. Dr. Busby is a game that never grows old, and this edition is exceptionally attractive for the price.

ANAGRAMS

There is no easier way for a child to learn the spelling of words than by playing Anagrams. In matching the letters he learns almost unconsciously to spell many simple words which make up the spelling lesson in school. This edition is provided with a very liberal quantity of letters printed in plain bold type on a good quality of board. The new box label is bright and attractive.

JACK STRAWS

These Straws are well made and furnish a good assortment at a low price. Each box contains a liberal quantity of the straws, and the label is very cleverly illustrated with a picture of the "straw man," or scarecrow.

LOST HEIR

In this game, police of many cities, represented by the players, make thorough search for the "lost heir." Ofttimes a wrong clue is followed and when the supposed lost heir is captured it proves to be the "wrong boy"—a counter card to the "lost heir."

PETER CODDLE

On this label our old friend Coddle is taking a ride down Broadway on a skittish pig, chased by a frantic policeman. The sixteen-page narrative is bright and up-to-date, and the cards of missing words are designed to make the story as ridiculously funny as possible.

MERRY-GO-ROUND

An especially novel game played with ninety cards representing parts of a merry-go-round, from the whistle to the attendant. "Brass Rings" and "free rides" are here and so are "accidents." New and interesting method of play. Every child will be enthusiastic over this clever little game.

CINDERELLA

The old story of Cinderella told by cards in a unique game. Here one may renew the acquaintance of the fairy godmother, the royal prince, the beautiful Cinderella and other characters. New designs lithographed in colors make the cards for this game unusually attractive.

SNAP

All kinds of snaps are represented in this game, which in itself is full of snap. The cards are lithographed in bright colors, and the box label is new and "snappy." A good edition of a popular game at a low price.

Per Dozen

No. 205—Assorted Games as Described Above; Boxes 6¾x5½ Inches with Brilliantly Colored Gold Border Labels, Enameled Finish; Weight Per Dozen 4½ lbs. **$1 80**

One Dozen Assorted in a Package.

GAMES IN ASSORTMENTS
GOLD SERIES

MODERN AUTHORS

Fine half-tone portraits of present-day authors reproduced on enameled, round cornered cards. Box is covered with blue embossed paper stamped in two colors of ink leaf.

OLD MAID

A fine set of enameled, round cornered cards, lithographed in colors. Box covered with dark red embossed paper, with labe stamped in black and white ink leaf.

JACK STRAWS

A fine set of plain uncolored "straws" put up in beautiful embossed box. The straws are of a variety of unique forms and each one numbered. The box is a rich dark green, stamped with yellow leaf.

PETER CODDLE

This old standard game in its new dress is undoubtedly the most attractive edition of Peter Coddle on the market. The box is covered with royal purple embossed paper, stamped in black and white ink leaf.

KIT CAT

A new and clever card game, consisting of a pack of fifty-two cards; our sets of ten cards each, numbered from one to ten, each set having, a picture of a cat upon it.

FUNNY CONVERSATION CARDS

These cards contain comical questions and answers. The gentleman reads the question cards and the lady those with the answers. The cards are shuffled and the top card taken each time. This makes a great variety to the play and brings out some funny and often astonishing replies. Some hilarious conversation is the result.

WIDOW McCARTYS PIG

This game is a fun producer for a whole roomful. It is very easy to learn and will prove a great game for a party of either young or old people.

GET BUSY

A very laughable game with an original method of play. Each card tells what a player is to do, that is, to make some cry or sound to imitate an animal. When the signal is given the player who is first heard wins.

DOWN THE PIKE

A reading game that has made itself popular all over the country. No "Brain Fatigue" in this—all fun and jollity. It's learned quick and played fast. Any number can play.

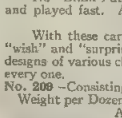
WIZARD FORTUNE CARDS

With these cards one can read the past, present and future, and a "wish" and "surprise" are also provided for. The cards bear illustrated designs of various characters and objects which influence the fortunes of every one.

Per Dozen

No. 209—Consisting of the Above Games; Size 5½x7¼ inches. Weight per Dozen 6 lbs. **$4.50**

Assorted, One Dozen in a Package.



SNAP SERIES

LOTTO

This game has wooden markers in four colors, and numbers printed in colors on card, to be cut up. The Lotto cards are also printed in colors. For two to four players.

ANAGRAMS

This game, which can be played by any number of players from two to six, consists in the formation of words by the use of small cardboard tablets, each having on one side a single letter.

AUTHORS

Some of the authors represented in this set are: Irving, Cooper, Burns, Dickens, Scott, etc., and the portraits are as good as ordinarily found in much higher-priced editions

JACK STRAWS

The straws in this box are of four colors, and of different shapes.

SNAP

These cards are embellished with original picture designs and printed in colors.

PETER CODDLE

An abridged version of Peter Coddle's Trip to New York.

LITTLE RED MEN

A game that will appeal strongly to boys. The cards bear pictures of Indians, Canoes, Wigwams, Horses, Tomahawks, and other things associated with Indian life, lithographed in colors.

OLD MAID

Nineteen picture cards, printed in colors, with attractive designs.

WILD FLOWERS

Pictures of many beautiful flowers in natural colors make this a very attractive game.

DR. BUSBY

The lithographed label on this box shows Dr. Busby selling his famous remedies at a country fair

MOTHER GOOSE

A simple and entertaining game for young children with cards picturing Jack Horner, Little Boy Blue, Cinderella, Red Riding Hood and other Mother Goose characters. Best in Full Packages

Per Dozen

No. 202—Assorted Games, as Described Above, Boxes 4¾x3¾ Inches, with Brilliantly Colored Gold Border Label, Enameled Finish, Weight Per Dozen 3 lbs. **$0 92**

GOLD SERIES

MODERN AUTHORS

Fine half-tone portraits of present-day authors reproduced on enameled, round cornered cards. Box is covered with blue embossed paper stamped in two colors of ink leaf.

OLD MAID

A fine set of enameled, round cornered cards, lithographed in colors. Box covered with dark red embossed paper, with label stamped in black and white ink leaf.

JACK STRAWS

A fine set of plain uncolored "straws" put up in beautiful embossed box. The straws are of a variety of unique forms, each one numbered. The box is a rich dark green, stamped with yellow leaf.

PETER CODDLE

This old standard game in its new dress is undoubtedly the most attractive edition of Peter Coddle on the market. The box is covered with royal purple embossed paper, stamped in black and white ink leaf.

KIT CAT

A new and clever card game, consisting of a pack of fifty-two cards; our sets of ten cards each, numbered from one to ten, each set having, a picture of a cat upon it.

FUNNY CONVERSATION CARDS

These cards contain comical questions and answers. The gentleman reads the question cards and the lady those with the answers. The cards are shuffled and the top card taken each time. This makes a great variety to the play and brings out some funny and often astonishing replies. Some hilarious conversation is the result.

WIDOW McCARTYS PIG

This game is a fun producer for a whole roomful. It is very easy to learn and will prove a great game for a party of either young or old people.

GET BUSY

A very laughable game with an original method of play. Each card tells what a player is to do, that is, to make some cry or sound to imitate an animal. When the signal is given the player who is last heard wins.

DOWN THE PIKE

A reading game that has made itself popular all over the country. No "Brain Fatigue" in this. All fun and jollity. It's learned quickly and played fast. Any number can play.

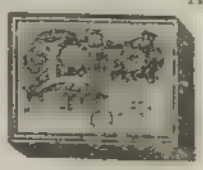
WIZARD FORTUNE CARDS

With these cards you can read the past, present and future, and a "wish" and "surprise" are also provided for. The cards bear illustrated designs of various characters and objects which influence the fortunes of every one.

Per Dozen

No. 209—Consisting of the Above Games; Size 5½x7¼ inches; Weight per Dozen 6 lbs..... **$1 50**

Assorted, One Dozen in a Package.



SNAP SERIES

LOTTO

This game has wooden markers in four colors, and numbers printed in colors on card, to be cut up. The Lotto cards are also printed in colors. For two to four players.

ANAGRAMS

This game, which can be played by any number of players from two to six, consists in the formation of words by the use of small cardboard tablets, each having on one side a single letter.

AUTHORS

Some of the authors represented in this set are: Irving, Cooper, Burns, Dickens, Scott, etc., and the portraits are as good as ordinarily found in much higher-priced editions.

JACK STRAWS

The straws in this box are of four colors, and of different shapes.

SNAP

These cards are embellished with original picture designs and printed in colors.

PETER CODDLE

An abridged version of Peter Coddle's Trip to New York.

LITTLE RED MEN

A game that will appeal strongly to boys. The cards bear pictures of Indians, Canoes, Wigwams, Horses, Tomahawks, and other things associated with Indian life, lithographed in colors.

OLD MAID

Nineteen picture cards, printed in colors, with attractive designs.

WILD FLOWERS

Pictures of many beautiful flowers in natural colors make this a very attractive game.

DR. BUSBY

The lithographed label on this box shows Dr. Busby selling his famous remedies at a country fair.

MOTHER GOOSE

A simple and entertaining game for young children with cards picturing Jack Horner, Little Boy Blue, Cinderella, Red Riding Hood and other Mother Goose characters. Less than Full Packages Per Dozen

No. 202—Assorted Games, as Described Above; Boxes 4¾x3¾ Inches; with Brilliantly Colored Gold Border Labels, Enameled Finish; Weight Per Dozen 3 lbs..... **$0.92**

One Dozen Assorted in a Package.

TINNERS' TOOLS

COMPOUND LEVER VEST POCKET SNIPS

Made of crucible steel, polished, suitable for 24 gauge metal and lighter, weight 5 oz.
No. 7L—Length 7 in., cut 1¼ in...Each $2 00
One Pair in a Box

DOUBLE CUTTING SHEARS

Forged from high grade steel, scientifically tempered and hardened, black handles and polished heads. Blades can be inserted in metal at any point. Carefully assembled to permit a joint of pipe to be cut with ease and accuracy, leaving the edges smooth and clean.

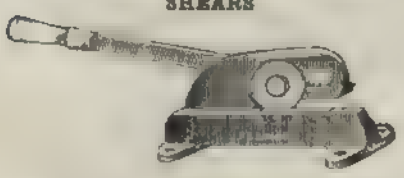
No. 22DC—Length 8½ in.....Each $2 25
One Pair in a Box

Double-Cutting Shears and Pipe Crimper
No. 2DC—Length 12¾ in.....Each $3.60
One Pair in a Box

SQUARE PIPE CRIMPER

Will contract or crimp the corners in square pipe, making assembling of square pipe joints a quick and easy operation, producing tight fitting joints and improving the quality and appearance of work.
No. 787—Length 11 inches.....Each $1 60
One in a package

CONTINUOUS ROLLING CUTTER SHEARS



Operated by a pinion lever engaging in a rack and cutting with the forward roll of the cutting disc.
No. 294—Length, over all including lever, 12 in., lower knife 2¾ in., weight 4 lbs., will cut No. 20 iron.....Each $12 00
No. 295—Length, over all including lever, 20 in., lower knife 3⅝ in., weight 6 lbs., will cut No. 16 iron.....Each $18 00

BENCH SHEARS, RIGHT-HAND CUT

Perfection

Forged steel, polished blades, japanned handles.

Bench shears, as regularly made, have a right-hand cut; that is, the lower blade is on the right side of the shears. Bench shears with a left-hand cut can be furnished when desired at an additional cost.

In ordering bench shears with a left-hand cut, it must be clearly stated on the order.

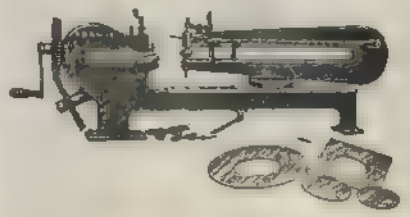
RING AND CIRCULAR SHEARS



Perfection

A bench shear for cutting circles or internal rings and irregular curves. In circular cutting the blanks are clamped between rubber covered discs by means of a quick acting eccentric lever device, adjustable to uniform pressure preventing the work from slipping. The bed on which the tail piece slides is graduated in inches and fractions of inches for quick setting of tail piece for the size circle to be cut. The angular position of cutters insures clean cutting on inside and outside of circle.

Diameter of cutters 1⅝ in., clamping discs 2¼ in. Depth, cutting head to gauge 9⅜ in., cutting head to frame 10 in.

For No. 20 Iron and Lighter.

No. 298—Depth of circle arm 16¼ in., will circle from square blanks 3¼ 22 in., weight 195 lbs.....Each $95 00

No. 299—Depth of circle arm 30½ in., will circle from square blanks 3¼ to 42½ in., weight 290 lbs.....Each 116.00

PEXTO CIRCULAR SHEARS

For cutting outside circles, trimming or squaring tin plate, sheet iron, brass and copper. A polished graduated scale is attached to the bed for quick and accurate adjustment of the sliding arm. Fitted with quick acting eccentric lever, which clamps material between discs quickly and releases blank instantly. Rubber covered discs prevent slipping of blanks.

Diameter of cutters 3⅞ in., clamping discs 2 in. Depth, cutting head to gauge 9¼ in., cutting head to frame 10¾ in.

For No. 22 Iron and Lighter

No. 278—Depth of circle arm 16¾ in., will circle from square blanks 2¾ to 22 in., weight 125 lbs.....Each $76.00

PEXTO SLITTING SHEARS

This machine is very convenient and useful for general slitting, and will cut material of any length for cornice, gutters, etc. It is also adapted for cutting elbows and patterns from sheet iron. The frame is of compact construction. The gears are encased, and the supporting table is provided with a scale for quick adjustment of the sliding gauge. The cutters are made of the finest steel. They have two cutting edges and are reversible. The bearings are adjustable to take up wear.

Total depth of throat 19 inches, depth of throat to gauge 18 inches.

For No. 16 Iron and Lighter

No. 255—For hand only, weight 325 lbs. Each $55 00
No. 260—Same as No. 255, only back geared and fitted with tight and loose pulleys and belt shifter for power. Weight 400 lbs. ....Each 80.00

PEXTO TINNERS TOOLS AND MACHINES

SLITTING SHEARS

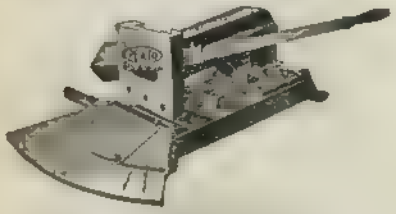
Pexto Rotary

Frame is exceedingly solid and compact and all adjustments are easily made. Diameter of cutters 3⅞ in., depth of cutting, head to gauge 9 in., head to frame 10⅛ in. Narrowest strip that can be cut is ⅛ in.

For No. 20 Iron and Lighter

No. 250—Weight 100 lbs.....Each $63 20

COMBINED BENCH AND SLITTING



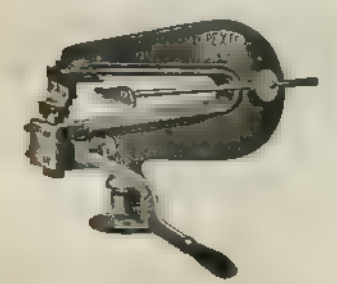
Pexto

A practical shear for use in car shops, automobile plants, and shops where a variety of straight and irregular cutting is done. The lower blade is stationary, enabling cutting to line with accuracy. Length of cutting blades 6½ in., depth of cutting, head to gauge 9½ in., head to frame 10 in. Size of table 12x15½ in.

For No. 18 Iron and Lighter

No. 248—Weight 185 lbs.....Each $70 00

SCROLL SHEARS



Pexto

Will cut circles, ovals, ogees and all irregular shapes with ease, also from the center of a sheet. Mounted in a standard which screws to bench and adjustable to any angle. Length of cut is regulated. Depth of cutting head to gauge 17 in., head to frame 18¼ in. Length of cutting blade 4¼ in.

For No. 20 Iron and Lighter

No. 269—Weight 155 lbs.....Each $90.00

LEVER SHEARS

Pexto

For slitting sheet iron in any length or width, or for cutting narrow iron bars. Blades are of best material and ground to a perfectly true cutting edge. Very strong and rigid. Length of cutting blades 6 in. Length of gauge rod 22 in.

For No. 10 Iron and Lighter

No. 296—Weight 130 lbs.....Each $80 00

SQUARING SHEARS

Hull's Acme

Parts are accurately fitted, with wood top shelf and iron side extension tables, improved front and back gauges, for cutting metal, and a variety of other uses and special work, as cutting leather, cloth, paper, hard or soft rubber, etc. Can be arranged for power; back-geared or not back-geared, with or without hold-down attachments.

For No. 20 Iron and Lighter.

No. 177—22 inches in length, weight 300 lbs. .....Each $95.00

For No. 18 Iron and Lighter.

No. 178—25 inches in length, weight 325 lbs .....Each 110 00

No. 179—31 inches in length, weight 425 lbs .....Each 116 00

No. 180—37 inches in length, weight 700 lbs .....Each 137 50

For No. 16 Iron and Lighter

No. 182—42 inches in length, weight 900 lbs .....Each 240 00

For No. 14 Iron and Lighter.

No. 184—31 inches in length, weight 660 lbs. .....Each 180.00

SQUARING SHEARS

Pexto

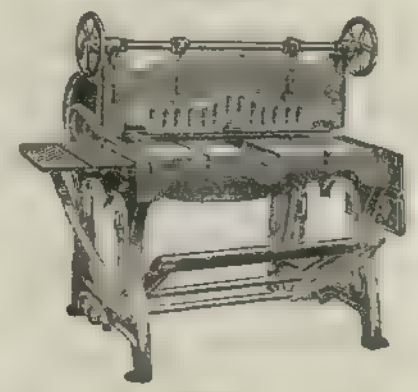
This new pattern is popular owing to the extra wide bed plate. Furnished with complete gauge equipment. No. 132A only furnished with top arms. One pair long front arms furnished with Nos. 132A and 137A. Side tables sent only when specified at extra cost.

For No. 18 Iron and Lighter.

No. 132A—Length 31 in., bed plate 14 in. wide, weight 540 lbs.....Each $116 00

No. 137A—Length 36½ in., bed plate 14 in. wide, weight 650 lbs.....Each 145 50

CONTINUOUS CUTTING OR GAP SHEARS



Pexto

Sheets 30 inches wide may be cross cut at any point desired. Sheets 37 inches in width may be cut up into strips of ½ inch to the full depth of the throat. Removing the side guides permits of the cutting of sheets in any length and as wide as the depth of the throat.

Hold-down attachment is operated by hand and slides on independent ways, so that when the blades are in motion the hold-down remains in a fixed position. It can be operated from either end of the shears by means of the small hand wheels.

Fitted with side extension tables for supporting long sheets of metal. Bed plate is graduated in inches and fractions.

Furnished complete with Hold-down attachment, side shelves and two pairs of front arms, one pair each long and short, and complete gauge equipment.

For No. 18 Iron and Lighter

No. 186—For foot power, 37 in., 15½ in. throat, weight 1500 lbs...Each $270 00

No. 187—For foot power, 37 in., 19 in. throat, weight 1630 lbs....Each 290 00

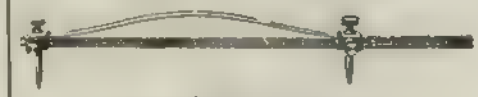
STEEL STRAIGHT EDGE

Made of steel and have beveled edges. Valuable around the shop for laying out work in general. 2¼ in. wide, ¼ in. thick.
No. 994—Length 4 ft.....Each $6.30

THE "MAGIC" PATTERN RULE



With Chart

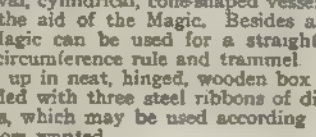
For laying out sheet metal elbow patterns up to 14 inches in diameter and at any angle desired.

Consists of a 7/16 inch square steel bar, marked circumference inches one side, and inches and 8ths other side. Fitted with brass sliding trammel heads with set screws, and steel points, all nicely nickel plated. For laying out elbow patterns, the left hand slide is fastened to the end of the bar by the set screw, and the right hand slide is set according to the diameter elbow that is wanted. A flexible steel ribbon on the top of the bar is then raised to the required height, according to angle of elbow wanted; one glance at the chart giving such height necessary according to the elbow required.

For example, suppose an elbow is wanted say 6 inches in diameter and at an angle corresponding with the long line C on the chart set the right hand slide at figure 6 on the front of rule, get with your ordinary rule the distance from bottom of diagram on the chart of the perpendicular line 6 to where it meets the angle line C; then raise steel ribbon to this height, fasten it with set screw.

The chart is 19x23 inches in size, mounted on linen and contains, besides the elbow diagram, also rules for cutting all kinds of flaring, oval, cylindrical, cone-shaped vessels, etc., with the aid of the Magic. Besides all this, the Magic can be used for a straight edge, rule, circumference rule and trammel.

Put up in neat, hinged, wooden box and is provided with three steel ribbons of different gauges, which may be used according to size of elbow wanted.
Magic—Complete .....Each $10 00



A handy soldering outfit for household use. Made up as follows: one bar of solder, one box of rosin, one scraper and a soldering copper.

Expert Advice and Service *for* Park Departments!

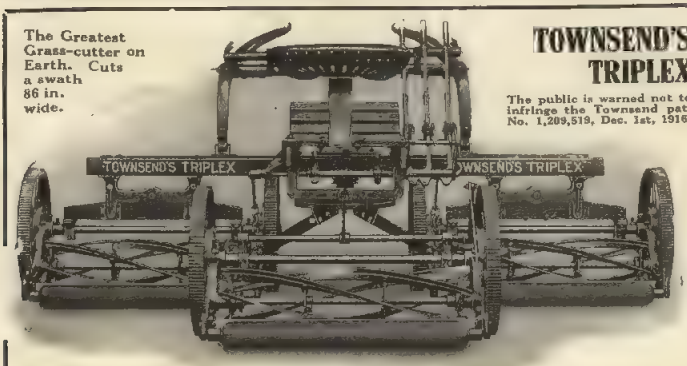
OWING to the increasing demand for technical and expert advice in park matters, and the desire on the part of many Boards of Park Commissioners and Park Committees to turn over the parks to skilled persons to manage, we have inaugurated a Park Management Department. We manage your properties, either in detail or act in an advisory capacity. This is a real service by expert and skilled hands. We will put business methods into park maintenance and development. We will show you how to save money and get increased results.

Write for Detailed Information.

Benjamin E. Gage 30 N. LaSalle St. **Chicago, Ill.**

"AUTHORITY ON PARK MANAGEMENT"

The Greatest Grass-cutter on Earth. Cuts a swath 86 in. wide.



TOWNSEND'S TRIPLEX

The public is warned not to infringe the Townsend pat. No. 1,209,519, Dec. 1st, 1916.

Drawn by one horse and operated by one man, the TRIPLEX MOWER will mow more lawn in a day than the best motor mower ever made, cut it better and at a fraction of the cost.

Drawn by one horse and operated by one man, it will mow more lawn in a day than any three other horse-drawn mowers with three horses and three men. (We guarantee this.)

Floats over the uneven ground as a ship rides the waves One mower may be climbing a knoll, a second skimming the level, and the third paring a hollow.

Does not smash the grass to earth and plaster it in the mud in springtime, nor crush out its life between hot rollers and hard, hot ground in summer, as does the motor mower.

Write for catalogue illustrating all types of Townsend Lawn Mowers, with list of users (FREE).

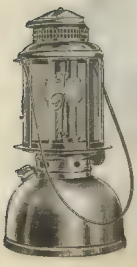
GASOLINE PRESSURE LANTERNS.



AMERICAN READY-LITE.

Made of brass, heavily nickel plated Will burn outdoors in any weather, lights without removing top or chimney. To turn out simple close valve. Approximately 400 candle power light; burns about 10 to 11 hours on one filling. Uses two Ready-Lite mantles; has hand filler plug.

Each

No. 1250—Diameter of fount, 6¾ inches; capacity, 2 pints; height, 19½ inches; shipping weight, 5 lbs.....$8.65

Packed one in a box.

GASOLINE PRESSURE LAMPS.

AMERICAN READY-LITE.

No torch—no alcohol—lights with a match—no taking apart to clean. All Ready-Lite lamps and lanterns are equipped with the instant cleaner. When the generator becomes clogged with carbon, give the cleaner rod a quarter turn and it is thoroughly cleaned. Never have to take your lamp apart to clean.

All Ready-Lite lamps and lanterns are made of brass, heavily nickel plated, carefully tested before leaving the factory and fully guaranteed. They give more light than twenty-five oil lamps and cost only one-third cents per hour for fuel. No chance of explosion by dropping or overturning. Impossible to fill lamp while burning. Each lamp comes packed complete with necessary equipment. All lamps have universal shade holder that fits most any shade.

PORTABLE LAMP.

Made of brass, heavily nickel plated, with solid hardwood ebonized standard. Has hand filler plug; will burn from 16 to 18 hours on one filling. Uses two mantles; approximately 400 candle power. Has 10-inch ribbed shade.

Each

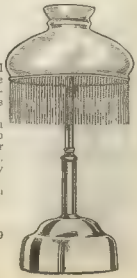
No. 1200—Diameter of fount, 8½ inches; capacity, 2 quarts; height over all, 19½ inches; shipping weight, 10 lbs.....$9.00

Made entirely of brass, finished in polished nickel, with 10-inch ribbed opal dome shade. Uses two mantles, gives 400 candle power light. No cleaning required.

Each

No. 1225—Diameter of fount, 8½ inches; capacity 2 quarts; height 19½ inches; shipping weight, 8 lbs.....$8.50

PARLOR LAMP.



A combination of both large and small generators is used, thus retaining the quick lighting feature of the small generator without sacrificing the advantages of the large generator.

Has 10-inch opal shade with 3-inch crystal bead fringe to match. Lamp burns 22 to 24 hours on a filling. Filler plug tightened or removed with fingers. Uses one large mantle; approximately 400 candle power light.

Each

No. P67-6—Diameter of fount, 8½ inches; capacity, 2 quarts; height over all, 23 inches, shipping weight, 12 lbs.....$10.50

For Gasoline Mantles see page 482.

SWITCHMAN'S.
WOOD BAIL.

An extra strong lantern, built to withstand hard use.

Wires and frame are dipped in molten tin which makes them absolutely rigid. Fount is drawn from one piece of tin and is removable from frame being held in place by two brass springs. Equipped with No. 2 brass signal oil burner, and No. 39 globe of best quality.

Bail is rigid wood type, always upright, makes control of signal easy; also gives firmer grip.

Per Dozen.

No. 90—Switchman's Lantern, height 15 ins.; length of handle 8½ ins.; weight per dozen, 24 lbs. $24.00

In bulk.

RAILROAD.

A strong, durable conductors railroad lantern; has heavy wire globe guard held stationary by protected spring under hood.

Made of heavy brass, handsomely nickel plated. Mounted on concave base with rolled rim.

Per Dozen

No. 39—Conductors Lanterns; size of wick, ⅝ inches; height with bail down, 10¾ inches; diameter of base, 6½ inches; weight per dozen, about 50 lbs. $21 80

One dozen in a case.

Light, strong and durable. Made from heavy gauge wire for frame and base; upright globe guards are heavy twisted wire; front is fitted with spring catch which is easily released for removing globe. Frame, base and outer metal parts are nickel plated.

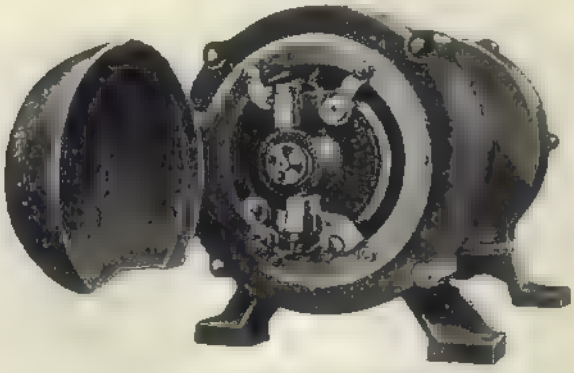
Turbo-Generator for Locomotive Incandescent and Arc Headlights

Type "D"



View of Generator End

Governor is our special design and will govern a variation of one hundred (100) pounds steam pressure without any perceptible difference in speed regulation. Adjusted from outside with a small screw driver. Is extremely simple and mechanically correct. It will control from full load to nothing with a variation not to exceed three (3) volts.

Throttle valve is of the balanced piston type, one that has given general satisfaction. A non corrosive metal is used which is not affected by acids, steam, scale or alkali. Body or chamber of valve is of cast iron of such texture and quality as guarantees against corrosion. All parts of casing are interchangeable. Valve linkage is made of hard red brass, light in weight, but of sufficient strength to transmit motion from the governor sleeve thrust ring to the piston of the throttle valve.

The shaft bearings are in the same casting, making it impossible for these bearings to get out of line.

This Turbo Generator will furnish full voltage for arc and eight (8) additional 30 volt 25-watt Mazda lamps at a steam gauge pressure of 75 pounds. It can be used for incandescent lighting and will give full voltage and amperage for one 250-watt 30-volt lamp and six 25 watt 30-volt Mazda lamps at a steam gauge pressure of 40 pounds.

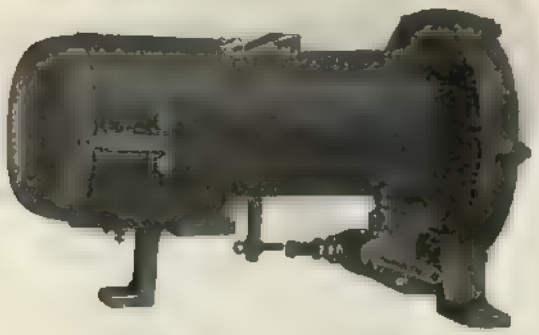
We guarantee the workmanship and material, will replace free of charge any part proving defective, or defective material, within a period of six months.

Price ..... Each $230.00

Discount

Turbo-Generator for Locomotive Incandescent Headlights

Type "F"



This Turbo-Generator is a 32 volt machine 500 watt capacity built for incandescent lights only It possesses the salient features shown and described in our type "D" Turbo-Generator but is lighter in weight and smaller in size and ample in capacity to maintain cab and classification lamps while headlight is burning

This type "F" Turbo-Generator will operate on steam gauge pressure from 50 to 250 pounds and will show condensation of water 145 pounds per hour The Governor will take care of variation of 100 pounds steam pressure As in our type "D" we use nothing but the highest grades of material assuring long life and low cost of maintenance

We give same guarantee for our type "F" as we do for our type "D

Price .. .. each $200·00

CASTING MINNOWS
★DIAMOND BRAND
ULTRA

In the Design and Manufacture of Our Ultra Casting Minnows Every Detail has been Carefully Thought out with the View Always in Mind of Securing Perfection as a Fish Lure, Durability and a Bait that will "Cast" Perfectly; These Essentials are all Embodied in the Ultra, Hooks Protected with Detachable Hooks, Improved Screw Hook Eyes, Metal Sinker Weights, Brass Lugs to Allow for Proper Angle, Always Presenting Barbs to Fish so that a "Strike" Results Invariably in a "Kill"

Highest Quality Clear Air Dried Cedar, Perfectly Shaped and **Ballasted,** always keeping Minnow in Proper Position and will not Revolve and Twist the Line, Therefore Swivels are Unnecessary. Before Applying the Required Number of Coats of Brilliant Waterproof Porcelain Enamel the Cedar is Especially Treated to Prevent the Absorption of Water, so that the Enamel will not Peel or Flake Off; Large Glass Eyes; Fine Propeller Shaped **Spinners Made Right and Lefts so as to Revolve in Opposite Directions,** Being a Great Advantage in Attracting Fish from a Distance; Detachable Extra Heavy Gauge Wire, Treble Hooks, Heavily Nickel Plated to Prevent Rusting if Used in Salt Water; Brass Buildings at Sides to Straighten Line and Insure Proper Angle.

Length of Body 3⅜ inches; Five File Point Treble Hooks No. 1. Weight Approximately 18 pwts.; Sinks Slowly.

Vises

Utility Time Saving Vise

It saves money by cutting out the time your machinists lose hunting for clamps, bolts, washers, etc

It saves the annoyance of hunting for angle plates, squares parallel-strips, etc by having a four-side revolving jaw a regular turret arrangement each face of which is arranged to hold an infinite variety of work One side has a machined steel face corresponding with the front jaw Another face is machined the full depth for use as an angle plate Other faces have accurately machined horizontal and vertical grooves for holding rounds, squares, octagons etc

It's carefully made All sides of the revolving jaw are carefully machined Bolts nuts and other steel parts, are machine finished and case-hardened The bed is machined top and bottom and has a flange on end its entire length, permitting it to being secured to the table in any position

It's extremely handy for doing die mould, tool or repair work, holding as it does an infinite variety of shapes holding them quickly firmly and accurately It can be used on any machine having a horizontal table like the miller, shaper planer, tapper, or drill press and will pay back its cost in the first few weeks of operation

Specifications

	No 1	No 2
Length of bed	11 inches	19¾ inches

No. 9100 This outfit contains one of our ever popular No. 91250 Guitars, which is made of solid birch, back and sides; enlarged model, [illegible] mahogany neck, solid walnut finger-board with pearl position dots, inlaid sound-hole, nickel plated tailpiece and strung with best steel strings, also one of our high grade canvas cases and a handsomely nickel plated Capo d'Astro, as shown in the illustration, a guitar thumb pick, one of our guitar tuning finger-board charts, by the use of which a player can easily master the notes and positions on the finger-board; 1 Self National Instruction Book, which not only contains the elementary instructions for playing the guitar, but also contains a number of easy and popular selections. A set of best grade steel strings, one of our guitar tuning pipes, with 6 pipes, E, B, G, D, A and E, which makes guitar tuning merely a matter of a few seconds with the youngest player $21 80

No. 9101 In this outfit we include our popular "Jupiter" Guitar, No. 9605, finished in dark mahogany, hand polished, with spruce top, fancy colored wood inlaying around sound-hole, inlaid with fancy colored wood and bound with celluloid; handsome mahogany finished neck, finger-board inlaid with pearl position dots, fitted with our own patent heads and tailpiece, strung with the best grade steel strings. The case and all other sundries included with this outfit are the same as described in Outfit No. 9100 $25 80

No. 9102 Outfit No. 9102 contains our handsome standard size "Lakeside" Guitar, No. 9620, which has a beautifully figured birch back and sides, finished in a dark mahogany, elegantly hand polished with spruce top, fancy colored wood inlaying around sound-hole. Corded inlaying around edge, and both top and back edges bound with celluloid, fancy inlaid stripe down the center of the back; the neck is finished in fine mahogany with neatly veneered head-piece, solid rosewood finger-board, pearl position dots, fitted with our own nickel plated patent head and tail-piece, strung with best grade steel strings. The case and all other sundries included in this outfit are the same as described in Outfit No. 9100 $31 40

No. 9200 This outfit contains one of our popular No. 91206 Mandolins, 9 ribs, maple and walnut, attractively inlaid sound-hole, tortoise celluloid guard plate, walnut finger-board with position dots and nickel covered tailpiece, one of our high-grade canvas cases, a Self National Instruction Book, which contains elementary instruction for playing the mandolin, and also a number of easy and popular selections, a complete set of the best grade mandolin strings, a finger-board chart, by the use of which [illegible] to on the finger-board is clearly marked, and enables the beginner to acquire accurate fingering with much less study than heretofore. Also one of our mandolin tuning pipes, with four pipes, tuned E, A, D, G, and by its use a mandolin can be tuned quickly and accurately. .. $17 60

No. 9201 This outfit contains one of our Jupiter Mandolins, No. 9501, which has 9 ribs, dark mahogany finish with black inlaying between, broad colored wood inlaying around sound-hole, and edges very neatly celluloid bound, finished throughout with a high varnish finish; spruce top, mahogany finished neck, solid rosewood finger-board, tortoise celluloid guard plate, pearl position dots, fitted with our own nickel plated patent head and nickel shell pattern tailpiece. All the accessories described in Outfit No. 9200 are contained in this outfit. $20 80

No. 9202 We include with outfit No. 9202 one of our high-grade Lakeside No. 9203 Mandolins, which has 9 ribs of rosewood and maple, neatly inlaid with rose inlaying between each rib extended rosewood apron, handsomely polished; broad colored wood inlaying around soundhole, edge inlaid with corded inlaying and cord bound, spruce top, mahogany finished neck, veneered headpiece, rosewood finger-board and tortoise shell guard plate, pearl position dots, fitted with our own patent head and nickel shell pattern tailpiece. All the accessories described in Outfit No. 9200 are contained in this outfit $24 80

CLARIONETS

Nos. 930-934

Nos. 935-939

International or New Standard Pitch is LOW PITCH
American or Concert Pitch is HIGH PITCH

In the whole field of music few instruments call for greater care in manufacture than the Clarionet. A good Clarionet becomes almost priceless to its player. Something more than is apparent at a casual glance must be comprised in a Clarionet, in order that it may afford satisfaction when in use. The instruments carried by us were selected because an experience of over forty years has proved to us that they are the best value on the market.

TROLLEY FISHING OUTFIT

WAGNER

Trolley Fishing is well known by all lake fishermen. It is the best fishing from pier or boat or a high place beside a river. It is done by throwing out a heavy line with an Automatic Anchor attached to the end. When Anchor has caught, pull line as tight as possible, then fasten to a stick or tree, then let Trolley run out on this line with a regular fishing line and as many hooks as you like. (See illustration.) Attached to an Alarm Bell gives you a chance to use more Trolleys and a Rod.

AUTOMATIC ANCHORS

For Trolley Fishing, Anchoring Small Boats when Hunting or Fishing; Also for Anchoring Decoys.

In throwing out this Anchor it Opens Automatically. To haul in Pull Line Tight and let go at once, this will loosen Anchor and Close it up Automatically so it can be hauled in easily.

Per Gross

No. AC—Made of Malleable Iron with Steel Folding Wires; Length Over All 6¾ inches; Weight each 14 ozs.; Weight per Gross 143 lbs. **$72.00**

One Dozen in a Box

TROLLEY SINKERS

The best Trolley made, can be opened by stem by pressing lever in and then pushing sideways; Has three Brass Pulleys; the middle pulley catches line below when pulling up, thus preventing line from cutting in corner of fork and saving the line.

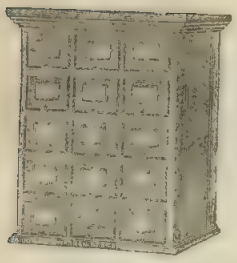
✠WARREN SCREW CASES

Prices Upon Application

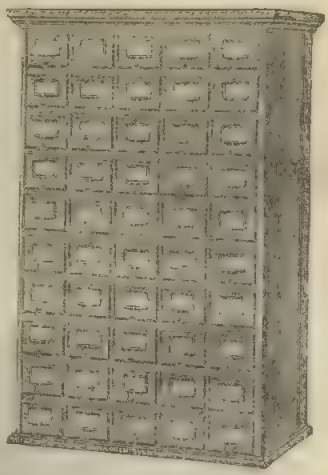


The Exterior of all Warren Screw Cases is Made of Oak, Hand-Rubbed and Polished Finish, and the Interior of Soft Wood, usually Poplar.

The Backs are Well-Seasoned, Matched and Beaded Lumber and Varnished. The Drawers have Sliding Covers so Arranged that Only One Compartment is Open at a Time.

By Removing Drawers from Screw Case, Contents of any Particular Compartment can be Emptied in the Hand or on the Counter and Returned, or Goods from Original Packages Emptied into the Different Compartments without Danger of Mixing the Different Sizes.

All Screw Case Drawers have Pull, Card Frames and Card Attached to Fronts and our Inlaid Price Card on the Side of Each, where a Record of the Size, Number, Cost and Selling Price of the Different Sizes can be kept Opposite Each Compartment.

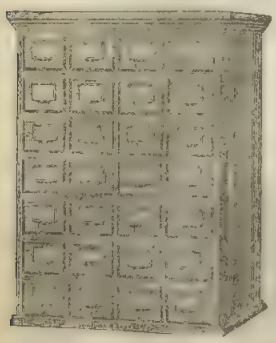


Screw Case No. 6100.—This Screw Case is 19⅝ inches high, 16½ inches wide, 15½ inches deep, and contains 15 Oak Front Drawers with Sliding Covers with Three Removable Partitions, Forming Four Compartments in Each, 60 in all.

Approximate Weight, Packed, 70 lbs.

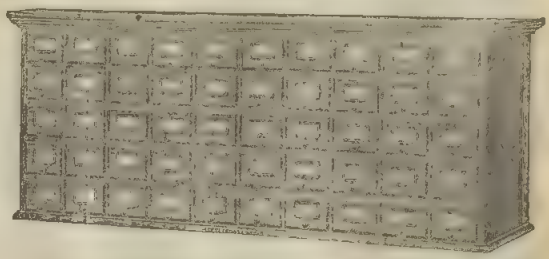
Screw Case No. 6122.—This Screw Case is 37⅛ inches high, 25⅝ inches wide, 15½ inches deep and Contains 50 Oak Front Drawers with Sliding Covers, with Three Removable Partitions, Forming Four Compartments in Each, 200 in all.

Approximate Weight, Packed, 175 lbs.



Screw Case No. 6111.—This Screw Case is 28⅝ inches high, 21 inches Wide, 15½ inches deep and contains 28 Oak Front Drawers with Sliding Covers with Three Movable Partitions Forming Four Compartments in Each, 112 in all.

Approximate Weight, Packed, 110 lbs.



Screw Case No. 6123.—This Screw Case is 19⅝ inches high, 48½ inches wide, 15½ inches deep and contains 50 Oak Front Drawers with Sliding Covers, with Three Removable Partitions, Forming Four Compartments in Each, 200 in all.

Approximate Weight, Packed 175 lbs.

A METER FOR MEASURING GASOLINE

way to the municipal garage. Cities have effected considerable savings by buying gasoline in large quantities to supply municipal motor trucks. But much of this saving may be lost if the supply is not metered. The meter is the bookkeeper of the gasoline tank. It eliminates pilfering for personal uses, and it becomes a valuable factor in figuring the operating cost of municipal motor apparatus, showing the consumption of each truck accurately.

The Niagara meter in the illustration is a product of the Buffalo Meter Company, 2917 Main Street, Buffalo, N. Y. It measures gasoline from systems operated by pumps, gravity, air pressure or hydraulic pressure. The dial is vertical, six inches in diameter, with black figures on white. A large hand indicates pints, quarts and gallons from 0 to 10 gallons. A knurled thumb piece projects thru the dial glass so that the hand may be turned back and automatically stopped at 0. A straight reading register, which cannot be set back, counts the total gallons from 1 to 100,000 and repeats.

The Buffalo Meter Company also makes books for recording meter readings. These may be procured in either loose leaf or bound form, pocket size and larger.

A "Versatile" Tractor

A tractor that is applicable to a wide variety of jobs is the one that should appeal to any municipality desiring to make the most of its motor investments. Such a tractor is that manufactured by the Watson Wagon Company, 30 W. Center Street, Canastota, N. Y. Here it is shown towing a road scraper. Even in this light work it effects a saving over horsepower. But its most effective work is in hauling heavier apparatus, such as dump wagons, trailers, heavy road machinery, etc.

An incident that serves in a way to illustrate the adaptability of this tractor comes from a rural community in the state of Washington. A Watson agent was delivering a new outfit including a bottom dump semi-trailer, and was passing thru a small community when a fire alarm was turned in. The apparatus was very near to the fire department building at the moment, and the quick-witted driver unhooked from his semi trailer and backed the tractor into the fire house, hooked on to the hook and ladder truck, which, like most of the equipment, was of the hand-drawn type, and started off in the direction of the fire ahead of any of the other apparatus. While this, of course, would not be practical in a general way, it was the general utility of the tractor that made possible its use in such an emergency. To the small town which cannot afford an extensive outlay for up-to-date motor apparatus for its different departments, the tractor offers the solution to most of its problems.

WATSON TRACTOR TOWING A ROAD SCRAPER

ELECTRIC MOTORS

Note—When Used on Lighting Current it is Absolutely Necessary to Use a Transformer, in Order to Step Down the Voltage. Any of these can be Used. Be sure that the Current on which you intend to connect to is Alternating, as they cannot be Operated on Direct Current. Transformers are More Satisfactory than Batteries to Operate these Motors, as there is no Wear-out to them and the First Cost is Practically the end of Expense. While Dry Cells Cost Less at First than Transformers they are the Most Expensive and are Drained of Energy in a Very Short Time.

WEEDEN

Balance Wheel 2½ inches in Diameter with Polished Nickel Face, attached to Large Steel Shaft with a Set Screw and Grooved Pulley; All Parts of Motor are made of Special Iron and Brass Heavily Nickel Plated; and are attached to a Nickel Plated Steel Base; Handsomely Striped, Nickel Plated Trimmings, Brass Binding Posts; Switch to operate Motor without disconnecting the Batteries; Operated on Dry Cells or on Alternating Current through a Toy Transformer; Every Motor thoroughly Tested before being Packed; All parts interchangeable; full directions for rrunning and price of Duplicate Parts packed in each box.

ELECTRIC TOY TRANSFORMERS

FOR ALTERNATING CURRENT

JEFFERSON

Embody all the Latest Improvements in Toy Transformer Construction; Designed to be Connected to the Ordinary House Lighting Circuit for the Purpose of Reducing the Current to Suitable voltage for Operating all Classes of Electrical Toys; such as Electric Engines, Trains, Motors, etc. Made to Operate Toys of Wide Range of Low Voltage by means of a Regulating Switch and Master Connection Post; A Large Celluloid Plate on Top of Transformer shows plainly the various secondary voltages obtainable.

They may also be used for operating Bells, Induction Coils, Buzzers, and many other contrivances.

With Speed Lever giving five various speeds without changing secondary wiring; Black Enameled Steel Case; Complete with Plug and Cord.

Operates Electric Trains Nos. 975-976-977-978

Each

No. 1981—5x4 inches; 3¼ inches High; Reduces 100 to 130 Volts A. C., 60 to 133 cycle to 10 different secondary voltages from 0 to 20 in 2-volt steps; Capacity 50 watts; Weight 6½ lbs..... **$7 00**
One in a Box

With Speed Lever giving various speeds without changing secondary wiring; Black Enameled Steel Case; Complete with Plug and Cord.

Operates Electric Trains Nos. 951-952-957-958-959-960-975-976-977-978

Each

No. 1982—5x4 inches; 3¼ inches High; Reduces 100 to 130 volt A. C., 60 to 130 cycle to 10 different secondard voltages from 0 to 20 in 2-volt steps; Capacity 75 watts; Weight 6¼ lbs..... **$8.00**
One in a Box

With Speed Lever, giving five various speeds without changing Secondary wiring; Mounted between Black Enameled Gray Iron Castings and is equipped with Three secondary Binding Posts, complete with Plug and Cord.

Operates Electric Trains Nos. 975-976-977-978

Each

No. 1980—3½x3¼ inches; 2½ inches High; Reduces 100 to 130 volt A. C., 60 to 130 cycle to 8 different secondary voltages from 3 to 24 in 3-volt steps; Weight 2½ lbs..... **$5.00**
One in a Box

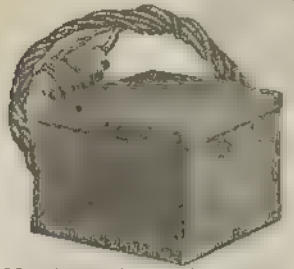
Voltage Changed by Binding Posts

Equipped with Seven Feet of Flexible Cord with Screw Plug for Attaching to Electric Light Socket.

Operates Electric Trains Nos. 957-958-959-960-975-976-977-978

Each

No. 1991—5½x4 inches; 2½ inches High; Reduces 100 to 125 volts to 6, 12 or 18 Volts; Capacity 60 Watts..... **$6 50**
One in a Box; Weight each 5 lbs.



Voltage Changed by Binding Posts, Equipped with Safety Fuse Which Prevents Burning Out Transformer when Current is Short Circuited.

Equipped with Seven Feet of Flexible Cord with Screw Plug for Attaching to Electric Light Socket.

Operates Electric Trains Nos. 951-952-957-958-959-960-975-976-977-978

Each

No. 1992—5x5 inches, 3¾ inches High; Reduces 100 to 125 Volts to 8, 11, 14, 17, 20 or 24 Volts; Capacity 120 Watts; Equipped with a Fuse to prevent Burning out Coils by Short Circuit.....**$9.50**
One in a Box; Weight 6½ lbs.

ELECTRIC TOY TRANSFORMERS

Each

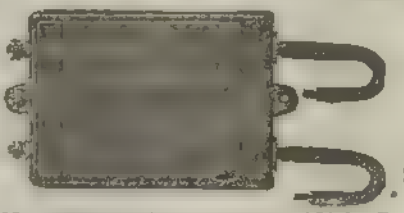
No. 1993—5x5 inches, 3¾ inches High, Reduces 100 to 125 Volts to 8, 11, 14, 17, 20 or 24 Volts; Capacity 120 Watts; Equipped with a Fuse to prevent Burning out Coils by Short Circuit.....**$11 00**
One in a Box; Weight each 6½ lbs.

Voltage Changed by Lever on Top of Transformer For Heavy Duty

Operates Electric Trains Nos. 951-952-957-958-959-960-975-976-977-978.

Each

No. 1994—5x5 inches, 4 inches High, Reduces 100 to 125 Volts to 8, 11, 14, 17, 20 or 24 Volts; Capacity 150 Watts; Equipped with Safety Fuse which prevents Burning out of Transformer when current is short circuited..... **$12 00**
One in a Box; Weight each 7½ lbs.



TOY TRANSFORMER

5x3½ inches; 3¾ inches High, Japanned Iron Closed Case; Two Top Cables through Porcelain Insulators to Light Circuit; Four Bottom Cables through Porcelain Insulators to Supply Current as Needed.

Each

No. 1990—Reduces 100 to 125 Volts Down to 8, 11, 14, 17, 20 or 24 Volts; Capacity 150 Watts; Weight Each 11½ lbs.....**$12 00**
One in a Package

TOY TRANSFORMERS

Junior Bell Ringer and Toy Transformer for 110 Volt, 60 Cycle Current; The Insulated Cables are Attached Direct to the Lighting Circuit just as a Fan Motor or Light Wire; Devices are Connected on the Binding Posts for Reduced Current in the Same Manner as to Dry Batteries.

Each

No. 1975—6½x2¾ inches, 2¼ inches High, Supplies 6 or 12 Volts; Weight Each 2¾ lbs. .**$2 20**
One in a Package

DIRECT CURRENT REDUCERS

For 110 Volts

LIONEL

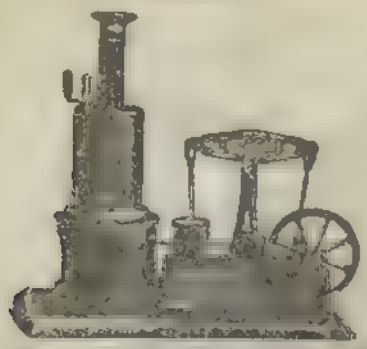
Constructed upon a substantial slate base. The resistance wires are wound around 4 porcelain tubes and these are protected by a perforated Russia iron cover lined with asbestos. The voltage obtained ranges from 0 to 20 with an Ampere Discharge of 5. This apparatus will give a sufficiently wide range of voltages to operate any outfit listed here. The voltage is controlled by a sliding lever. The Reducer can be fixed to wall or table by using the 4 porcelain knobs and screws which are supplied with it.

Per Dozen

No. 966—Size 8x10x3½ inches; Complete with cord and plug . .**$153 60**
One in a Box; Weight 10¾ lbs.

TOY ENGINES

WEEDEN



Polished Blued Steel Boiler, Fire Box and Base are Finished Sheet Steel; Boiler Trimmings are Filler, and Burner; Walking Beam; Uprights and Engine Decks are All Polished Nickel; Balance Wheel has Turned Finished Face and the Shaft Pulley to Which a Belt can be Attached to Run Small Toys; Every Engine is Thoroughly Tested Before Being Packed; All Parts are Interchangeable; Full Directions for Running the Engine will be Found in each Box with the Price Sheet of Duplicate Parts.

Per Dozen

No. 1101—Length 10½ inches; Height 9¾ inches; Weight per Dozen, 60 lbs. **$34.50**

Twelfth Dozen in a Carton

Horizontal; Polished Boiler; Blued Steel Fire Box and Stack; Enameled Steel Base; Safety Valve Locked on Top of Boiler and Made Steam Tight by Small Rubber Washers; Gold Bronzed Whistle with Wooden Lever Handle; 2-inch Nickel Plated Balance Wheel; Thoroughly Tested; All Parts Interchangeable; Full Directions for Operation, and Price List of Duplicate Parts Packed with Each Engine.

Per Dozen

No. 1103—Boiler 3¾ x 1¾ inches; Height 8¾ inches; Weight per Dozen, 75 lbs. **$26.40**

One in a Package

CHRISTMAS TREE CANDLES

Cable Style; Best Grade; Made of Hard Paraffine; absolutely Odorless; Put Up in Handsome Lithographed Labeled Boxes.

Per Box

No. 30—Assorted Colors; Packed 36 to a Carton, Weight per Dozen Boxes, 6 lbs. **$0.24**

CHRISTMAS TREE CANDLE HOLDERS

Made of Heavy Tin Spring Clasp with Steel Wire Coil Spring to attach to Christmas Tree. Assorted in Brilliant Colors.

Per Gross

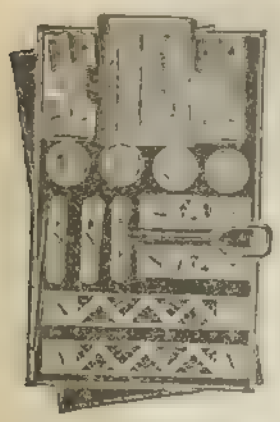
No. 55—One Dozen on a Card, One Gross in a Box, Weight per Gross 24 lbs. **$2.70**

CONSTRUCTION TOYS

ERECTOR

All Parts made of Bright Stamped Steel, Complete with Bolts, Nuts, etc. A Complete Manual of Instructions showing different Designs with each Set.

This is the only Structural Steel Builder having Girders faithfully imitating those used in Structural Steel Building. These Toys are very Popular and Instructive. Parents as well as their Boys will receive many Valuable Lessons in the Laws of Mechanics while building the different Models with which the various Sets are capable. Educational, Instructive, Amusing



Without Motor

Contains Ninety-eight (98) Parts and Makes 60 Models; Among these Models are Railroad Signals, Horizontal Bars, Flat Trucks, Flying Dutchmen, Wagons, etc.

Each

No. 1900—Size of Box 10⅜x6⅜x⅞ inches; Weight Wrapped for Parcel Post, 2 lbs.; Weight Unwrapped 1 lb..... **$0 68** 0.50

One Set Complete in a Box

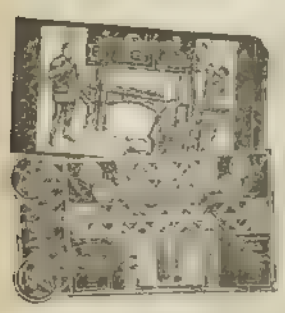
Without Motor

Contains One Hundred Forty (140) Parts and Makes 88 Models; Among these Models are Windmills, Coat Hangers, Derricks, Semaphores, Grindstones, Teeter Totters, etc.

Each

No. 1901—Size of Box 12¼x9½x1 inches; Weight Wrapped for Parcel Post, 3 lbs.; Weight, Unwrapped, 2½ lbs. **$1.34** 1.00

One Set Complete in a Box



Without Motor

Contains Two Hundred Five (205) Parts and Makes 120 Models; Among these Models are Bicycles, Hand Cars, Endless Rope Railways, Cannons, Derricks, Semaphores, etc.

Each

No. 1902 Size of Box, 17½x9½x1 inches; Weight Wrapped for Parcel Post, 5 lbs., Weight, Unwrapped, 3¼ lbs. **$2 68** 2.00

One Set Complete in Box

Without Motor

Contains Three Hundred Forty-five (345) Parts and Makes 176 Models; Among these Models are Steam Shovels, Hoisting Engines, Conveyors, Cranes, Dump Wagons, Bridges, etc.

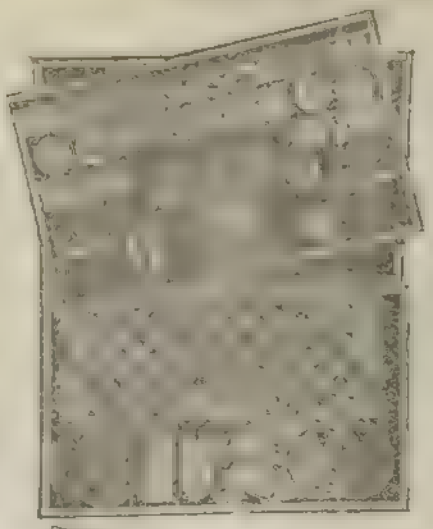
Each

No. 1903 Size of Box 18x8¾x2¼ inches; Weight Wrapped for Parcel Post, 7 lbs.; Weight, Unwrapped, 6 lbs. **$4 00** 3.00

One Set Complete in a Box

CONSTRUCTION TOYS

ERECTOR



With Motor No. 1942

Contains Five Hundred Seventy-one (571) Parts and Makes 207 Models; Among these Models are Torpedo Boats, Revolving Draw Bridges, Four Arm Semaphores, Police Patrols, Drill Presses and Gear Boxes.

Each

No. 1904 Size of Box 21½x13x3 inches; Weight, Wrapped for Parcel Post, 10 lbs. Weight, Unwrapped, 9 lbs..... **$6 68** 5.00

For Description of Motor See No. 1942 on Page 2636

One Set Complete in Box

With Motor No. 1942

Contains Six Hundred Seventy-nine (679) Parts and Makes 229 Models (See Manual of Instructions Complete with Each Set).

Each

No. 1905 Size of Box 15x9x3 inches; Weight, Wrapped for Parcel Post, 14 lbs.; Weight, Unwrapped, 12 lbs. **$10.00** 7.50

For Description of Motor, See No. 1942 on Page 2636

Best size of boiler to give plenty of steam at high pressure, horse power	6	6	6	8	8	10
Best size of supply pipe to carry steam 100 to 200 feet, inches	¾	1	1	1	1	1

Western Chief Drill No. 12

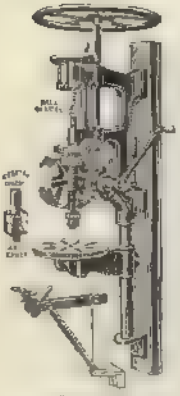

Fig 1478

Cut gears only used in this drill

Automatic self feed; fast and slow speed, instant change; drills to center of 16-inch circle; bores 0 to 1½ inches; up and down run of spindle, 4 inches, up and down run of table, 5½ inches, greatest distance from table to spindle, 18½ inches, size of pulleys for power, 10½ x 2½ inches; should run 175 to 180 revolutions per minute; spindle bored for ½ or ¼-inch shank bits—always state size when ordering; weight, hand power, 215 pounds; weight, pulley power, 235 pounds

The shaft on this drill when ordered hand power) is left extended to receive pulleys any time thereafter

Wheel runs can be furnished by removing table and using forked support as a wheel holder. A special wheel-holder attachment, as illustrated, is furnished, when ordered, for $2 00 extra

Always shipped without pulleys, unless ordered

Wheel-holder attachment, $2 00 extra

List price, without pulleys, hand power only ..... each $27 50
List price, with hand and pulley power attachments (as illustrated) ..... each 31 50

Western Chief Drill No. 14

Strong straight and bevel gears; rapid fast and slow speed instant change. Horizontal, rear driven, positive, self feed, changeable instantly to fast, slow or medium, as desired. Raise and lower device to table.

Has automatic quick return, allowing rapid withdrawal of the bit at will, without stopping or reversing machine. Or, it can be set to drill any depth desired and automatically stop, whether running by power or hand, reverse, feed, withdraw the bit and start drilling again and again indefinitely, all without stopping the rotation of the machine, or turning it backward. This feature is independent of drill and need not be used unless desired.

Drills to center of 21-inch circle, bores 0 to 1½ inches; up and down run of spindle, 4 inches; up and down run of table, 14 inches; greatest distance from table to spindle, 18 inches; size of pulleys, 12½ x 2½ inches; should run 175 to 180 revolutions per minute; spindle bored for ½ or ¾ inch shank bits—always state size when ordering; weight, hand power, 295 pounds; weight, hand and power, 315 pounds.

Wheel runs can be readily removing table and using the forked support as a wheel holder. A special wheel holder attachment, as illustrated, is furnished, when ordered, for $2 00 extra.

The shaft on this drill when ordered hand power is left extended to receive pulleys at any time thereafter.

Always shipped without pulleys, unless ordered.

Wheel-holder attachment, $2 00 extra

List price, hand power only ..... each $38 50
List price, both hand power and pulley power (as illustrated) ..... each 42 50

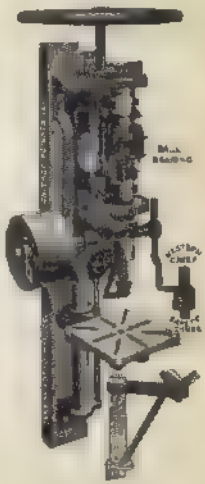

Fig 1479

Western Chief Drill No. 16

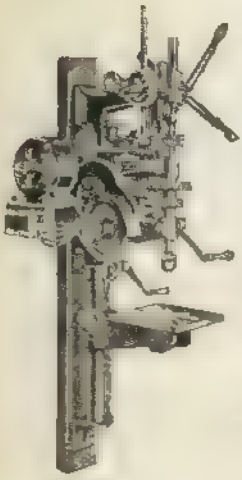

Fig. 1480

Post drill with the fine features of a machine shop floor drill, equipped with a high-grade, powerful motor of the best make, costing less than 25 cents a day to operate. There are no belts the motor being directly connected with spur gear drive, accurately cut

Fast and slow speed, instant change

Has lever feed also horizontal gear-driven positive self feed, changed to fast, slow or medium speed instantly. These feeds work independently of each other, and bit is lifted quickly

Raise and lower device to table, drills to center of 24-inch circle bores 0 to 11½ inches up and down run of spindle 6½ inches, up and down run of table 15 inches, greatest distance from table to spindle 18½ inches spindle bored for 1 and ½ inch shank bits- always state size when ordering; weight, 400 pounds

Wheel runs can be drilled by removing table and using the forked upport as a wheel holder

Special wheel-holder attachment, $2 00 extra.

List price (as illustrated) . . . . . each $150 00

No. 17 Electric- Same as No. 16 Electric but with stand and base Height of machine, 71 inches floor space 15 x 26 inches When specially ordered we will bore spindle to receive No. 3 Morse taper Weight 590 pounds

List price . . . . . each $175 00

No. 36 Power Drill

New and Improved 20-Inch Type Model

Has back gear, power feed and automatic stop.

A very valuable machine for all around work All parts are solid, simple and compact. The best of material and workmanship used throughout

All machines are tested before leaving the factory, and guaranteed in every respect

Height of drills, 72 inches; greatest distance between base and spindle, 37 inches, greatest distance between table and spindle, 25 inches, travel of spindle, 9 inches, diameter of spindle in sleeve, 1⅝ inches; spindle socket, No. 3 Morse drills to center of 24-inch circle; diameter of table, 16 inches diameter of column, 5¼ inches, travel of table on column, 17 inches; size of cone pulleys, 8⅞, 7 ⅛, 5¾, 4 x 2½-inch face, diameter of tight and loose pulleys, 8 x 2½ inch face, speed of countershaft, about 380 R P M net weight, 740 pounds, No. 36; net weight, 660 pounds, No. 35

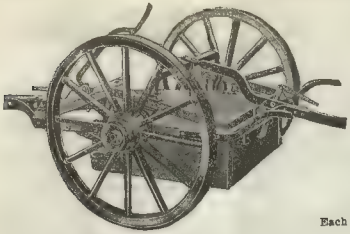
List price each $150 00

No. 35. Wheel and lever feed only

List price each $115 00

Fig. 1481

STANDARD WESTERN.



Wheels—Made of selected stock. **Axles**—High arched; provided with combined spindle sleeve and sand collar. **Bail**—High arched, bent around on a line with the top edge of pan and supported by the lever, which is arched, giving abundant clearance for dirt in filling and dumping. **Draft Hooks**—Automatic; prevent the scraper from dumping while being filled and regulate the cut to even depth.

Each

No. SW2½—Capacity 14 cubic feet; with draft rod; 42-inch wheels, 3x3/4 inch tires; 1¾-inch axles; bowl, 3 ft 2 ins wide, 3 ft 5 ins. long and 13½ ins. deep; weight, 700 lbs.. $64.75

No. SW1—Capacity, 9 cubic feet, 38-inch wheels, 2½x7/8 inch tires; 1½-inch axles; bowl, 3 ft. wide, 3 feet long and 12 ins. deep; weight each, 500 lbs..... $54.00

No. SW2—Capacity, 12 cubic feet; 40-inch wheels, 3x⅞ inch tires; 1⅝-inch axles; bowl, 3 ft. 2 ins. wide, 3 ft. 1 in. long and 13½ ins. deep; weight each, 650 pounds. 61.50

No. SW3—Capacity, 16 cubic feet; with draft rod; 46 inch wheels, 3x⅞ in. tires; 1⅝ in. axles; bowl, 3 ft. 8 ins. wide, 3 ft 5 ins. long and 16 ins. deep; weight, 800 pounds..... 72.25

NOTE—We can furnish extra draft rods, automatic end gates, whiffletrees and neck yokes on above at market prices.

FRESNO OR BUCK SCRAPERS.

WESTERN.

HEAVY CALIFORNIA PATTERN.

Useful in constructing ditches and invaluable for leveling land for irrigating purposes. Made in heavy California pattern, which has an angle along the upper edge to stiffen it. The backs of these scrapers are protected by plates or runners of steel, 3x¼ inch, the No. W1 having four runners, No. W2 three and the No. W3 two runners. Heavy steel in the backs and ends; heavy angles and shoes; blade, 13x7/8 inches.

Each

No. W1—5-foot cut; weight, 340 lbs... ..... $30 25
No. W2—4-foot cut; weight, 310 lbs..... 29 75
No. W3—3-foot 6-inch cut; weight, 270 lbs..... 29.00

PLOWS.

WESTERN RAILROAD OR TOWNSHIP.

No 3

Beams—Made of hickory, strongly strapped with iron, which extends from the clevis back and down to the standard, with steel-faced shoe. **Handles**—made of second-growth white oak; hand holds are made of round iron and curved, both strapped with iron on outside, which runs full length of handles. **Share and mouldboards**—Made of best plow steel, both double shinned. **Coulter**—Reversible coulter, so when one end is worn out the other can be put to use. **Clevises**—Made of steel, hand made, and furnished with two wrought iron rings.

Each

No. 7—Two-horse; 11 inch cut; especially adapted for public roads, strong and substantially built, without extra share; weight each, 100 lbs $19.30
No. 6—Two-horse; 11-inch cut; especially adapted for railroad and township use; a strong two-horse plow, on which three horses are frequently used, with extra share; weight each, 160 lbs..... 27.90
No. 5—Four-horse; 11-inch cut; especially adapted for medium railroad work; the strongest plow of its size ever manufactured; a favorite with contractors; with extra share; weight, each, 175 lbs..... 33.80

THE FAMOUS WHITE CROSS ELECTRIC (DRY CELL) VIBRATORS

PRICES EACH

White Cross Electric Vibrator No. 1

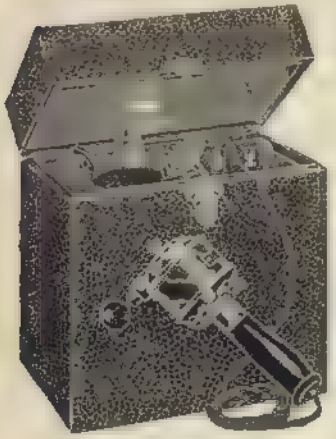
MODEL C

Portable Dry Cell Machine, Giving Mechanical Vibration Only

This outfit is designed to be used by parties not having the electric current in the house or by those that want to take treatment when traveling. It is so simple that a child can operate it.

The Mechanical Vibration is produced by a high grade motor inclosed in a highly polished case. It will give the percussion stroke and rubbing motion.

All the applicators we make can be used with this outfit.



PATENTED

The frequency of the vibration in this machine is found most suitable for all purposes from scalp and light body massage.

It is operated on eight dry cells of regular size. When the cells are exhausted they can be replaced by anyone in a few minutes. Any regular size dry cell of high amperage can be used.

Put up in good Leatherette Case 11¼x6x10¾ inches.

We furnish with this outfit one H soft rubber cup, one D soft rubber scalp, one C ball and one B button applicator, also one oil can.

We also furnish charts and directions for taking treatment.

No. 1C Complete, ready for use $45 40

White Cross Electric Vibrator No. 2

MODEL C

Portable Dry Cell Machine Giving Very Strong Mechanical Vibration

PATENTED

This vibrator is operated on ten dry cells of regular size. When the cells are exhausted they can be replaced by anyone in a few minutes. Any dry cell of regular size and high amperage can be used.

This machine is provided with a better and stronger motor than Vibrator No. 1. It will give the long or percussion stroke and short or rubbing motion.

It gives vibration strong enough for making a vibrating chair.

Put up in a good leatherette case 11½x9¼x11¾ inches.

We furnish with this outfit, one B button applicator, one C ball applicator, one D soft rubber scalp applicator, one H soft rubber cup applicator, one J large hard disc applicator and one K soft rubber ball applicator, and one oil can.

Full directions and charts written by an expert, accompany each outfit.

No. 2C Complete, ready for use $47.50

White Cross Electric Vibrator No. 8B

Combination Portable Dry Cell Machine. Giving Heavy Mechanical Vibration Very Strong Faradic Electric Current and a Mild Galvanic Current

A Combined Mechanical Vibrator and Electro Medical Battery, with a Good Faradic Coil, Plates for Electric Bath, Electric Hair Brush for Scalp Massage, Electric Lamp for Examinations, and a Full Set of Electrodes and Applicators.

PATENTED

This is a combined Mechanical Vibrator and Electric Medical Battery designed for Professional and Home use, where the operator wants both the mechanical vibration and electricity. With this outfit every portion can be applied and taken alone, or at the same time the electricity is applied. It gives the Faradic Electricity strong enough for several persons at the same time, but it can be regulated so as to be mild enough for the most delicate applications. It gives Primary, Secondary and the combined Primary and Secondary currents. It also gives Galvanic Current for medical purposes. This outfit can also be used for operating the electric needle in removing Facial Blemishes, Superfluous Hair, Warts, Moles, etc.

The Vibrating Chair can be operated with this outfit with the aid of Clamp No. 14 and Attachment R. All the applicators and the electrodes we furnish can also be used with this outfit.

The Electric Light can be used for examining the mouth, throat and other portions of the body.

Electric Baths can be taken in any ordinary bath tub with the aid of the plates we furnish, and if wanted, vibration can be taken at the same time.

The electricity can also be taken at the same time the patient is seated in the vibrating chair. All kinds of Body and Face Massage can be taken with this Vibrator, **with or without the Electric Treatment.**

This is a very complete outfit for all purposes, giving **very strong mechanical vibration** and both the Faradic and Galvanic electricity.

With This Instrument You Can Take

Body Massage, Facial Massage, Scalp Massage, Ear Massage, Eye Massage, Swedish Movement, Vibrating Chair Treatment, Electric Body Treatment, combined Vibratory and Electric Treatments, light Galvanic Electric Treatment, Electric Baths in your own tub, Electric Scalp Treatments, Electric Facial Treatments, Operating Electric Needle for removing moles, warts, superfluous hairs and other facial blemishes, Electric Light Examinations.

Remember—You can take facial and scalp massage treatments every day yourself, the body with either vibration or electricity. You can have the electric bath in your own bath tub, the electric lamp for examinations, the electric lamp for your own rocker or any chair a vibrating chair with this outfit. It is so simple in operation that a child cannot do themselves any harm with it and you have command of the **best known relieving agents at your disposal. Vibration, Galvanic and Faradic Electricity.**

Full Directions and Charts for operating and taking treatment, written by an expert, accompany each outfit.

We furnish with this outfit Applicators A, B, C, D, H and K, also two sponge electrodes with handles, one sponge with head band, two large plates, two metal handles, two conducting cords, one electric hair brush, one Electric Lamp with Tongue Depressor and one oil can.

No. 8B Complete, ready for use. $82 70

THE FAMOUS WHITE CROSS ELECTRIC VIBRATORS

FULLY GUARANTEED PRICES EACH

PATENTED Fully Guaranteed

White Cross Electric Vibrator No. 26C

Operates on the Electric Light Current
Operates on 100 to 220 Volt Direct and Alternating Current

This machine is designed for home use, and the construction is so simple that anyone can operate it.

It gives very heavy vibration, suitable for all kinds of body massage and can be regulated so as to be mild enough for delicate treatments of the scalp, face, eye and ear. It gives the percussion stroke, rubbing and angular stroke, as well as the popular lateral or side stroke so beneficial to the face and scalp.

It is provided with a starting switch and speed regulator, which is located conveniently near the handle.

The Vibrator is provided with a high grade, universal, removable motor.

It can be operated on both direct and alternating current, which is a great advantage for those who live in rented houses, in case they should move into a district in which a different current is used.

Speed of Vibrator can be as well regulated on the direct current as on the alternating current.

There is practically no vibration in the handle and it is almost noiseless. The Vibrating Chair can be operated with the aid of the famous Lindstrom Patented Vibrating Chair Converter No. 9 and attachment "R."

The motor of the Vibrator is strongly built and is well insulated. The armature and fields are stamped out of Norwegian iron, and are wound with the best double insulated, silk-covered wire. The commutator has cut segments which are insulated with mica. The bearings are made of phosphor bronze and the shaft is made of tool steel. It is provided with self-oiling oil cups and reinforced cord.

Put up in a leatherette silk-lined case, size 11¾x8¼x4½

Full directions and charts written by an expert accompany each machine, also a copy of "Vibratory Technique," by Dr. Benjamin Brown.

One H facial, one D scalp, one B button, one C ball, one J large hard disc, one S sponge, one O spinal, one P throat, and oil can with each outfit.

No. 26C Complete, ready for use..... $48.70

PATENTED Fully Guaranteed

White Cross Electric Vibrator No. 27C

Operates on the Electric Light Current
Operates on 100 to 220 Volt Direct and Alternating Current

It gives the rotary and percussion stroke, also the lateral and rubbing motion.

The Vibrator is provided with a starting switch and speed regulator, which is located conveniently near the handle.

It is operated by a high grade, universal, air cooled, removable motor. It is noiseless in operation, except for the slight hum of the motor. It is equipped with all the latest improvements.

It is constructed for more various uses than the smaller outfits, and more applicators are furnished.

The No. 27 Vibrator gives stronger vibration than the No. 26 as it has more windings on armature. The Vibrator is finished in black enamel and gold plate, making it very attractive, besides very durable. The armature and field are especially carefully made of Norwegian iron and are wound with the highest grade, double insulated, silk-covered wire. The bearings are made of phosphor bronze and the shaft is made of tool steel. It is provided with self oiling oil cups. The cord is carefully made and reinforced.

This outfit is furnished with a very handsome leatherette case with silk lining. Size of case, 13¾x10¼x4½ inches. There is also a strong lock on the case.

One H facial, one D scalp, one B button, one C ball, one J large hard disc, one S sponge rubber sponge, one K soft rubber ball, one A hard rubber [illegible], one O spinal, and one P curved applicator, one T brush applicator [illegible] and one jar Vibrator Massage Cream, are furnished with each outfit.

Full directions and charts written by an expert, also a copy of "Vibratory Technique" by Dr. Benj. Houston Brown, accompany each machine.

Breezer Electric Fan No. 60

8-Inch Universal Non-Oscillating Desk Bracket Fan

Fully guaranteed

Weight 6 lbs.

Voltage—Can be furnished in voltages from 8 to 220, any cycles.

Finish—Nickel, highly polished.

Size—12½ inches high, 9½ inches wide, over all. (When used on wall it extends out 9 inches.)

Adjustments—Large wing nut allows fan to be adjusted up or down.

Speeds—Three speeds.

Motor—The motor is especially adapted for fan use. The armature is perfectly balanced which insures smooth operation. Extra large and high-grade graphite brushes insure long life. The bearings are made from phosphor bronze.

Oiling—Large inverted oil cups, which will supply ample lubrication.

Blades—Each blade is weighted and accurately balanced to warrant quiet and perfect operation.

Guard—The guard is extra heavy, and is braced to the motor with three metal braces.

Base—The base is highly finished in nickel, and has holes for attaching fan to wall. It is also equipped with rubber feet to prevent marring.

Cord and Plug—Cord and plug are furnished free.

Additional Information—We recommend the Breezer Electric Fan for family and office use, by the bedside, staterooms, boats, limousines, etc., also as a practical desk and wall fan. Where quiet operation is essential, the Breezer fills a long-felt want.

The Breezer is attractive in appearance, needs very little attention, and is economical to operate.

The entire fan is substantially constructed and is practically noiseless, with no vibration.

When ordering state voltage and cycles.

Chicago Electric Fan

Model 64

Fully guaranteed.

This Electric Fan is regulation 8-inch size and has strong universal motor.

Blades and guard are nickel-plated and highly polished. The base and motor are finished in black, making it very attractive.

Gives strong breeze, as powerful as any 8-inch fan made. Rubber feet so as not to mar furniture. Furnished for any voltage from 12 up to 220 volts direct or alternate current. Specify voltage when ordering.

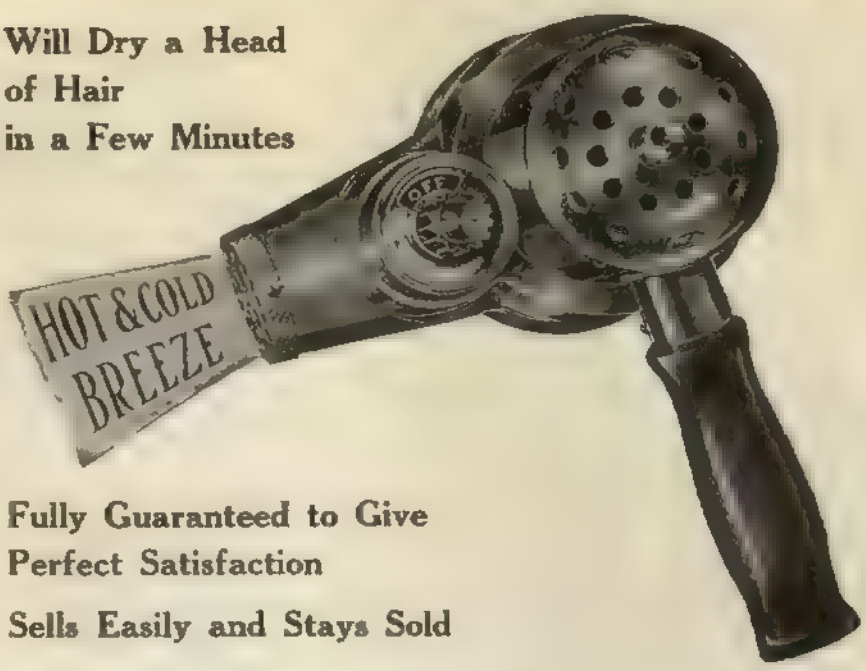
Do not confuse this fan with other fans on the market at the same price, as this is a strong, durable fan that will give continued service.

Furnished with cord and plug. One speed equipped with on and off switch. Fully guaranteed.

No. 64 Each..... $10 35

White Cross Electric Hair Dryer No. 41

Will Dry a Head of Hair in a Few Minutes



Fully Guaranteed to Give Perfect Satisfaction

Sells Easily and Stays Sold

Operated on 100-220 volt direct and alternating current, any cycle.

Gives Hot and Cold Breeze.

This Hair Dryer is designed for practical work. It is finely finished in black and bright nickel. The breeze can be changed instantly from hot to cold by simply turning a switch on the side. The current can also be turned on and off by this switch so that it is not necessary to turn it on or off at the socket.

This machine is most suitable for barbers, as it can be used equally well for taking out as in the office.

There is nothing better on the market for home use as it is so simple that anyone who has the electricity in the house can use it.

Everything is made of the best material and highest class workmanship in our own factory. Everything is fully guaranteed.

The electric motor in this Dryer is made by us and is of the highest grade.

The armature is made of laminated Norway iron discs thoroughly treated with insulating material and assembled under very heavy pressure. They are then ground by a special machine until perfectly true.

The Armature Coils are wound by a special machine with the best silk covered magnet wire. This insures uniform resistance of each coil. The coils are so arranged on the armature, that they are perfectly balanced.

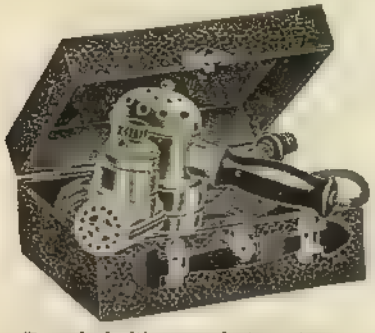
The Fields are made of thin discs stamped out of Norway iron. They are treated with an insulating compound and assembled under very heavy pressure.

The Field Coils are form wound, with silk insulated magnet wire, which insures perfect uniformity in resistance. Each Coil is insulated by being wound with linen tape.

The Commutator is built up with the greatest care, of pure copper bars and insulated with best quality mica. They are securely put together under heavy pressure, immersed in insulating varnish and baked.

It is provided with reinforced cords of the very best grade.

The bearings are made of Phosphor Bronze perfectly ground and polished so that there is no friction even when the motor is new. Bearings are equipped with felt oil wicks and springs, thus making motor self-oiling. The shaft is made of Tool Steel which prevents wearing and keeps armature true.



Furnished either in a leatherette carrying case, or pasteboard box.

In ordering state voltage and cycles it is to be operated on.

The minimum charge on any invoice for repairs will be 10 cents. Order by registered number of repair and state capacity of freezer for which part is wanted.

For shipment from factory only.

SAMSON, POWER.

The "Samson" is the best power machine made. The platform and stand are of cast iron. The gear frame extends across the top of the tub, and is fastened by a latch bolt and thumb screw. When the frame is released it can be raised to an upright position, and is then firmly held. The can and tub may be removed and replaced at pleasure while the frame is in this position.

The beaters are malleable iron, tinned and fitted with double self-adjusting wood scraping bars. The tubs are exceedingly heavy and durable, and the cans are of the heaviest tin plate that can be purchased.

The pulleys on the 25 quart are 11½x4½ inches, and on the 40 quart, 15x5½ inches; and the freezers should be operated at a speed of about 75 revolutions per minute. If desired, a large fly wheel weighing 150 pounds may be substituted in place of the pulleys and the freezer may be operated by hand power.

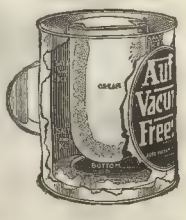
Each

*No. 25SP—Capacity, 25 quarts; weight, 325 pounds; complete with tight and loose pulleys $86.00

*No. 40SP—Capacity, 40 quarts; weight, 485 pounds; complete with tight and loose pulleys 115.00

***For shipment from factory only.**

AUTO VACUUM.



A freezer that requires no turning or shaking to freeze the cream. Air space construction acts as a vacuum, ice spends its full force against the cream chamber as the cold cannot pass through the air wall. It is strictly sanitary, simple in construction having only three parts and will freeze cream in less than half an hour. Cream will remain hard eight hours without refilling ice chamber.

Made of heavy metal throughout, white enamel finish with blue and gold lettering.

Each

No. 2—Auto Vacuum Freezer; capacity, 2 quarts (12 dishes); height, 11 inches; diameter, 9 inches; weight each packed, 6½ lbs $5.00

One in a carton.

ICE CREAM FREEZERS.

IMPROVED WHITE MOUNTAIN TRIPLE MOTION.

Strong water-proof tub, bound with heavy galvanized hoops; the gearing completely covered so that nothing can get between the cogs; can full size and made of the very best quality of tin plate, beaters of iron, dasher and tinned; all castings attached to the tub nicely galvanized to prevent rusting. This is the only freezer in the market having the celebrated duplex dasher, with self-adjusting wood scraper bar.

WITH CRANK.

With crank and wire bail with wood grip.

The cut shows the construction and position of the mechanism of the White Mountain freezer. The can moves from right to left, the outside beater moves from left to right, scrapes with its wooden bars the frozen cream from the can and throws it toward the center where it is met by the floats of the inside beater moving in an opposite direction and returned to the inside surface of the can to be re-frozen. The triple motion thus induced, keeps the cream constantly moving and ensures every particle being smoothly and evenly frozen.

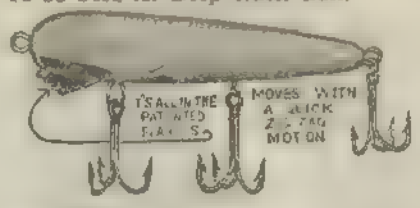
One in a Box, One Dozen in a Display Case

WINGED WOBBLER

The Patented Wings on this Bait give it a quick Zig-Zag Motion through the Water and also makes the Bait Weedless to a Certain Extent. To be Used for Deep Water Bait.



Deep Water Bait.

Wood Body; Length 4¼ inches; Assorted Colors, Red Body with Red Wings and White Body with Red Wings; Three Bronzed Spear Point Limerick Treble Hooks No. 1/0; Weight each 1 oz.

Per Dozen

No. WFW. **$12 00**

Always Specify Color Wanted.

One in a Box, One Dozen in a Display Case

NEMO MUSKELLUNGE

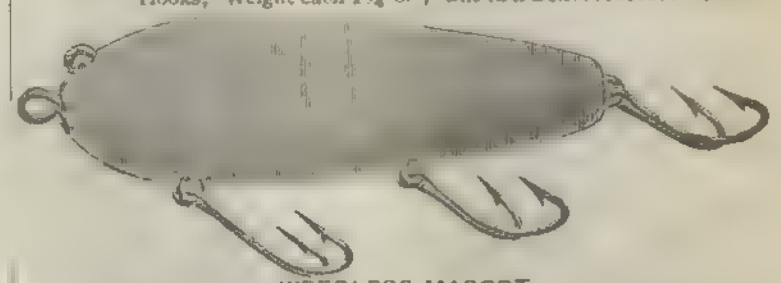
For Muskellunge, Pickerel and Large Bass

Made of Spanish Cedar, and is Painted with a Special Preparation of Pure Celluloid, Colored with Fast Colors and then Finished with a Heavy Coat of Clear Celluloid, Making a Finish that Positively will not Crack, Peel or Chip off.

May be Used Either as a **Surface** or **Under Water** Bait, as Desired, by Simply Shifting the Little Ball from One End to the Other; When used as an Under Water Bait it will Rise to the Surface if it is Stopped for any Reason, thus Preventing Fouling in the Weeds.

Per Dozen

No. NC—Length of Body 4 inches; Bright Red Spinner Head; Three Blue Steel Extra Heavy Spear Point Double Hooks; Weight each 1¼ oz., One in a Box. **$18.00**



WEEDLESS MASCOT

The only Weedless Wobbler on the market; It Wobbles, Wriggles, Swims, Dives, Runs on the Surface or Under the Water at Three Different Depths and Floats at all times when at Rest; It changes its Action, Changes its Weight and is Reversible; Either End can be Used as Front End, getting Different Results; Simply Unscrew the Front or Rear Screw Eye and Remove the Weight that is Inside; Complete Directions for using with each Bait

Made of Fine Grade Cedar, Enameled with a Special Celluloid Enamel which does not Crack, Chip or Peel and is Absolutely Waterproof.

Per Dozen

No. MW—Length of Body 3¼ inches; Bright Red Head; Three Bright Steel Spear Point Double Hooks; Weight each 1 oz.; One in a Box. **$13.50**

SIX IN-ONE

Made with an Adjustable Diving Guide which May Be Set at Any One of Six Different Positions. One Position Will Cause the Bait to Skim on the Surface of the Water; the Other Positions Will Cause the Bait to Travel in the Water at Various Depths, Ranging to a Maximum of Six Feet. Each Different Change in the Position of the Diving Guide Not Only Causes the Bait to Travel at a Different Depth, but with a Different Wobbling Movement.

Made of Selected Red Cedar, Beautifully Finished with the Most Durable Enamel Obtainable; All Metal Parts are of Brass, Nickel Plated.

Per Dozen

No. 61W—Length of Body, 4¾ inches; Bright Red Head; Two Bright Steel Spear Point Treble Hooks; Weight Each 1⅛ ozs. . **$12 00**

One in a Box

CASTING MINNOWS

CHIPPEWA

A Light and Durable Casting Bait designed to Supply a Demand for a Floating Bait of Small Size that does not Twist or Tangle itself when using; Made of Tin and Covered with a Waterproof Enamel that Cannot be Worn off; The Patented Propellor on this Bait Gives it a Quick Motion through the Water and Has the Exact Motion of a Minnows' Tail; Hook Sockets Always hold the Hooks Outwardly so that the Points are always Presented to Fish. Correctly Weighted so that it will always Float in an Upright Position.

Per Dozen

No. CB—Fancy Sienna Yellow Body; Size of Body 3x1¼ in.; One Bright Steel Spear Point Treble Hook at End; Feathered with White and Green Feather; One Bright Steel Spear Point Double Hook on Bottom; One Side of Propellor Nickel Plated; the other Side Enameled in Red, Large Glass Eyes, Weight each 1 oz. $14.40

Twelfth Dozen in a Box

LUMINOUS COAXER—WEEDLESS

The only Weedless Moonlight Bait on the Market. No Danger of Getting Snagged in the Thickest Weeds. Even on the Darkest Nights.

Body made of **Selected Cedar and Coated with a Special Preparation which Absorbs either Daylight or Artificial Light, Radiating Same when Exposed at Night; Floats when not in Motion.**

Designed Especially for Catching Black Bass and other Game Fish which are Night Feeders.

Per Dozen

No. 1L—Wood Body; Length 1¾ inches; Equipped with Two Large Spear Point Hooks at Tail; Two Red Color Cloth Wings and Genuine Buck Tail Hair, Red Hair Color Tail; Weight each 1 oz. $13.50

Twelfth Dozen in a Box

CONVERTIBLE COAXER

This Bait can be Used as a Strictly Weedless Bait When Desired, by Simply Removing the Double Hook from Bottom of Bait; The Double Hook Should be Used Only in Open Water out of the Weeds; An Excellent Bait for Bass Fishing.

Made of Selected Cedar and Enameled with a Special Celluloid Enamel which will not Crack or Peel Off.

Per Dozen

No. 2C—Wood Body; Length 1¾ inches; Equipped with two Large Spear Point Hooks at Tail; One Spear Point Double Hook on Body; Two Red Hair Color Wings, and Finest Quality Red Hair Feathers at Tail; Weight each 1 oz. $13 50

Picture Section for May

Sing, Belgians, Sing

By Emile Cammaerts

A [illegible] bleed
[illegible]
[illegible] of Aerschot of Dinant

Although our eyes may burn
Although our brain may turn.
[illegible]

With branches of beech, of flaming beech
To the sound of the drum
We'll cover the graves of our children

We'll choose a day like this
When the poplars tremble softly in the breeze
And all the woods are scented
With the smell of dying leaves,
That they may bear with them be neath
The perfume of our land
We'll ask the earth they loved so well
To rock them in her great arms
To warm them on her mighty breast
And send them dreams of other fights
Retaking Liege, Malines, Brussels, Louvain and Namur,
And of their triumphant entry, at last, in Berlin!

Sing, Belgians, sing!
Although our wounds may bleed, although our voices break,
Louder than the storm, louder than [illegible]
Although our wounds may bleed, although our hearts may break
Sing of hope and hereest hate,
Neath this bright autumn sun
Sing of the pride of charity
When vengeance would be so sweet!

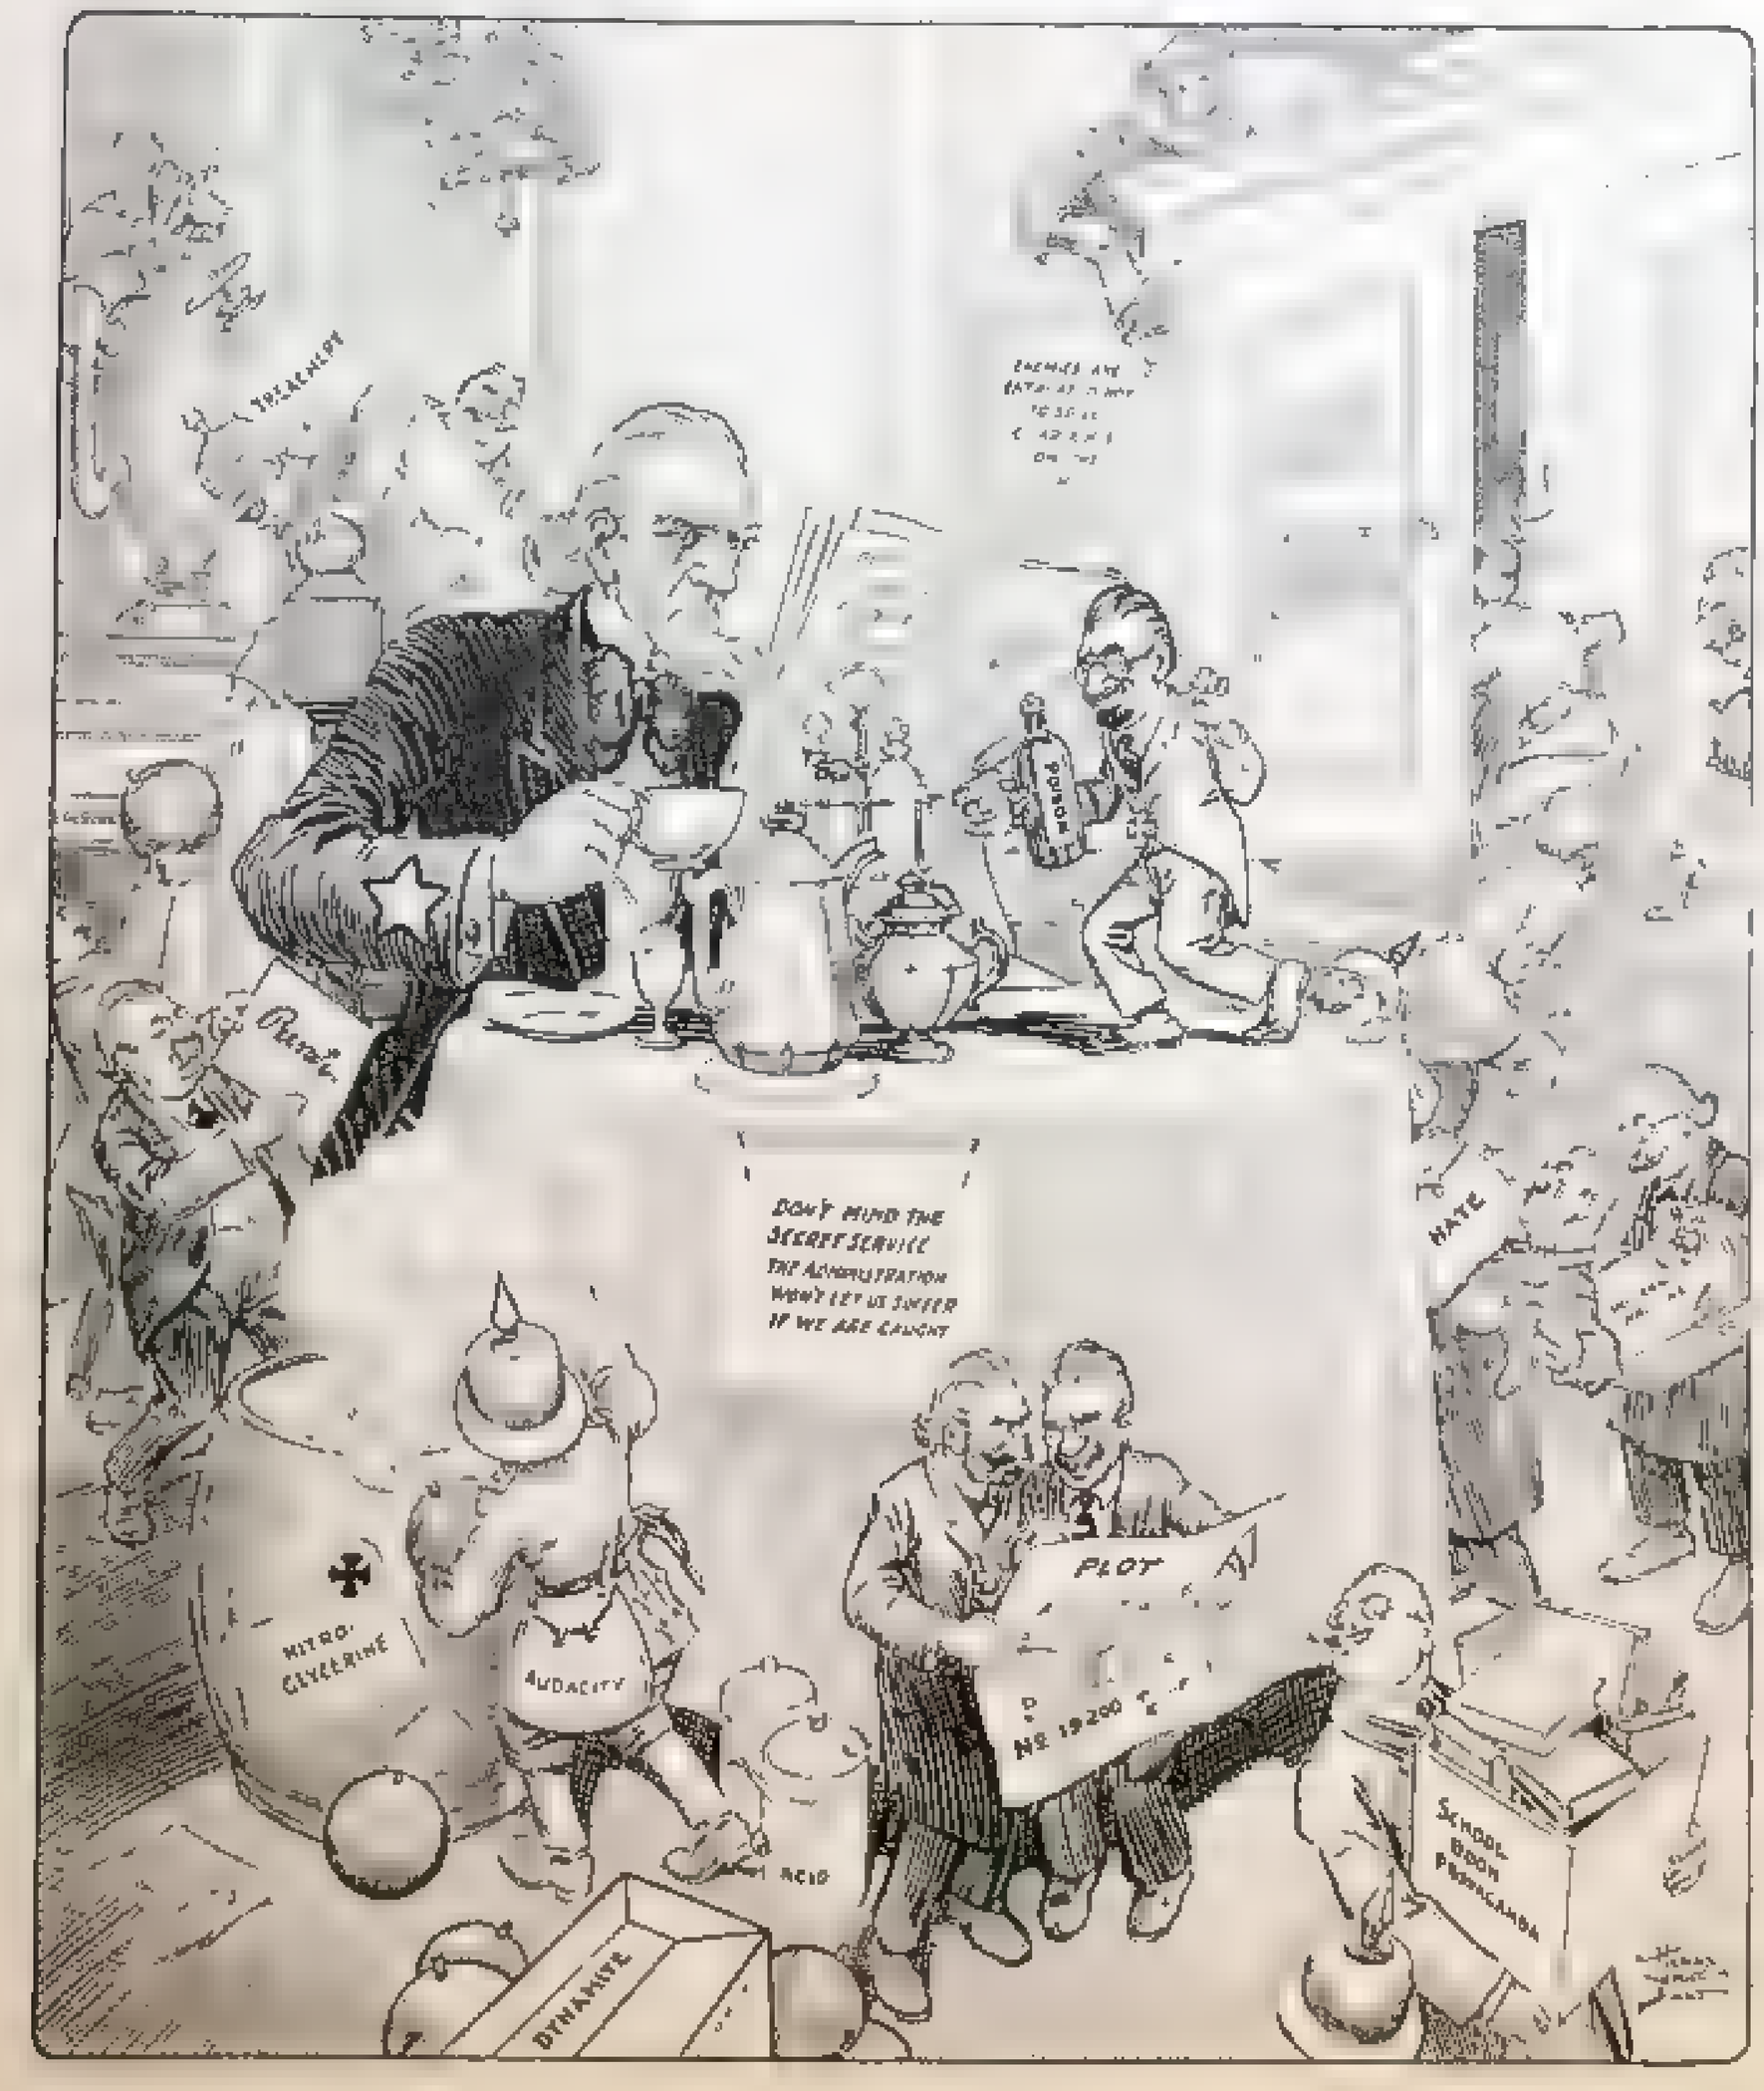
Life

"WHERE'S YOUR NUMBER?"



Uncle Sam: IT ALMOST MAKES ME FEEL AS IF SOME PEOPLE WERE NOT TO BE TRUSTED

Keep them in Class 1-A

There [illegible] enough wheat for [illegible] used as it should be by the Food Administration. [illegible] to use substitutes — [illegible] many ways that are just as satisfactory as wheat. When you [illegible] see to it that [illegible] utilize its full value — not just part of it.

You can now get *Ralston* freely. [illegible] is combined with hearty whole [illegible] wheat go farthest. It has the rich wheat flavor children love.

Ralston supplies the very [illegible] a growing child needs to [illegible] sturdy constitution. Mildly laxative, it stimulates the digestive organs to normal action.

[illegible]

Not necessary to buy substitutes with Ralston.

[illegible]

We use the whole of the wheat in making our wholesome foods.

Ralston Purina Mills, 810 Gratiot Street, St. Louis, Mo.

[illegible]

Stand Up and Be Counted

The Greatest Mother in the World is counting her children.

She wants your name—and yours—and yours—the names of all her children.

So, stand up, you men and women of America—stand up and be counted

Let The Greatest Mother in the World see what a big, proud family she has.

You've given your share to your Red Cross—given it generously,—and you'll give your share again when the time comes.

Right now your Red Cross wants your name—not a contribution—wants to know that we are with her [illegible] to help her. The Greatest Mother in the World wants to know who her children are before Christmas.

Give your name and a dollar to the next Red Cross Worker who asks you for it

Answer "Present" at the *Christmas Red Cross Roll Call*

Stand up and be counted you children of The Greatest Mother in the World.

All you need is a Heart and a Dollar

Schoenhut All-Wood Perfection Art Doll

Schoenhut All-Wood Perfection Art Dolls can be put in any life-like position. Some have beautiful life-like child faces, and others have the usual doll faces. They come with the finest quality mohair wigs or with hair carved on wooden heads painted in natural colors. ***Schoenhut Dolls*** are made entirely from wood, they do not break and cause heartaches. They are artistically painted in natural colors that will not come off. ***Schoenhut Dolls***, being a new invention, are not yet stocked by all dealers. If your dealer cannot supply you we will be glad to supply you direct from the factory. Send for illustrated doll booklet.

The Schoenhut Toy Piano mat a great many [illegible] Schoenhut Toy Pianos have been made [illegible] for forty years in the U. S. A. They are [illegible] two sizes and in five ranging from 10 notes to [illegible] keys.

They are sold by practically all toy dealers and [illegible]. Get a catalogue from your dealer and [illegible] the name *Schoenhut* when [illegible]

Pianos should not be ordered direct from the factory, as it is not practical to ship them by Parcel Post.

Make this the children's Christmas

Upon the happiness of little children the shadow of war should not fall. The Christmas days of childhood are all too few. We must not let even one of them be saddened.

Give them Schoenhut American made toys which will last for years—which will educate as well as amuse—which will train the growing mind along natural lines rather than grotesque ones.

If you have no children of your own, remember that many of your friends have gone to the front, leaving behind them children who will be lonely this Christmas, whose gifts will be fewer, who have great need of the added happiness you can give by sending them *Schoenhut toys*.

Every good store has Schoenhut toys. Look for the name on every package.

The A. Schoenhut Co.
Philadelphia, Pa.

Schoenhut Mailwood Toys appeal to every boy and girl who loves to know what's inside.

They are made of clean white wood (not painted) and can be easily taken apart and put together.

They are designed [illegible] the smaller children's nine [illegible] and [illegible] made [illegible] strong material [illegible] toys. Locomotives, [illegible] motor trucks etc. can be built [illegible]

[illegible] at your dealer's, write direct to us for [illegible] values.

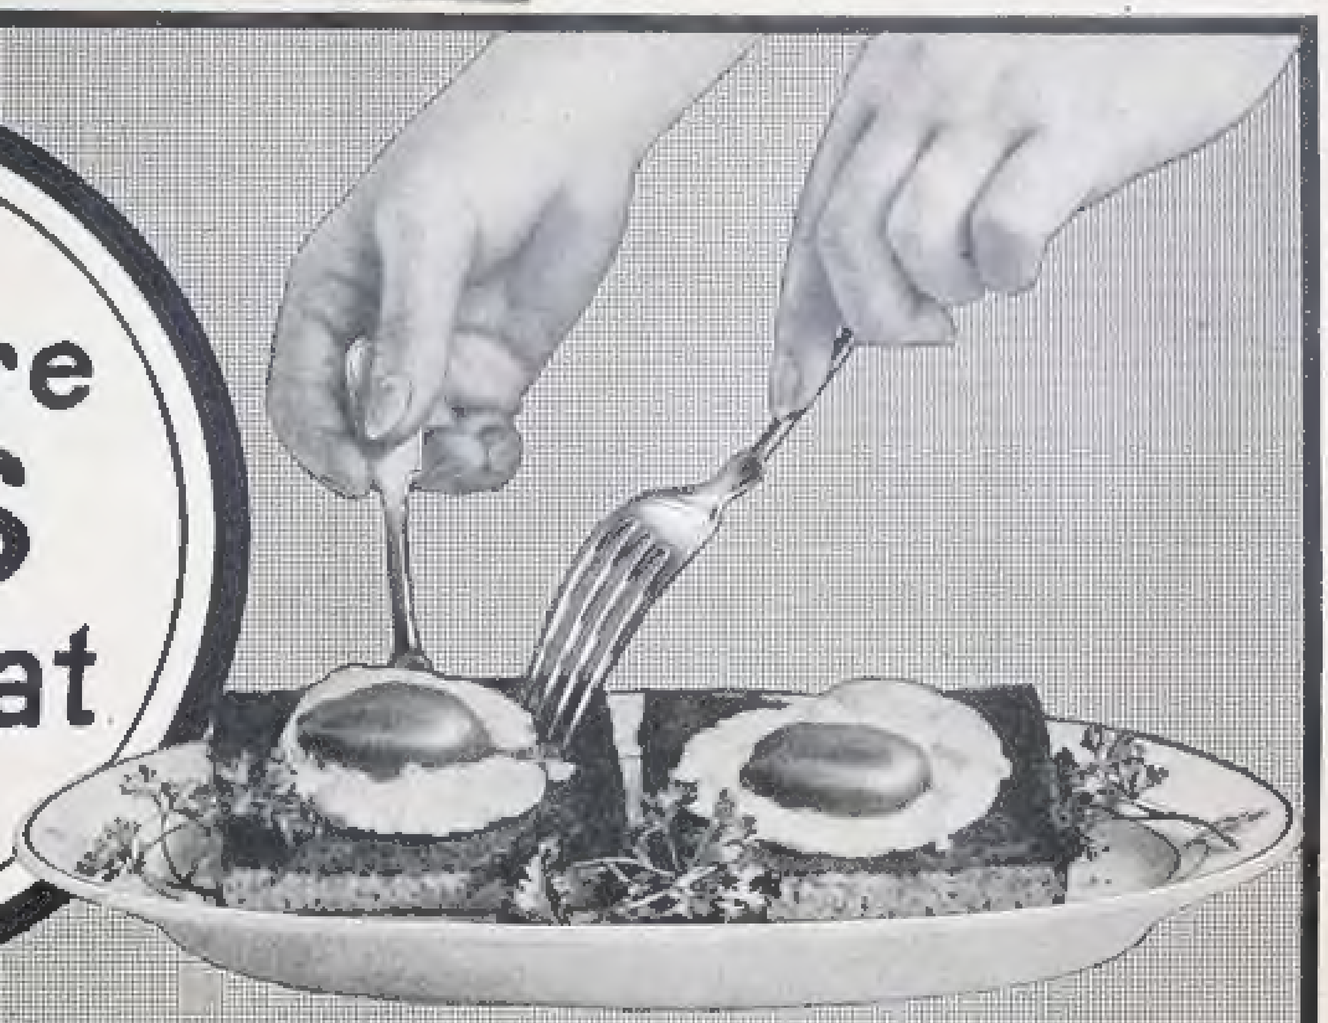
A PARADE THE KAISER WOULDN'T CARE TO WITNESS

HERE they come! Look at 'em with your hat off (if you're a man)—THE FLEET led by the Pennsylvania. Don't they give you a thrill? Note the little destroyers on the far side. Those are the scouts that are helping to sweep German submarines from an outraged ocean. And on this side, down in front, is one of our own submarines, who have their job to do as well!

Use more EGGS save meat



USE more eggs to save meat—that's what Mr. Hoover asks you to do.

And you're glad to do it. You know there isn't a better breakfast than two poached eggs on toast—seasoned exactly right. Of course, the cooking gives the flavor. There isn't much interest in a raw egg.

The "cooking" does it for Lucky Strike cigarette—gives a delicious flavor. It's toasted.

LUCKY STRIKE CIGARETTE

It's toasted
